IT IS AGREED as follows:

1. INVESTMENT

- 1.1 Subject to the conditions specified in this Agreement, the Investor will acquire the Investor Shares (as defined in Clause 1.4) at the IPO Price (as defined in Clause 1.4) under and as part of the International Offering through the Joint Global Coordinators or their affiliates in their capacity as underwriters of the relevant portion of the International Offering, and each of the Company and the Joint Global Coordinators agrees that the Investor shall be issued the Investor Shares at the IPO Price on the Delivery Date, or where applicable, pursuant to Clause 3.1, the Delayed Delivery Date.
- 1.2 The Investor may elect by notice in writing served to the Joint Global Coordinators not later than two Hong Kong banking days (as defined in Clause 1.4) prior to the Delivery Date to acquire the Investor Shares through another wholly-owned subsidiary of Temasek who is a “professional investor” as defined in Part I of Schedule 1 to the Securities and Futures Ordinance of Hong Kong and is not a U.S. person as defined in Rule 902 of Regulation S under the Securities Act (the “Investor Subsidiary”), in which case the agreements, representations, undertakings, acknowledgements and confirmations given in this Agreement shall be deemed to be given by the Investor for itself and on behalf of the Investor Subsidiary.
- 1.3 The number of Investor Shares to be acquired by the Investor under this Agreement will not be affected by any re-allocation of H Shares between the International Offering and the Hong Kong Public Offering in the event of over-subscription under the Hong Kong Public Offering nor by any exercise of the over-allotment option to be granted by the Company to the Joint Global Coordinators on behalf of the international underwriters for the Global Offering.
- 1.4 For the purposes of this Agreement, the “**Investor Shares**” means such number of H Shares offered by the Company to the Investor or the Investor Subsidiary in the International Offering equal to the maximum number of H Shares that may be purchased with US\$50 million (or its Hong Kong dollars equivalent based on the closing middle point spot rate quoted by The Hongkong and Shanghai Banking Corporation Limited for United States dollars at the close of business in Hong Kong on the date on which the IPO Price is determined) (“**Investment Amount**”) at the IPO Price, rounded down to the nearest board lot; the “**IPO Price**” means the price per H Share at which the H Shares are acquired by investors under the International Offering, expressed in Hong Kong dollars (exclusive of Brokerage and Levies, as defined in Clause 3.1), and determined as referred to in Clause 5.1; and “**Hong Kong banking day**” means any day except a Saturday, Sunday or other day on which commercial banks in Hong Kong are generally open to the public in Hong Kong. Both the IPO Price and the number of Investor Shares shall be determined by the Joint Global Coordinators

and the Company pursuant to this Agreement, and such determination shall be conclusive in the absence of manifest error.

2. AGREEMENT CONDITIONAL UPON COMPLETION OF GLOBAL OFFERING

2.1 The Investor's agreement in Clause 1 above (and the right of the Investor to acquire the Investor Shares) is conditional upon the underwriting agreements for each of the Hong Kong Public Offering and the International Offering being entered into by, inter alia, the Company and the Joint Global Coordinators and having become effective and unconditional and not having been terminated (in accordance with their respective original terms or as subsequently varied by agreement of the relevant parties). There can be no guarantee that the Global Offering will be completed or not be terminated, and no liability of the Company and/or the Joint Global Coordinators to the Investor or the Investor Subsidiary, as the case may be, will arise if the Global Offering is not duly completed for any reason by the dates and times contemplated or at all.

3. CLOSING

3.1 Subject to Clause 2 and Clause 3.2, the Investor shall pay the aggregate of the IPO Price for the Investor Shares, together with an amount equal to the aggregate of (i) a brokerage fee of 1%, (ii) the Hong Kong Stock Exchange trading fee of 0.005%, and (iii) the SFC transaction levy of 0.004%, in each case calculated by reference to the aggregate IPO Price for all Investor Shares ("**Brokerage and Levies**"), by same day value credit in clear funds and without deduction or set-off whatsoever (to such Hong Kong dollar bank account as may be notified to the Investor by the Joint Global Coordinators in writing no later than three JGCs, please confirm Hong Kong banking days prior to the due date for payment) on the Delivery Date (as defined in Clause 3.5) to the Joint Global Coordinators, and delivery of the Investor Shares to the Investor or the Investor Subsidiary, as the case may be, shall be made through the Hong Kong Central Clearing and Settlement System for the account of the Investor or the Investor Subsidiary, as the case may be, not later than 9:30 a.m. (or such other time as notified by the Joint Global Coordinators) on the Delivery Date or, to the extent the Joint Global Coordinators notify the Investor in writing no later than two Hong Kong banking days prior to the Delivery Date that they will defer delivery of the Investor Shares, on the Delayed Delivery Date.

3.2 Delivery of the Investor Shares may also be made in any other manner which the Company, the Joint Global Coordinators and the Investor may otherwise agree to in writing.

3.3 Delivery Date for the Investor Shares is currently expected to be not later than the date on which the H Shares are first listed on the Hong Kong Stock Exchange (the "**Listing Date**"). The Joint Global Coordinators shall promptly notify the Investor of any delay in the Delivery Date.

3.4 For the avoidance of doubt, the proceeds from the sale of the H Shares comprised in the Global Offering to be received by the Company on the Listing Date shall exclude the

Investor Shares to the extent that the Delivery Date for such Investor Shares is subsequent to the Listing Date.

- 3.5 For the purpose of this Agreement, “**Delivery Date**” means, subject to the underwriting agreement for the Hong Kong Public Offering and the underwriting agreement for the International Offering being entered into and having become effective and unconditional and not having been terminated, on or before 8.00 a.m. on the Listing Date (currently expected to be no later than the Listing Date) unless the Joint Global Coordinators notify the Investor that the Investor Shares will be delivered on the Delayed Delivery Date in accordance with Clause 3.1 the day on which the Investor Shares are delivered to the Investor or the Investor Subsidiary.
- 3.6 For the purpose of this Agreement, “**Delayed Delivery Date**” means such time and date as the Joint Global Coordinators may notify the Investor by not less than two days’ prior written notice pursuant to Clause 3.1, which shall be a Hong Kong banking day later than the Delivery Date but no later than two Hong Kong banking days following the 30th day after the date expected to be the latest date for lodging applications under the Hong Kong Public Offering, at which time and date the Investor Shares shall be delivered to the Investor or the Investor Subsidiary, as the case may be.
- 3.7 If the Delivery Date is currently expected to be not later than the Listing Date and the Company will then issue the Investor Shares to the Investor or the Investor Subsidiary, as the case may be. If the delivery of the Investor Shares shall take place on the Delayed Delivery Date, the Joint Global Coordinators will procure the issue or delivery of the Investor Shares to the Investor by exercising the Over-allotment Option (as defined in the Hong Kong prospectus for the Global Offering) or otherwise acquiring sufficient number of shares from the secondary market to deliver the Investor Shares.
- 3.8 As an alternative to the deferred delivery arrangements referred to in Clauses 3.1 to 3.7 upon request of the Joint Global Coordinators, the Investor undertakes to negotiate in good faith with the stabilising manager appointed by the Joint Global Coordinators in connection with the Global Offering (the “**Stabilising Manager**”) with a view to agreeing the provisions of a stock borrowing agreement on terms reasonably acceptable to both parties, under which the Investor shall agree to lend to the Stabilising Manager such number of the Investor Shares at the Stabilising Manager’s option as is equal to or not exceeding the number of the Investor Shares.

- (A) The Company is applying for a listing for its overseas listed foreign invested shares of nominal value of RMB1.00 each in the capital of the Company (“**H Shares**”) on the Main Board of The Stock Exchange of Hong Kong Limited (the “**Hong Kong Stock Exchange**”) by way of a global offering (the “**Global Offering**”) of its H Shares comprising:

- (B) The Investor wishes to make an equity investment in the Company as part of the International Offering on the terms and conditions set out in this Agreement.

IT IS AGREED as follows:

1. INVESTMENT

- 1.1 Subject to the conditions specified in this Agreement, the Investor will acquire the Investor Shares (as defined in Clause 1.4) at the IPO Price (as defined in Clause 1.4) under and as part of the International Offering through the Joint Global Coordinators or their affiliates in their capacity as underwriters of the relevant portion of the International Offering, and each of the Company and the Joint Global Coordinators agrees that the Investor shall be issued the Investor Shares at the IPO Price on the Delivery Date, or where applicable, pursuant to Clause 3.1, the Delayed Delivery Date.
- 1.2 The Investor may elect by notice in writing served to the Joint Global Coordinators not later than two Hong Kong banking days (as defined in Clause 1.4) prior to the Delivery Date to acquire the Investor Shares through a wholly-owned subsidiary of the Investor that is a “professional investor” as defined in Part I of Schedule 1 to the Securities and Futures Ordinance of Hong Kong and is not a U.S. person as defined in Rule 902 of Regulation S under the Securities Act (the “**Investor Subsidiary**”), in which case the agreements, representations, undertakings, acknowledgements and confirmations given in this Agreement shall be deemed to be given by the Investor for itself and on behalf of the Investor Subsidiary.
- 1.3 The number of Investor Shares to be acquired by the Investor under this Agreement will not be affected by any re-allocation of H Shares between the International Offering and the Hong Kong Public Offering in the event of over-subscription under the Hong Kong Public Offering nor by any exercise of the over-allotment option to be granted by the Company to the Joint Global Coordinators on behalf of the international underwriters for the Global Offering.
- 1.4 For the purposes of this Agreement, the “**Investor Shares**” means such number of H Shares offered by the Company to the Investor or the Investor Subsidiary in the International Offering as equal to the maximum number of H Shares that may be purchased with US\$50 million (or its Hong Kong dollars equivalent based on the closing middle point spot rate quoted by The Hongkong and Shanghai Banking Corporation Limited for United States dollars at the close of business in Hong Kong on the date on which the IPO Price is determined) (“**Investment Amount**”) at the IPO Price, rounded down to the nearest board lot; the “**IPO Price**” means the price per H Share at which the H Shares are acquired by investors under the International Offering, expressed in Hong Kong dollars (exclusive of Brokerage and Levies, as defined in Clause 3.1), and determined as referred to in Clause 5.1; and “**Hong Kong banking day**” means any day except a Saturday, Sunday, or other day on which commercial banks in Hong Kong are not generally open to the public in Hong Kong. Both the IPO

Price and the number of Investor Shares shall be determined by the Joint Global Coordinators and the Company pursuant to this Agreement, and such determination shall be conclusive in the absence of manifest error.

2. AGREEMENT CONDITIONAL UPON COMPLETION OF GLOBAL OFFERING

2.1 The Investor's agreement in Clause 1 above (and the right of the Investor to acquire the Investor Shares) is conditional upon the underwriting agreements for each of the Hong Kong Public Offering and the International Offering being entered into by, inter alios, the Company and the Joint Global Coordinators and having become effective and unconditional and not having been terminated (in accordance with their respective original terms or as subsequently varied by agreement of the relevant parties thereto). There can be no guarantee that the Global Offering will be completed or not be terminated, and no liability of the Company and/or the Joint Global Coordinators to the Investor or the Investor Subsidiary, as the case may be, will arise if the Global Offering is not duly completed for any reason by the dates and times contemplated or at all, save as to any antecedent breach of this Agreement occurring before such date.

3. CLOSING

The Joint Global Coordinators shall promptly notify the Investor of any delay in the Delivery Date.

3.4 For the avoidance of doubt, the proceeds from the sale of the H Shares comprised in the

Global Offering to be received by the Company on the Listing Date shall exclude the Investor Shares to the extent that the Delivery Date for such Investor Shares is subsequent to the Listing Date.

- 3.7 The Delivery Date is currently expected to be not later than the Listing Date and the Company will, on or before the Delivery Date, issue the Investor Shares to the Investor or the Investor Subsidiary, as the case may be. If the delivery of the Investor Shares shall take place on the Delayed Delivery Date, the Joint Global Coordinators will procure the issue or delivery of the Investor Shares to the Investor by exercising the Over-allotment Option (as defined in the prospectus to be issued by the Company in Hong Kong in respect of the Global Offering) or otherwise acquiring sufficient number of H Shares from the secondary market to deliver the Investor Shares to the Investor.

(CITIC, CGM and MSL are collectively known as the “**Joint Global Coordinators**”).

WHEREAS:

- (A) The Company is applying for a listing for its overseas listed foreign invested shares (“**H Shares**”) on the Main Board of The Stock Exchange of Hong Kong Limited (the “**Hong Kong Stock Exchange**”) by way of a global offering (the “**Global Offering**”) of its H Shares comprising:
 - (i) a public offer by the Company of its H Shares for subscription in Hong Kong (the “**Hong Kong Public Offering**”); and
 - (ii) private placements by the Company of H Shares outside the United States, in offshore transactions to “non-U.S. persons” in reliance on Regulation S (“**Regulation S**”) under the US Securities Act of 1933, as amended (the “**Securities Act**”) and in the United States to qualified institutional buyers, as defined in Rule 144A of the Securities Act or other available exemption from registration under the US Securities Act (collectively, the “**International Offering**”).

- (B) The Investor is a company incorporated in the P.R.C. and whose H shares are listed on the Hong Kong Stock Exchange. The Investor wishes to make an equity investment in the Company as part of the International Offering on the terms and conditions set out in this Agreement.

IT IS AGREED as follows:

1. INVESTMENT

- 1.1 Subject to the conditions specified in this Agreement, the Investor will acquire the Investor Shares (as defined in Clause 1.4) at the IPO Price (as defined in Clause 1.4) under and as part of the International Offering through the Joint Global Coordinators or their affiliates in their capacity as underwriters of the relevant portion of the International Offering, and each of the Company and the Joint Global Coordinators agrees that the Investor shall be issued the Investor Shares at the IPO Price on the Delivery Date, or where applicable, pursuant to Clause 3.1, the Delayed Delivery Date.
- 1.2 The Investor may elect by notice in writing served to the Joint Global Coordinators not later than two Hong Kong banking days (as defined in Clause 1.4) prior to the Delivery Date to acquire the Investor Shares through a wholly-owned subsidiary of the Investor that is a “professional investor” as defined in Part I of Schedule 1 to the Securities and Futures Ordinance of Hong Kong and is not a U.S. person as defined in Rule 902 of Regulation S under the Securities Act (the “**Investor Subsidiary**”), in which case the agreements, representations, undertakings, acknowledgements and confirmations given in this Agreement shall be deemed to be given by the Investor for itself and on behalf of the Investor Subsidiary.
- 1.3 The number of Investor Shares to be acquired by the Investor under this Agreement will not be affected by any re-allocation of H Shares between the International Offering and the Hong Kong Public Offering in the event of over-subscription under the Hong Kong Public Offering nor by any exercise of the over-allotment option to be granted by the Company to the Joint Global Coordinators on behalf of the international underwriters for the Global Offering.
- 1.4 For the purposes of this Agreement, the “**Investor Shares**” means such number of H Shares offered by the Company to the Investor or the Investor Subsidiary in the International Offering equal to the maximum number of H Shares that may be purchased with US\$50 million (or its Hong Kong dollars equivalent based on the closing middle point spot rate quoted by The Hongkong and Shanghai Banking Corporation Limited for United States dollars at the close of business in Hong Kong on the date on which the IPO Price is determined) (“**Investment Amount**”) at the IPO Price, rounded down to the nearest board lot; the “**IPO Price**” means the price per H Share at which the H Shares are acquired by investors under the International Offering, expressed in Hong Kong dollars (exclusive of Brokerage and Levies, as defined in Clause 3.1), and determined as referred to in Clause 5.1; and “**Hong Kong banking day**” means any day except a Saturday, Sunday or other day on which commercial banks in Hong Kong are generally open to the public in Hong Kong. Both the IPO Price and the number of Investor Shares shall be determined by the Joint Global Coordinators

and the Company pursuant to this Agreement, and such determination shall be conclusive in the absence of manifest error.

2. AGREEMENT CONDITIONAL UPON COMPLETION OF GLOBAL OFFERING

- 2.1 The Investor's agreement in Clause 1 above (and the right of the Investor to acquire the Investor Shares) is conditional upon the underwriting agreements for each of the Hong Kong Public Offering and the International Offering being entered into by, inter alia, the Company and the Joint Global Coordinators and having become effective and unconditional and not having been terminated (in accordance with their respective original terms or as subsequently varied by agreement of the relevant parties). There can be no guarantee that the Global Offering will be completed or not be terminated, and no liability of the Company and/or the Joint Global Coordinators to the Investor or the Investor Subsidiary, as the case may be, will arise if the Global Offering is not duly completed for any reason by the dates and times contemplated or at all.

3. CLOSING

- 3.1 Subject to Clause 2 and Clause 3.2, the Investor shall pay the aggregate of the IPO Price for the Investor Shares, together with an amount equal to the aggregate of (i) a brokerage fee of 1%, (ii) the Hong Kong Stock Exchange trading fee of 0.005%, and (iii) the SFC transaction levy of 0.004%, in each case calculated by reference to the aggregate IPO Price for all Investor Shares ("**Brokerage and Levies**"), by same day value credit in clear funds and without deduction or set-off whatsoever (to such Hong Kong dollar bank account as may be notified to the Investor by the Joint Global Coordinators in writing no later than two Hong Kong banking days prior to the due date for payment) on the Delivery Date (as defined in Clause 3.5) to the Joint Global Coordinators, and delivery of the Investor Shares to the Investor or the Investor Subsidiary, as the case may be, shall be made by the issue and delivery of share certificates or at the option of the Investor, through the Hong Kong Central Clearing and Settlement System for the account of the Investor or the Investor Subsidiary, as the case may be, not later than 9:30 a.m. (or such other time as notified by the Joint Global Coordinators) on the Delivery Date or, to the extent the Joint Global Coordinators notify the Investor in writing no later than two Hong Kong banking days prior to the Delivery Date that they will defer delivery of the Investor Shares, on the Delayed Delivery Date.
- 3.2 Delivery of the Investor Shares may also be made in any other manner which the Company, the Joint Global Coordinators and the Investor may otherwise agree to in writing.
- 3.3 The Delivery Date for the Investor Shares is currently expected to be not later than the date on which the H Shares are first listed on the Hong Kong Stock Exchange (the "**Listing Date**"). The Listing Date is currently expected to be 13 March 2008. The Joint Global Coordinators shall promptly notify the Investor of any delay in the Delivery Date.
- 3.4 For the avoidance of doubt, the proceeds from the sale of the H Shares comprised in the Global Offering to be received by the Company on the Listing Date shall exclude the

Investor Shares to the extent that the Delivery Date for such Investor Shares is subsequent to the Listing Date.

- 3.5 For the purpose of this Agreement, “**Delivery Date**” means, subject to the underwriting agreement for the Hong Kong Public Offering and the underwriting agreement for the International Offering being entered into and having become effective and unconditional and not having been terminated, on or before 8.00 a.m. on the Listing Date (currently expected to be no later than 13 March 2008) unless the Joint Global Coordinators notify the Investor that the Investor Shares will be delivered on the Delayed Delivery Date in accordance with Clause 3.1 the day on which the Investor Shares are delivered to the Investor or the Investor Subsidiary.
- 3.6 For the purpose of this Agreement, “**Delayed Delivery Date**” means such time and date as the Joint Global Coordinators may notify the Investor by not less than two days’ prior written notice pursuant to Clause 3.1, which shall be a Hong Kong banking day later than the Delivery Date but no later than two Hong Kong banking days following the 30th day after the date expected to be the latest date for lodging applications under the Hong Kong Public Offering, at which time and date the Investor Shares shall be delivered to the Investor or the Investor Subsidiary, as the case may be.
- 3.7 If the Delivery Date is not later than the Listing Date, the Company will then issue the Investor Shares to the Investor or the Investor Subsidiary, as the case may be, on the Listing Date. If the delivery of the Investor Shares shall take place on the Delayed Delivery Date, the Joint Global Coordinators will procure the issue or delivery of the Investor Shares to the Investor by exercising the Over-allotment Option (as defined in the Hong Kong prospectus for the Global Offering) or otherwise acquiring sufficient number of shares from the secondary market to deliver the Investor Shares.
- 3.8 As an alternative to the deferred delivery arrangements referred to in Clauses 3.1 to 3.7 upon request of the Joint Global Coordinators, the Investor undertakes to negotiate in good faith with the stabilising manager appointed by the Joint Global Coordinators in connection with the Global Offering (the “**Stabilising Manager**”) with a view to agreeing the provisions of a stock borrowing agreement on terms reasonably acceptable to both parties, under which the Investor shall agree to lend to the Stabilising Manager such number of the Investor Shares at the Stabilising Manager’s option as is equal to or not exceeding the number of the Investor Shares.

(CITIC, CGM and MSL are collectively known as the “**Joint Global Coordinators**”).

WHEREAS:

- (A) The Company is applying for a listing for its overseas listed foreign invested shares (“**H Shares**”) on the Main Board of The Stock Exchange of Hong Kong Limited (the “**Hong Kong Stock Exchange**”) by way of a global offering (the “**Global Offering**”) of its H Shares comprising:
 - (i) a public offer by the Company of its H Shares for subscription in Hong Kong (the “**Hong Kong Public Offering**”); and
 - (ii) private placements by the Company of H Shares outside the United States, in offshore transactions to “non-U.S. persons” in reliance on Regulation S (“**Regulation S**”) under the US Securities Act of 1933, as amended (the “**Securities Act**”) and in the United States to qualified institutional buyers, as defined in Rule 144A of the Securities Act or other available exemption from registration under the US Securities Act (collectively, the “**International Offering**”).
- (B) The Investor wishes to make an equity investment in the Company as part of the International Offering on the terms and conditions set out in this Agreement.

IT IS AGREED as follows:

1. INVESTMENT

- 1.1 Subject to the conditions specified in this Agreement, the Investor will acquire the Investor Shares (as defined in Clause 1.4) at the IPO Price (as defined in Clause 1.4) under and as part of the International Offering through the Joint Global Coordinators or their affiliates in their capacity as underwriters of the relevant portion of the International Offering, and each of the Company and the Joint Global Coordinators agrees that the Investor shall be issued the Investor Shares at the IPO Price on the Delivery Date, or where applicable, pursuant to Clause 3.1, the Delayed Delivery Date.
- 1.2 The Investor may elect by notice in writing served to the Joint Global Coordinators not later than two Hong Kong banking days (as defined in Clause 1.4) prior to the Delivery Date to acquire the Investor Shares through a wholly-owned subsidiary of the Investor that is a "professional investor" as defined in Part I of Schedule 1 to the Securities and Futures Ordinance of Hong Kong and is not a U.S. person as defined in Rule 902 of Regulation S under the Securities Act (the "**Investor Subsidiary**"), in which case the agreements, representations, undertakings, acknowledgements and confirmations given in this Agreement shall be deemed to be given by the Investor for itself and on behalf of the Investor Subsidiary.
- 1.3 The number of Investor Shares to be acquired by the Investor under this Agreement will not be affected by any re-allocation of H Shares between the International Offering and the Hong Kong Public Offering in the event of over-subscription under the Hong Kong Public Offering nor by any exercise of the over-allotment option to be granted by the Company to the Joint Global Coordinators on behalf of the international underwriters for the Global Offering.
- 1.4 For the purposes of this Agreement, the "**Investor Shares**" means such number of H Shares offered by the Company to the Investor or the Investor Subsidiary in the International Offering equal to the maximum number of H Shares that may be purchased with US\$50 million (or its Hong Kong dollars equivalent based on the closing middle point spot rate quoted by The Hongkong and Shanghai Banking Corporation Limited for United States dollars at the close of business in Hong Kong on the date on which the IPO Price is determined) ("**Investment Amount**") at the IPO Price, rounded down to the nearest board lot; the "**IPO Price**" means the price per H Share at which the H Shares are acquired by investors under the International Offering, expressed in Hong Kong dollars (exclusive of Brokerage and Levies, as defined in Clause 3.1), and determined as referred to in Clause 5.1; and "**Hong Kong banking day**" means any day except a Saturday, Sunday or other day on which commercial banks in Hong Kong are generally open to the public in Hong Kong. Both the IPO Price and the number of Investor Shares shall be determined by the Joint Global Coordinators and the Company pursuant to this Agreement, and such determination shall be conclusive in the absence of manifest error.

2. AGREEMENT CONDITIONAL UPON COMPLETION OF GLOBAL OFFERING

- 2.1 The Investor's agreement in Clause 1 above (and the right of the Investor to acquire the Investor Shares) is conditional upon the underwriting agreements for each of the Hong Kong Public Offering and the International Offering being entered into by, inter alia, the Company and the Joint Global Coordinators and having become effective and unconditional and not having been terminated (in accordance with their respective original terms or as subsequently varied by agreement of the relevant parties). There can be no guarantee that the Global Offering will be completed or not be terminated, and no liability of the Company and/or the Joint Global Coordinators to the Investor or the Investor Subsidiary, as the case may be, will arise if the Global Offering is not duly completed for any reason by the dates and times contemplated or at all.

3. CLOSING

- 3.1 Subject to Clause 2 and Clause 3.2, the Investor shall pay the aggregate of the IPO Price for the Investor Shares, together with an amount equal to the aggregate of (i) a brokerage fee of 1%, (ii) the Hong Kong Stock Exchange trading fee of 0.005%, and (iii) the SFC transaction levy of 0.004%, in each case calculated by reference to the aggregate IPO Price for all Investor Shares ("**Brokerage and Levies**"), by same day value credit in clear funds and without deduction or set-off whatsoever (to such Hong Kong dollar bank account as may be notified to the Investor by the Joint Global Coordinators in writing no later than two Hong Kong banking days prior to the due date for payment) on the Delivery Date (as defined in Clause 3.5) to the Joint Global Coordinators, and delivery of the Investor Shares to the Investor or the Investor Subsidiary, as the case may be, shall be made through the Hong Kong Central Clearing and Settlement System for the account of the Investor or the Investor Subsidiary, as the case may be, not later than 9.30 a.m. (or such other time as notified by the Joint Global Coordinators) on the Delivery Date or, to the extent the Joint Global Coordinators notify the Investor in writing no later than two Hong Kong banking days prior to the Delivery Date that they will defer delivery of the Investor Shares, on the Delayed Delivery Date.
- 3.2 Delivery of the Investor Shares may also be made in any other manner which the Company, the Joint Global Coordinators and the Investor may otherwise agree to in writing.
- 3.3 Delivery Date for the Investor Shares is currently expected to be not later than the date on which the H Shares are first listed on the Hong Kong Stock Exchange (the "**Listing Date**"). The Joint Global Coordinators shall promptly notify the Investor of any delay in the Delivery Date.
- 3.4 For the avoidance of doubt, the proceeds from the sale of the H Shares comprised in the Global Offering to be received by the Company on the Listing Date shall exclude the Investor Shares to the extent that the Delivery Date for such Investor Shares is subsequent to the Listing Date.
- 3.5 For the purpose of this Agreement, "**Delivery Date**" means, subject to the underwriting

agreement for the Hong Kong Public Offering and the underwriting agreement for the International Offering being entered into and having become effective and unconditional and not having been terminated, on or before 8.00 a.m. on the Listing Date (currently expected to be no later than the Listing Date) unless the Joint Global Coordinators notify the Investor that the Investor Shares will be delivered on the Delayed Delivery Date in accordance with Clause 3.1 the day on which the Investor Shares are delivered to the Investor or the Investor Subsidiary.

- 3.6 For the purpose of this Agreement, “**Delayed Delivery Date**” means such time and date as the Joint Global Coordinators may notify the Investor by not less than two days’ prior written notice pursuant to Clause 3.1, which shall be a Hong Kong banking day later than the Delivery Date but no later than two Hong Kong banking days following the 30th day after the date expected to be the latest date for lodging applications under the Hong Kong Public Offering, at which time and date the Investor Shares shall be delivered to the Investor or the Investor Subsidiary, as the case may be.
- 3.7 If the Delivery Date is currently expected to be not later than the Listing Date and the Company will then issue the Investor Shares to the Investor or the Investor Subsidiary, as the case may be. If the delivery of the Investor Shares shall take place on the Delayed Delivery Date, the Joint Global Coordinators will procure the issue or delivery of the Investor Shares to the Investor by exercising the Over-allotment Option (as defined in the Hong Kong prospectus for the Global Offering) or otherwise acquiring sufficient number of shares from the secondary market to deliver the Investor Shares.
- 3.8 As an alternative to the deferred delivery arrangements referred to in Clauses 3.1 to 3.7 upon request of the Joint Global Coordinators, the Investor undertakes to negotiate in good faith with the stabilising manager appointed by the Joint Global Coordinators in connection with the Global Offering (the “**Stabilising Manager**”) with a view to agreeing the provisions of a stock borrowing agreement on terms reasonably acceptable to both parties, under which the Investor shall agree to lend to the Stabilising Manager such number of the Investor Shares at the Stabilising Manager’s option as is equal to or not exceeding the number of the Investor Shares.

4. RESTRICTIONS ON DISPOSAL BY THE INVESTOR

- 4.1 The Investor (for itself and on behalf of the Investor Subsidiary) covenants with and undertakes to each of the Company and the Joint Global Coordinators that:-

There can be no guarantee that the Global Offering will be completed or not be terminated, and no liability of the Company and/or the Joint Global Coordinators to the Investor or the Investor Subsidiary, as the case may be, will arise if the Global Offering is not duly completed for any reason by the dates and times contemplated or at all.

- 3.8 As an alternative to the deferred delivery arrangements referred to in Clauses 3.1 to 3.7 upon request of the Joint Global Coordinators, the Investor undertakes to negotiate in good faith with the stabilising manager appointed by the Joint Global Coordinators in connection with the Global Offering (the “**Stabilising Manager**”) with a view to agreeing the provisions of a stock borrowing agreement on terms reasonably acceptable to both parties, under which the Investor shall agree to lend to the Stabilising Manager such number of the Investor Shares at the Stabilising Manager’s option as is equal to or not exceeding the number of the Investor Shares.

- (B) The Investor wishes to make an equity investment in the Company as part of the International Offering on the terms and conditions set out in this Agreement.

IT IS AGREED as follows:

1. INVESTMENT

- 1.1 Subject to the conditions specified in this Agreement, the Investor will acquire the Investor Shares (as defined in Clause 1.4) at the IPO Price (as defined in Clause 1.4) under and as part of the International Offering through the Joint Global Coordinators or their affiliates in their capacity as underwriters of the relevant portion of the International Offering, and each of the Company and the Joint Global Coordinators agrees that the Investor shall be issued the Investor Shares at the IPO Price on the Delivery Date, or where applicable, pursuant to Clause 3.1, the Delayed Delivery Date.
- 1.2 The Investor may elect by notice in writing served to the Joint Global Coordinators not later than two Hong Kong banking days (as defined in Clause 1.4) prior to the Delivery Date to acquire the Investor Shares through a wholly-owned subsidiary of the Investor that is a “professional investor” as defined in Part I of Schedule 1 to the Securities and Futures Ordinance of Hong Kong and is not a U.S. person as defined in Rule 902 of Regulation S under the Securities Act (the “**Investor Subsidiary**”), in which case the agreements, representations, undertakings, acknowledgements and confirmations given in this Agreement shall be deemed to be given by the Investor for itself and on behalf of the Investor Subsidiary.
- 1.3 The number of Investor Shares to be acquired by the Investor under this Agreement will not be affected by any re-allocation of H Shares between the International Offering and the Hong Kong Public Offering in the event of over-subscription under the Hong Kong Public Offering nor by any exercise of the over-allotment option to be granted by the Company to the Joint Global Coordinators on behalf of the international underwriters for the Global Offering.
- 1.4 For the purposes of this Agreement, the “**Investor Shares**” means such number of H Shares offered by the Company to the Investor or the Investor Subsidiary in the International Offering equal to the maximum number of H Shares that may be purchased with US\$50 million (or its Hong Kong dollars equivalent based on the closing middle point spot rate quoted by The Hongkong and Shanghai Banking Corporation Limited for United States dollars at the close of business in Hong Kong on the date on which the IPO Price is determined) (“**Investment Amount**”) at the IPO Price, rounded down to the nearest board lot; the “**IPO Price**” means the price per H Share at which the H Shares are acquired by investors under the International Offering, expressed in Hong Kong dollars (exclusive of Brokerage and Levies, as defined in Clause 3.1), and determined as referred to in Clause 5.1; and “**Hong Kong banking day**” means any day except a Saturday, Sunday or other day on which commercial banks in Hong Kong are generally open to the public in Hong Kong. Both the IPO Price and the number of Investor Shares shall be determined by the Joint Global Coordinators

and the Company pursuant to this Agreement, and such determination shall be conclusive in the absence of manifest error.

2. AGREEMENT CONDITIONAL UPON COMPLETION OF GLOBAL OFFERING

- 2.1 The Investor's agreement in Clause 1 above (and the right of the Investor to acquire the Investor Shares) is conditional upon the underwriting agreements for each of the Hong Kong Public Offering and the International Offering being entered into by, inter alia, the Company and the Joint Global Coordinators and having become effective and unconditional and not having been terminated (in accordance with their respective original terms or as subsequently varied by agreement of the relevant parties). There can be no guarantee that the Global Offering will be completed or not be terminated, and no liability of the Company and/or the Joint Global Coordinators to the Investor or the Investor Subsidiary, as the case may be, will arise if the Global Offering is not duly completed for any reason by the dates and times contemplated or at all.

3. CLOSING

- 3.1 Subject to Clause 2 and Clause 3.2, the Investor shall pay the aggregate of the IPO Price for the Investor Shares, together with an amount equal to the aggregate of (i) a brokerage fee of 1%, (ii) the Hong Kong Stock Exchange trading fee of 0.005%, and (iii) the SFC transaction levy of 0.004%, in each case calculated by reference to the aggregate IPO Price for all Investor Shares ("**Brokerage and Levies**"), by same day value credit in clear funds and without deduction or set-off whatsoever (to such Hong Kong dollar bank account as may be notified to the Investor by the Joint Global Coordinators in writing no later than two Hong Kong banking days prior to the due date for payment) on the Delivery Date (as defined in Clause 3.5) to the Joint Global Coordinators, and delivery of the Investor Shares to the Investor or the Investor Subsidiary, as the case may be, shall be made through the Hong Kong Central Clearing and Settlement System for the account of the Investor or the Investor Subsidiary, as the case may be, not later than 9:30 a.m. (or such other time as notified by the Joint Global Coordinators) on the Delivery Date or, to the extent the Joint Global Coordinators notify the Investor in writing no later than two Hong Kong banking days prior to the Delivery Date that they will defer delivery of the Investor Shares, on the Delayed Delivery Date.
- 3.2 Delivery of the Investor Shares may also be made in any other manner which the Company, the Joint Global Coordinators and the Investor may otherwise agree to in writing.
- 3.3 Delivery Date for the Investor Shares is currently expected to be not later than the date on which the H Shares are first listed on the Hong Kong Stock Exchange (the "**Listing Date**"), which is currently expected to be on or before 13 March 2008. The Joint Global Coordinators shall promptly notify the Investor of any delay in the Delivery Date.
- 3.4 For the avoidance of doubt, the proceeds from the sale of the H Shares comprised in the Global Offering to be received by the Company on the Listing Date shall exclude the Investor Shares to the extent that the Delivery Date for such Investor Shares is

- subsequent to the Listing Date.
- 3.5 For the purpose of this Agreement, “**Delivery Date**” means, subject to the underwriting agreement for the Hong Kong Public Offering and the underwriting agreement for the International Offering being entered into and having become effective and unconditional and not having been terminated, on or before 8.00 a.m. on the Listing Date (currently expected to be no later than the Listing Date) unless the Joint Global Coordinators notify the Investor that the Investor Shares will be delivered on the Delayed Delivery Date in accordance with Clause 3.1 the day on which the Investor Shares are delivered to the Investor or the Investor Subsidiary.
- 3.6 For the purpose of this Agreement, “**Delayed Delivery Date**” means such time and date as the Joint Global Coordinators may notify the Investor by not less than two days’ prior written notice pursuant to Clause 3.1, which shall be a Hong Kong banking day later than the Delivery Date but no later than two Hong Kong banking days following the 30th day after the date expected to be the latest date for lodging applications under the Hong Kong Public Offering, at which time and date the Investor Shares shall be delivered to the Investor or the Investor Subsidiary, as the case may be.
- 3.7 If the Delivery Date is currently expected to be not later than the Listing Date and the Company will then issue the Investor Shares to the Investor or the Investor Subsidiary, as the case may be. If the delivery of the Investor Shares shall take place on the Delayed Delivery Date, the Joint Global Coordinators will procure the issue or delivery of the Investor Shares to the Investor by exercising the Over-allotment Option (as defined in the Hong Kong prospectus for the Global Offering) or otherwise acquiring sufficient number of shares from the secondary market to deliver the Investor Shares.
- 3.8 As an alternative to the deferred delivery arrangements referred to in Clauses 3.1 to 3.7 upon request of the Joint Global Coordinators, the Investor undertakes to negotiate in good faith with the stabilising manager appointed by the Joint Global Coordinators in connection with the Global Offering (the “**Stabilising Manager**”) with a view to agreeing the provisions of a stock borrowing agreement on terms reasonably acceptable to both parties, under which the Investor shall agree to lend to the Stabilising Manager such number of the Investor Shares at the Stabilising Manager’s option as is equal to or not exceeding the number of the Investor Shares.

- 3.7 If the Delivery Date is currently expected to be not later than the Listing Date and the Company will then issue the Investor Shares to the Investor. If the delivery of the Investor Shares shall take place on the Delayed Delivery Date, the Joint Global Coordinators will procure the issue or delivery of the Investor Shares to the Investor by exercising the Over-allotment Option (as defined in the Hong Kong prospectus for the Global Offering) or otherwise acquiring sufficient number of shares from the secondary market to deliver the Investor Shares.

1. INVESTMENT

- 1.1 Subject to the conditions specified in this Agreement, the Investor will acquire the Investor Shares (as defined in Clause 1.4) at the IPO Price (as defined in Clause 1.4) under and as part of the International Offering through the Joint Global Coordinators or their affiliates in their capacity as underwriters of the relevant portion of the International Offering, and each of the Company and the Joint Global Coordinators agrees that the Investor shall be issued the Investor Shares at the IPO Price on the Delivery Date, or where applicable, pursuant to Clause 3.1, the Delayed Delivery Date.
- 1.2 The Investor may elect by notice in writing served to the Joint Global Coordinators not later than two Hong Kong banking days (as defined in Clause 1.4) prior to the Delivery Date to acquire the Investor Shares through a wholly-owned subsidiary of the Investor that is a “professional investor” as defined in Part I of Schedule 1 to the Securities and Futures Ordinance of Hong Kong and is not a U.S. person as defined in Rule 902 of Regulation S under the Securities Act (the “Investor Subsidiary”), in which case the agreements, representations, undertakings, acknowledgements and confirmations given in this Agreement shall be deemed to be given by the Investor for itself and on behalf of the Investor Subsidiary.
- 1.3 The number of Investor Shares to be acquired by the Investor under this Agreement will not be affected by any re-allocation of H Shares between the International Offering and the Hong Kong Public Offering in the event of over-subscription under the Hong Kong Public Offering nor by any exercise of the over-allotment option to be granted by the Company to the Joint Global Coordinators on behalf of the international underwriters for the Global Offering.
- 1.4 For the purposes of this Agreement, the “Investor Shares” means such number of H Shares offered by the Company to the Investor or the Investor Subsidiary in the International Offering equal to the maximum number of H Shares that may be purchased with US\$50 million (or its Hong Kong dollars equivalent based on the closing middle point spot rate quoted by The Hongkong and Shanghai Banking Corporation Limited for United States dollars at the close of business in Hong Kong on the date on which the IPO Price is determined) (“Investment Amount”) at the IPO Price, rounded down to the nearest board lot; the “IPO Price” means the price per H Share at which the H Shares are acquired by investors under the International Offering, expressed in Hong Kong dollars (exclusive of Brokerage and Levies, as defined in Clause 3.1), and determined as referred to in Clause 5.1; and “Hong Kong banking day” means any day except a Saturday, Sunday or other day on which commercial banks in Hong Kong are generally open to the public in Hong Kong. Both the IPO Price and the number of Investor Shares shall be determined by the Joint Global Coordinators and the Company pursuant to this Agreement, and such determination shall be conclusive in the absence of manifest error.

2. AGREEMENT CONDITIONAL UPON COMPLETION OF GLOBAL OFFERING

- 2.1 The Investor's agreement in Clause 1 above (and the right of the Investor to acquire the Investor Shares) is conditional upon the underwriting agreements for each of the Hong Kong Public Offering and the International Offering being entered into by, inter alia, the Company and the Joint Global Coordinators and having become effective and unconditional and not having been terminated (in accordance with their respective original terms or as subsequently varied by agreement of the relevant parties). There can be no guarantee that the Global Offering will be completed or not be terminated, and no liability of the Company and/or the Joint Global Coordinators to the Investor or the Investor Subsidiary, as the case may be, will arise if the Global Offering is not duly completed for any reason by the dates and times contemplated or at all.

3. CLOSING

- 3.1 Subject to Clause 2 and Clause 3.2, the Investor shall pay the aggregate of the IPO Price for the Investor Shares, together with an amount equal to the aggregate of (i) a brokerage fee of 1%, (ii) the Hong Kong Stock Exchange trading fee of 0.005%, and (iii) the SFC transaction levy of 0.004%, in each case calculated by reference to the aggregate IPO Price for all Investor Shares ("**Brokerage and Levies**"), by same day value credit in clear funds and without deduction or set-off whatsoever (to such Hong Kong dollar bank account as may be notified to the Investor by the Joint Global Coordinators in writing no later than two Hong Kong banking days prior to the due date for payment) on the Delivery Date (as defined in Clause 3.5) to the Joint Global Coordinators, and delivery of the Investor Shares to the Investor or the Investor Subsidiary, as the case may be, shall be made through the Hong Kong Central Clearing and Settlement System for the account of the Investor or the Investor Subsidiary, as the case may be, not later than 9:30 a.m. (or such other time as notified by the Joint Global Coordinators) on the Delivery Date or, to the extent the Joint Global Coordinators notify the Investor in writing no later than two Hong Kong banking days prior to the Delivery Date that they will defer delivery of the Investor Shares, on the Delayed Delivery Date.
- 3.2 Delivery of the Investor Shares may also be made in any other manner which the Company, the Joint Global Coordinators and the Investor may otherwise agree to in writing.
- 3.3 Delivery Date for the Investor Shares is currently expected to be not later than the date on which the H Shares are first listed on the Hong Kong Stock Exchange (the "**Listing Date**"). The Joint Global Coordinators shall promptly notify the Investor of any delay in the Delivery Date.
- 3.4 For the avoidance of doubt, the proceeds from the sale of the H Shares comprised in the Global Offering to be received by the Company on the Listing Date shall exclude the Investor Shares to the extent that the Delivery Date for such Investor Shares is subsequent to the Listing Date.
- 3.5 For the purpose of this Agreement, "**Delivery Date**" means, subject to the underwriting

agreement for the Hong Kong Public Offering and the underwriting agreement for the International Offering being entered into and having become effective and unconditional and not having been terminated, on or before 8.00 a.m. on the Listing Date (currently expected to be no later than the Listing Date) unless the Joint Global Coordinators notify the Investor that the Investor Shares will be delivered on the Delayed Delivery Date in accordance with Clause 3.1 the day on which the Investor Shares are delivered to the Investor or the Investor Subsidiary.

- 3.6 For the purpose of this Agreement, “**Delayed Delivery Date**” means such time and date as the Joint Global Coordinators may notify the Investor by not less than two days’ prior written notice pursuant to Clause 3.1, which shall be a Hong Kong banking day later than the Delivery Date but no later than two Hong Kong banking days following the 30th day after the date expected to be the latest date for lodging applications under the Hong Kong Public Offering, at which time and date the Investor Shares shall be delivered to the Investor or the Investor Subsidiary, as the case may be.
- 3.7 The Delivery Date is currently expected to be not later than the Listing Date and the Company will then issue the Investor Shares to the Investor or the Investor Subsidiary, as the case may be. If the delivery of the Investor Shares shall take place on the Delayed Delivery Date, the Joint Global Coordinators will procure the issue or delivery of the Investor Shares to the Investor by exercising the Over-allotment Option (as defined in the Hong Kong prospectus for the Global Offering) or otherwise acquiring sufficient number of shares from the secondary market to deliver the Investor Shares.

4. RESTRICTIONS ON DISPOSAL BY THE INVESTOR

 - (c) if any Investor Subsidiary holding the Relevant Shares is about to or will cease to be a wholly owned subsidiary of the Investor, the Investor shall procure that such entity transfers any such Relevant Shares to the Investor or another wholly owned subsidiary of the Investor before ceasing to be so wholly-owned by the Investor, which will also agree to be bound by the Investor's obligations under this Agreement and to give the same acknowledgments, representations and warranties under this Agreement.
- 4.3 The Investor agrees that, save with the prior written consent of the Company, the aggregate holding (direct and indirect) of the Investor and its associates (as defined in the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited ("**Listing Rules**")) in the total issued share capital of the Company shall be less than 10% of the Company's total issued share capital, insofar as the Investor has actual control of or its nominees form a majority on the board of directors of its associates, during the period of 24 months following the Listing Date.
- 4.4 For the purpose of this Clause 4, references to "**dispose of**" or "**disposal**" include in respect of any H Shares, offering, pledging, charging, selling, assigning, mortgaging, lending, creating, transferring or otherwise disposing of any legal or beneficial interest (including by the creation of or an agreement to create or selling or granting or agreeing to sell or grant any option or contract to purchase or any warrant or right to purchase) in the H Shares or any securities convertible into or exercisable or exchangeable for such H Shares, or contracting to do so, whether directly or indirectly, or entering into any swap or other arrangement that transfers to another, in whole or in part, any of the economic consequences or incidents of ownership of such H Shares or securities whether any of the foregoing transactions is to be settled by delivery of, for the purpose of this Agreement, H Shares or such other securities, cash or otherwise; and "**Relevant Shares**" means the Investor Shares and any shares or other securities of the Company deriving from the Investor Shares or any interest therein, including but not limited to any convertibles, equity-linked securities and derivatives with underlying assets being

3.8 Changes to Offer Price range and Initial Hong Kong Public Offer Shares: The Joint Global Coordinators on behalf of the Hong Kong Underwriters may, based on the level of interest expressed by prospective investors during the book-building process, and with the prior written consent of the Company, change the indicative Offer Price range or the number of Initial Hong Kong Public Offer Shares as stated in the Prospectus. In any such case, the Company shall, as soon as practicable following the decision to make such change and in any event not later than the morning of the Acceptance Date, cause to be published in the South China Morning Post and the Hong Kong Economic Times notices of the change in the indicative Offer Price range or the number of Initial Hong Kong Public Offer Shares, as the case may be.

3.9 Clawback: In the event that Valid Applications are received pursuant to the Hong Kong Public Offering in respect of (i) 10 times or more but less than 40 times or (ii) 40 times or more but less than 50 times or (iii) 50 times or more, of the aggregate number of the Initial Hong Kong Public Offer Shares, then the total number of Hong Kong Public Offer Shares available under the Hong Kong Public Offering will be increased to 255,900,000, 341,200,000 or 426,500,000 H Shares, respectively, representing approximately 15 per cent. (in the case of (i)) or 20 per cent. (in the case of (ii)) or 25 per cent. (in the case of (iii)) respectively, of the total number of H Shares initially available under the Global Offering (before any exercise of the Over-Allotment Option). In such case, the number of H Shares allocated in the International Offering shall be correspondingly reduced, in such manner as the Joint Global Coordinators deem appropriate, and such additional H Shares will be allocated to Pool A and Pool B (as described in the Prospectus) of the Hong Kong Public Offering for subscription at the Offer Price. The Corporate Placing Shares shall not be subject to any such reallocation. 3.13 The Hong Kong Underwriters shall be entitled to enter into sub-underwriting arrangements in respect of any part of their respective underwriting commitments so long as such sub-underwriters are permitted by the applicable law and regulations to discharge the duties conferred upon them by such sub-underwriting. All sub-underwriting commission shall be borne by the relevant Hong Kong Underwriter absolutely.

3.14 Any transaction carried out by the Hong Kong Underwriters within the scope of the appointments, powers, authorities and/or discretions granted in this Agreement shall constitute a transaction carried out at the request of the Company and as agents of the Company. The Hong Kong Underwriters shall not be responsible for any loss or damage to any persons arising from any such transaction (except for any loss or damage directly arising out of any gross negligence, fraud or wilful default of the terms of this Agreement on the part of the party concerned as finally and judicially determined by a competent court in Hong Kong).

PARTIAL EXERCISE OF OVER-ALLOTMENT OPTION

The Company announces that the Over-Allotment Option described in the Prospectus has been exercised in part by the Joint Global Coordinators on behalf of the International Underwriters on 31 March, 2008 in respect of an aggregate of 181,541,500 H shares, representing approximately 10.6% of the Offer Shares initially available under the Global Offering before any exercise of the Over-allotment Option solely to cover the over-allocations in the International Offering.

The 181,541,500 H shares will be issued and allotted by the Company at HK\$10.70 per H share (exclusive of brokerage of 1%, SFC transaction levy of 0.004% and Hong Kong Stock Exchange trading fee of 0.005%), being the Offer Price per H share under the Global Offering.

In accordance with relevant PRC regulations regarding disposal of state-owned shares, our state-owned shareholder, namely CRCCG, is required to transfer to NSSF such number of Domestic Shares as in aggregate would be equivalent to 10% of the number of the Offer Shares (170,600,000 H Shares before any exercise of the Over-allotment Option, and an additional 18,154,500 H Shares upon the exercise in part of the Over-allotment Option). Such Domestic Shares transferred to NSSF will be converted into H shares on a one-for-one basis.

The Company announces that the Over-allotment Option described in the Prospectus has been exercised in part by the Joint Global Coordinators on behalf of the International Underwriters on 31 March, 2008 in respect of an aggregate of 181,541,500 H shares (the “Over-allotment Shares”), representing 10.6% of the Offer Shares initially available under the Global Offering before any exercise of the Over-Allotment Option.

The Over-allotment Shares will be issued and allotted by the Company at HK\$10.70 per H share (exclusive of brokerage of 1%, SFC transaction levy of 0.004% and Hong Kong Stock Exchange trading fee of 0.005%), being the Offer Price per H share under the Global Offering. The Over-allotment Shares will be used solely to cover the over-allocations in the International Offering.

In accordance with relevant PRC regulations regarding disposal of state-owned shares, our state-owned shareholder, namely CRCCG, is required to transfer to NSSF such number of Domestic Shares as in aggregate would be equivalent to 10% of the number of the Offer Shares (170,600,000 H Shares before the exercise of the Over-allotment Option, and an additional 18,154,500 H Shares upon the exercise in part of the Over-allotment Option). Such Domestic Shares will be converted into H shares on a one-for-one basis (the “Conversion”). These H Shares will not be part of the Global Offering but will be considered as part of the H Shares to be held by public investors for the purpose of Rule 8.08 of the Hong Kong Listing Rules. The Company will not receive any proceeds from the transfer by our state-owned shareholder to NSSF or any subsequent disposal of such H shares by NSSF.

The transfer of such state-owned shares by CRCCG to NSSF has been approved by the SASAC on 6 December, 2007. The conversion of those shares into H Shares has been approved by the CSRC on 24 January, 2008. We have been advised that the transfer and the conversion, and the holding of H Shares by NSSF following such transfer and conversion, have been approved by the relevant PRC authorities and are legal under PRC law.

Immediately after the issuance and allotment of the Over-allotment Shares and the completion of the Conversion, the percentage of A Shares held by the public is 19.86% and the percentage of H Shares held by the public is 16.83%.

Listing of and permission to deal in the Over-allotment Shares and the H Shares to be held by the NSSF upon the completion of the Conversion (the "Converted H Shares") has already been granted by the Listing Committee of the Hong Kong Stock Exchange. Listing of and dealings in such Over-allotment Shares and the Converted H Shares are expected to commence on the main board of the Hong Kong Stock Exchange at 9:30 a.m. on 8 April, 2008.

Dear Sirs,

We set out below our report on the financial information regarding China Railway Construction Corporation Limited (the "Company") and its subsidiaries (hereinafter collectively referred to as the "Group") for each of the three years ended 31 December 2004, 2005 and 2006, and the eleven-month period ended 30 November 2007 (the "Relevant Periods") (the "Financial Information"), and the eleven-month period ended 30 November 2006 (the "30 November 2006 Financial Information"), prepared on the basis set out in note 2 of Section II below, for inclusion in the Prospectus of the Company dated 29 February 2008 (the "Prospectus") in connection with the listing of the shares of the Company on the Main Board of The Stock Exchange of Hong Kong Limited ("The Hong Kong Stock Exchange").

The Company was incorporated on 5 November 2007 in Beijing, the People's Republic of China (the "PRC" or "Mainland China", which excludes for the purpose of this report, the Hong Kong Special Administrative Region of the PRC or Hong Kong, the Macau Special Administrative Region of the PRC or Macau, and Taiwan), as a joint stock company with limited liability under the Company Law of the PRC. Pursuant to a group restructuring (the "Restructuring") of China Railway Construction Corporation ("CRCCG"), a state-owned enterprise in the PRC, the Company became the holding company of the Group. Details of the Restructuring are set out in note 1 of Section II below.

The Group, its jointly-controlled entities and associates have adopted 31 December as their financial year end date for statutory reporting purposes. The financial statements of these companies were prepared in accordance with the relevant accounting principles and financial regulations applicable to PRC enterprises (the "Previous PRC GAAP") or other accounting principles applicable to these companies in their respective jurisdictions. Particulars of the Company and its principal subsidiaries, jointly-controlled entities and associates are set out in note 1 of Section II below.

The statutory consolidated financial statements of CRCCG and its subsidiaries for each of the three years ended 31 December 2004, 2005 and 2006 were prepared in accordance with the Previous PRC GAAP

and were audited by China Audit Certified Public Accountants Limited (“中審會計師事務所有限公司”), a certified public accounting firm registered in the PRC.

For the purpose of the Restructuring, the directors of the Company (the “Directors”) have prepared the consolidated financial statements of the Group for the Relevant Periods and the financial statements of the Company for the period from 5 November 2007 (date of incorporation of the Company) to 30 November 2007 in accordance with the Accounting Standards for Business Enterprises issued by the Ministry of Finance (the “MOF”) of the PRC in 2006, and other related regulations issued by the MOF (collectively the “New PRC GAAP”), which were audited by Ernst & Young Hua Ming (“安永華明會計師事務所”), a certified public accounting firm registered in the PRC.

The Group prepared the Financial Information which includes the consolidated income statements, consolidated statements of changes in equity and consolidated cash flow statements of the Group for the Relevant Periods, the consolidated balance sheets of the Group as at 31 December 2004, 2005 and 2006 and 30 November 2007 and the balance sheet of the Company as at 30 November 2007, together with the notes thereto, in accordance with the International Financial Reporting Standards (“IFRSs”) promulgated by the International Accounting Standards Board (“IASB”) which were audited by us in accordance with International Standards on Auditing issued by the International Auditing and Assurance Standards Board (the “IAASB”). The Financial Information has been prepared from the audited consolidated financial statements of the Group and the financial statements of the Company prepared in accordance with IFRSs for the Relevant Periods (the “IFRS Financial Statements”).

For the purpose of this report, we have carried out an independent audit on the Financial Information in accordance with International Standards on Auditing issued by the IAASB and have examined the Financial Information and carried out such additional procedures as we considered necessary in accordance with the Auditing Guideline 3.340 “Prospectuses and the Reporting Accountant” issued by the Hong Kong Institute of Certified Public Accountants. No adjustments were considered necessary to adjust the IFRS Financial Statements to conform to the accounting policies referred to in note 3.2 of Section II of this report for the Relevant Periods.

The IFRS Financial Statements are the responsibility of the Directors who approved their issuance. The Directors are also responsible for the contents of the Prospectus, including the preparation and the true and fair presentation of the Financial Information in accordance with IFRSs. It is our responsibility to form an independent opinion and a review conclusion based on our audit of the Financial Information for the Relevant Periods and our review on the 30 November 2006 Financial Information, respectively, and to report our opinion and review conclusion, respectively, thereon.

Our responsibility is to express an opinion on the Financial Information based on our audit. We conducted our audit in accordance with International Standards on Auditing. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance as to whether the Financial Information are free from material misstatement.

Procedures Performed in Respect of the Relevant Periods

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditors’ judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditors consider internal control relevant to the entity’s preparation and true and

fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the directors, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Procedures Performed in Respect of the 30 November 2006 Financial Information

The comparative consolidated income statement, consolidated cash flow statement and consolidated statement of changes in equity of the Group for the eleven-month period ended 30 November 2006 together with the notes thereto have been extracted from the Group's interim financial information for the same period which was prepared by the Directors solely for the purpose of this report. We conducted our review in accordance with International Standard on Review Engagements 2410 "Review of Interim Financial Information Performed by the Independent Auditor of the Entity" issued by the IAASB. A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Opinion in Respect of the Relevant Periods

In our opinion, the Financial Information gives, for the purpose of this report, a true and fair view of the consolidated operating results and cash flows of the Group for each of the Relevant Periods and of the state of affairs of the Group as at 31 December 2004, 2005 and 2006, and 30 November 2007, and of the Company as at 30 November 2007 in accordance with IFRSs.

Review Conclusion in Respect of the 30 November 2006 Financial Information

Based on our review which does not constitute an audit, for the purpose of this report, nothing has come to our attention that causes us to believe that the 30 November 2006 Financial Information does not give a true and fair view of the consolidated operating results and cash flows of the Group for the eleven-month period ended 30 November 2006 in accordance with IFRSs.

Notes:

- (a) According to the financial statements prepared in accordance with the IFRSs, certain subsidiaries of the Company had deficiency in net asset positions as at 1 January 2004, 31 December 2004 and 31 December 2005 and as such, the equity of these subsidiaries attributable to minority interests was reduced to zero. However, according to their statutory financial statements prepared in accordance with the Previous PRC GAAP, the aforesaid subsidiaries had positive net asset positions as at 1 January 2004, 31 December 2004 and 31 December 2005 and based on their statutory financial statements, they had paid dividends to their respective shareholders, including minority shareholders, in early 2004, 2005 and 2006. For the presentation of this report, the aforesaid dividends paid to minority shareholders in early 2004, 2005 and 2006 have been accounted for as transactions between the equity holder of the Company and the minority shareholders of the aforesaid subsidiaries.
- (b) The minority interests in certain subsidiaries were held by employees through Employees Share Ownership Committees. During the eleven-month period ended 30 November 2007, the Group entered into purchase agreements and supplementary purchase agreements with the respective Employees Share Ownership Committees to acquire the minority interests. Based on the purchase agreements and supplementary purchase agreements, it was agreed that the minority interests and the associated risks and rewards, including the profits/(losses) generated by the subsidiaries, would be transferred to the Group with effect from 31 December 2006. The acquisition of minority interests is accounted for using the entity concept method whereby the difference between the consideration paid and the book value of the share of the net assets acquired is recorded in equity. The acquisition was completed during the eleven-month period ended 30 November 2007.
- (c) As further described in note 2 of Section II below, the consolidated income statements, consolidated balance sheets and consolidated cash flow statements of the Group have been prepared as if the Group had been in existence throughout the Relevant Periods. Upon the incorporation of the Company on 5 November 2007, together with certain prepaid land lease payments described in note (e) below, the historical net carrying amount of the assets and liabilities transferred to the Company was converted into the Company's share capital of RMB8,000 million, equivalent to 8,000 million shares of RMB1.00 each, with all the then existing reserves eliminated and the resulting difference dealt with in the capital reserve. Accordingly, the capital reserve, being the difference between the amount of share capital issued and the historical net carrying amount of the assets and liabilities, together with certain prepaid land lease payments described in note (e) below, transferred to the Company upon incorporation, were presented in the reserves of the Group. Separate classes of reserves, including retained profits prior to the incorporation of the Company, were not separately disclosed as all of these reserves (save for the amounts as disclosed in note (d) below) had been capitalised and incorporated in the capital reserve of the Group pursuant to the Restructuring.

(C) Consolidated Statements of Changes in Equity (continued)

- (d) In accordance with the notice (財政部關於印發《企業公司制改建有關國有資本管理與財務處理的暫行規定》的通知) "Provisional Regulation Relating to Corporate Restructuring of Enterprises and Related Management of State-owned Capital and Financial Treatment" issued by the MOF (the English name of the notice is a direct translation of the Chinese name), which became effective from 27 August 2002, and pursuant to the Restructuring, after the Company's incorporation, the Company is required to make a distribution to CRCCG, which represents an amount equal to the net profit attributable to the equity holder of the Company, as determined based on the audited consolidated financial statements prepared in accordance with the New PRC GAAP, generated during the period from 31 December 2006 (date of the Restructuring) to 30 November 2007 by the businesses and operations contributed to the Group by CRCCG (see note 13 of Section II below), after giving effect to relevant necessary adjustments.
- (e) Upon incorporation of the Company, CRCCG effected the injection of certain prepaid land lease payments in an aggregate amount of approximately RMB3,075 million to the Company which forms part of the Company's paid-up capital of RMB8,000 million.
- (f) Subsequent to the public listing of the Company's H Shares, in accordance with the relevant PRC regulations and the Articles of Association of the Company, retained profits available for distribution by the Company will be the lower of the amount determined in accordance with the New PRC GAAP and the amount determined in accordance with IFRSs.

The English names of certain companies above represent the best efforts by the management of the Company in directly translating the Chinese names of these companies as no English names have been registered.

The above table lists the subsidiaries, jointly-controlled entities and associates of the Group which, in the opinion of the Directors, principally affected the results for the Relevant Periods or formed a substantial portion of the net assets of the Group as at 30 November 2007. To give details of other subsidiaries, jointly-controlled entities and associates would, in the opinion of the Directors, result in particulars of excessive length.

Except for HK ACE Joint Venture, which is an unincorporated joint venture, all the above companies are limited liability companies.

2. BASIS OF PRESENTATION AND PREPARATION

- (a) As discussed in note 1 of Section II above, prior to the incorporation of the Company, all the Core Operations were controlled and owned by CRCCG. Upon the incorporation of the Company on 5 November 2007, all the Core Operations were transferred to the Company. As there is no change in the ultimate controlling shareholder of the Core Operations, the Restructuring has been accounted for as a combination of business under common control in a

manner similar to a pooling-of-interests. As a result, the accompanying consolidated balance sheets have been prepared to present the Group's assets and liabilities as if the Restructuring had been completed as at the beginning of the Relevant Periods. The accompanying consolidated income statements and consolidated cash flow statements include the Group's results of operations and cash flows as if the Core Operations had been transferred to the Group at the beginning of the Relevant Periods.

The Financial Information includes the operating results and financial position of the Retained Operations that were historically associated with the Predecessor Operations (see (b) below) but excludes those that were not strategically complementary to the Group's businesses (see (c) below) and those of the project companies of the Retained BOT Projects (see (d) below). Although the Retained Operations were not transferred to the Company, those associated with the Predecessor Operations have been included in the Financial Information according to the details set out in the agreement for the Restructuring entered into by the Company with CRCCG (the "Restructuring Agreement") because the Directors considered that the historical financial information should reflect all of the Group's costs of doing businesses, and include all relevant activities that have been part of the history of the Group's businesses and operations.

In evaluating whether the Financial Information prior to the Restructuring fairly presents the history of the Group's businesses, the Directors considered, among others, the following:

- (i) whether the Retained Operations were in dissimilar businesses;
 - (ii) whether the Retained Operations were and would be operated autonomously both before and after the Restructuring; and
 - (iii) whether the Retained Operations had no more than incidental common facilities and costs.
- (b) Certain operating assets and liabilities historically associated with the Predecessor Operations include certain buildings and prepaid land lease payments that do not have perfected titles and ownership certificates and supplementary defined benefits of retirees which were integral to the Predecessor Operations before the Restructuring. The tables below reflect the impact on the consolidated financial position and consolidated results of operations of these operating assets and liabilities that have been included in the consolidated financial statements:

- (i) Impact on consolidated financial position

Pursuant to the Restructuring, these operating assets and liabilities historically associated with the Predecessor Operations as mentioned above were retained by CRCCG by way of distributions to CRCCG. These operating assets and liabilities were not injected into the Company upon the incorporation of the Company on 5 November 2007.

- (c) The financial information of equity interests in certain companies not strategically complementary to the Group's businesses and ancillary facilities, including hospitals and nurseries, has not been included in the Financial Information throughout the Relevant Periods as they had distinct and separate management personnel, maintained separate accounting records as if they were autonomous and they were in dissimilar businesses and operations as compared with the Core Operations.
- (d) The financial information of equity interests in the project companies of the Retained BOT Projects has not been included in the Financial Information throughout the Relevant Periods as the Retained BOT Projects were considered to be inappropriate to be included in the Group by the Directors for reasons of the transfer of CRCCG's equity interests therein requiring approval of the contracted government authorities and subjecting to the pre-emptive rights of the joint venture partners to the respective concession agreements.
- (e) The Financial Information has been prepared in accordance with IFRSs, which comprise standards and interpretations approved by the IASB, and International Accounting Standards ("IASs") and Standing Interpretations Committee interpretations approved by the International Accounting Standards Committee that remain in effect, except for the following standards that are relevant to the Group's operations and have been early adopted as at 1 January 2004:

3.1 IMPACT OF ISSUED BUT NOT YET EFFECTIVE IFRSs

The Group has not applied the following new and revised IFRSs that have been issued but are not yet effective in this report:

IAS 1 (Revised)	Presentation of Financial Statements
IAS 23 (Revised)	Borrowing Costs
IFRS 8	Operating Segments
IFRIC-Int 11	IFRS 2 - Group and Treasury Share Transactions
IFRIC-Int 13	Customer Loyalty Programmes
IFRIC-Int 14	IAS 19 - The Limit on a Defined Benefit Asset, Minimum Funding Requirements and their Interaction

IAS 1 (Revised) shall be applied for annual periods beginning on or after 1 January 2009. The revised standard will affect the presentation of owner changes in equity and comprehensive income. The revised standard will use "statement of financial position" and "statement of cash flows" to replace the titles "balance sheet" and "cash flow statement", and in making reference to these two statements within a complete set of financial statements.

IAS 23 (Revised) shall be applied for annual periods beginning on or after 1 January 2009. The standard has been revised to require capitalisation of borrowing costs when such costs relate to a qualifying asset. A qualifying asset is an asset that necessarily takes a substantial period of time to get ready for its intended use or sale. As the Group has capitalised borrowing costs attributable to qualifying assets, the adoption of IAS 23 (Revised) is not expected to have any impact on the Group's consolidated financial statements.

IFRS 8 shall be applied for annual periods beginning on or after 1 January 2009. The standard requires disclosure of information about the Group's operating segments and replaces the requirement to determine primary (business) and secondary (geographical) reporting segments of the Group.

IFRIC-Int 11, IFRIC-Int 13 and IFRIC-Int 14 shall be applied for annual periods beginning on or after 1 March 2007, 1 July 2008 and 1 January 2008, respectively.

The Group is in the process of making an assessment of the impact of these new and revised IFRSs upon initial application. Up to the date of this report, it has concluded that these new and revised IFRSs are unlikely to have a significant impact on the Group's results of operations and financial position.

3.2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of consolidation

The Financial Information includes the financial statements of the Company and its subsidiaries for the Relevant Periods and the eleven-month period ended 30 November 2006. Except for the Restructuring which has been accounted for as a combination of business under common control in a manner similar to a pooling-of-interests as described in note 2 of Section II above, the purchase method of accounting is used to account for the acquisition of subsidiaries by the Group.

The pooling-of-interests method of accounting involves incorporating the financial statement items of the combining entities or businesses in which the common control combination occurs in the Relevant Periods as if they had been consolidated from the date when the combining entities or businesses first came under the control of the controlling party.

The net assets of the combining entities or businesses are combined using the existing book values from the controlling party's perspective. No amount is recognised in respect of goodwill or any excess of acquirers' interest in the net fair value of the acquiree's identifiable assets, liabilities and contingent liabilities over cost at the time of common control combination, to the extent of the continuation of the controlling party's interest.

The consolidated income statements include the results of each of the combining entities or businesses from the earliest date presented or since the date when the combining entities or businesses first came under the common control, where this is a shorter period, regardless of the date of the common control combination.

The purchase method of accounting involves allocating the cost of the business combinations to the fair value of the identifiable assets acquired and liabilities and contingent liabilities assumed at the date of acquisition. The cost of the acquisition is measured at the aggregate fair value of the assets given and liabilities incurred or assumed at the date of exchange, plus costs directly attributable to the acquisition.

Under the purchase method of accounting, the results of subsidiaries are consolidated from the date of acquisition, being the date on which the Group obtains control, and continue to be consolidated until the date that such control ceases.

All significant intra-group balances and transactions within the Group are eliminated on consolidation.

Minority interests represent the interests of outside shareholders not held by the Group in the results and net assets of the Company's subsidiaries, and are presented separately in the consolidated income statement and within equity in the consolidated balance sheet, separately from the equity attributable to equity holder of the Company. The Group applies the policy of treating transactions with minority interests as transactions with equity participants of the Group. The acquisition of minority interests is accounted for using the entity concept method whereby the difference between the consideration paid and the book value of the share of net assets acquired is recorded in equity.

Subsidiaries

A subsidiary is an entity whose financial and operating policies the Company controls, directly or indirectly, so as to obtain benefits from its activities.

The results of subsidiaries are included in the Company's income statement to the extent of dividends received and receivable. The Company's investments in subsidiaries are stated at cost less any impairment losses.

Joint ventures

A joint venture is an entity set up by contractual arrangement, whereby the Group and other parties undertake an economic activity. The joint venture operates as a separate entity in which the Group and the other parties have an interest.

The joint venture agreement between the venturers stipulates the capital contributions of the joint venture parties, the duration of the joint venture entity and the basis on which the assets are to be realised upon its dissolution. The profits and losses from the joint venture's operations and any distributions of surplus assets are shared by the venturers, either in proportion to their respective capital contributions, or in accordance with the terms of the joint venture agreement.

A joint venture is treated as:

- (a) a subsidiary, if the Group has unilateral control, directly or indirectly, over the joint venture;
- (b) a jointly-controlled entity, if the Group does not have unilateral control, but has joint control, directly or indirectly, over the joint venture;
- (c) an associate, if the Group does not have unilateral or joint control, but holds, directly or indirectly, generally not less than 20% of the joint venture's registered capital and is in a position to exercise significant influence over the joint venture; or
- (d) an equity investment accounted for in accordance with IAS 39, if the Group holds, directly or indirectly, less than 20% of the joint venture's registered capital and has neither joint control of, nor is in a position to exercise significant influence over, the joint venture.

Jointly-controlled entities

A jointly-controlled entity is a joint venture that is subject to joint control, resulting in none of the participating parties having unilateral control over the economic activity of the jointly-controlled entity.

The Group's share of the post-acquisition results and reserves of jointly-controlled entities is included in the consolidated income statement and consolidated reserves, respectively. The Group's interests in jointly-controlled entities are stated in the consolidated balance sheet at the Group's share of net assets under the equity method of accounting, less any impairment losses.

The results of jointly-controlled entities are included in the Company's income statement to the extent of dividends received and receivable. The Company's interests in jointly-controlled entities are treated as non-current assets and are stated at cost less any impairment losses.

Associates

An associate is an entity, not being a subsidiary or a jointly-controlled entity, in which the Group has a long term interest of generally not less than 20% of the equity voting rights and over which it is in a position to exercise significant influence.

The Group's share of the post-acquisition results and reserves of associates is included in the consolidated income statement and consolidated reserves, respectively. The Group's interests in associates are stated in the consolidated balance sheet at the Group's share of net assets under the equity method of accounting, less any impairment losses.

When an investment in an associate is classified as held for sale, it is accounted for in accordance with IFRS 5 *Non-current Assets Held for Sale and Discontinued Operations*.

Impairment of non-financial assets

Where an indication of impairment exists, or when annual impairment testing for an asset is required (other than inventories, properties under development, completed properties held for sale, construction contract assets, deferred tax assets and financial assets), the asset's recoverable amount is estimated. An asset's recoverable amount is calculated as the higher of the asset's or cash-generating unit's value in use and its fair value less costs to sell, and is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets, in which case, the recoverable amount is determined for the cash-generating unit to which the asset belongs.

An impairment loss is recognised only if the carrying amount of an asset exceeds its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. An impairment loss is charged to the income statement in the period in which it arises in those expenses categories consistent with the function of the impaired asset.

An assessment is made at each reporting date as to whether there is any indication that previously recognised impairment losses may no longer exist or may have decreased. If such indication exists, the recoverable amount is estimated. A previously recognised impairment loss of an asset and certain financial assets is reversed only if there has been a change in the estimates used to determine the recoverable amount of that asset, however not to an amount higher than the carrying amount that would have been determined (net of any depreciation/amortisation), had no impairment loss been recognised for the asset in prior years. A reversal of such impairment loss is credited to the income statement in the period in which it arises.

Related parties

A party is considered to be related to the Group if:

- (a) the party, directly or indirectly through one or more intermediaries, (i) controls, is controlled by, or is under common control with, the Group; (ii) has an interest in the Group that gives it significant influence over the Group; or (iii) has joint control over the Group;
- (b) the party is an associate;
- (c) the party is a jointly-controlled entity;
- (d) the party is a member of the key management personnel of the Group or its parent;
- (e) the party is a close member of the family of any individual referred to in (a) or (d);
- (f) the party is an entity that is controlled, jointly controlled or significantly influenced by or for which significant voting power in such entity resides with, directly or indirectly, any individual referred to in (d) or (e); or
- (g) the party is a post-employment benefit plan for the benefit of the employees of the Group, or of any entity that is a related party of the Group.

Property, plant and equipment and depreciation

Property, plant and equipment, other than construction in progress, are stated at cost less accumulated depreciation and any impairment losses. The cost of an item of property, plant and equipment comprises its purchase price and any directly attributable costs of bringing the asset to its working condition and location for its intended use. Expenditure incurred after items of property, plant and equipment have been put into operation, such as repairs and maintenance, is normally charged to the income statement in the period in which it is incurred. In situations where it can be clearly demonstrated that the expenditure has resulted in an increase in the future economic benefits expected to be obtained from the use of an item of property, plant and equipment, and where the cost of the item can be measured reliably, the expenditure is capitalised as an additional cost of that asset or as a replacement.

Depreciation is calculated on the straight-line basis to write off the cost of each item of property, plant and equipment to its residual value of 5% over its estimated useful life. The principal annual rates used for this purpose are as follows:

Buildings	2.71%
Machinery	9.50%
Vehicles	19.00%
Production equipment	9.50%
Measurement and experimental equipment	19.00%
Other equipment	19.00%

Where parts of an item of property, plant and equipment have different useful lives, the cost of that item is allocated on a reasonable basis among the parts and each part is depreciated separately.

Residual values, useful lives and depreciation method are reviewed, and adjusted if appropriate, at each balance sheet date.

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss on disposal or retirement recognised in the

income statement in the period the asset is derecognised is the difference between the net sales proceeds and the carrying amount of the relevant asset.

Construction in progress represents property, plant and equipment under construction, which is stated at cost less any impairment losses, and is not depreciated. Cost comprises the direct costs of construction and capitalised borrowing costs on related borrowed funds during the period of construction. Construction in progress is reclassified to the appropriate category of property, plant and equipment when completed and ready for use.

Intangible assets

The useful lives of intangible assets are assessed to be either finite or indefinite. Intangible assets with finite lives are amortised over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortisation period and the amortisation method for an intangible asset with a finite useful life are reviewed at least at each balance sheet date.

Concession assets

The Group engages in certain service concession arrangements in which the Group carries out construction work for the granting authority and receives in exchange a right to operate the assets concerned in accordance with the pre-established conditions set by the granting authority. In accordance with IFRIC Int-12, the assets under the concession arrangements may be classified as intangible assets or financial assets. The assets are classified as intangible assets if the operator receives a right (a licence) to charge users of the public service, or as financial assets if paid by the granting authority. The Group classifies the non-current assets linked to the long-term investment in these concession arrangements as "concession assets" within intangible assets classification on the balance sheet if the intangible asset model is adopted. Once the underlying infrastructure of the concession arrangements has been completed, the concession assets will be amortised over the term of the concession on the straight-line basis under the intangible asset model.

Computer software

Acquired computer software licences are capitalised on the basis of the costs incurred to acquire and bring to use the specific software. These costs are amortised on the straight-line basis over their estimated useful lives of two to ten years.

Others

Others included purchased patents and licenses which are stated at cost less any impairment losses and are amortised on the straight-line basis over their estimated useful life of fifteen years.

Research and development costs

All research costs are charged to the income statement as incurred.

Expenditure incurred on projects to develop new products is capitalised and deferred only when the Group can demonstrate the technical feasibility of completing the intangible asset so that it will be available for use or sale, its intention to complete and its ability to use or sell the asset, how the asset will generate future economic benefits, the availability of resources to complete the project and the ability to measure reliably the expenditure during the development. Product development expenditure which does not meet these criteria is expensed when incurred.

Non-current assets and disposal groups held for sale

Non-current assets and disposal groups are classified as held for sale if their carrying amounts will be recovered principally through a sale transaction rather than through continuing use. For this to be the case, the asset or disposal group must be available for immediate sale in its present condition subject only to terms that are usual and customary for the sale of such assets or disposal groups and its sale must be highly probable.

Non-current assets and disposal groups (other than deferred tax assets and financial assets) classified as held for sale are measured at the lower of their carrying amounts and fair values less costs to sell.

Leases

Leases that transfer substantially all the rewards and risks of ownership of assets to the Group, other than legal title, are accounted for as finance leases. At the inception of a finance lease, the cost of the leased asset is capitalised at the present value of the minimum lease payments and recorded together with the obligation, excluding the interest element, to reflect the purchase and financing. Assets held under capitalised finance leases are included in property, plant and equipment, and depreciated over the shorter of the lease terms and the estimated useful lives of the assets. The finance costs of such leases are charged to the income statement so as to provide a constant periodic rate of charge over the lease terms.

Assets acquired through hire purchase contracts of a financing nature are accounted for as finance leases, and are depreciated over their estimated useful lives.

Leases where substantially all the rewards and risks of ownership of assets remain with the lessor are accounted for as operating leases. Rentals payable under the operating leases are charged to the income statement on the straight-line basis over the lease terms.

Prepaid land lease payments under operating leases are initially stated at cost and subsequently recognised on the straight-line basis over the lease terms ranging from thirty to fifty years. When the lease payments cannot be allocated reliably between the land and buildings elements, the entire lease payments are included in the cost of the land and buildings as a finance lease in property, plant and equipment.

Investments and other financial assets

Financial assets in the scope of IAS 39 are classified as financial assets at fair value through profit or loss, loans and receivables, held-to-maturity investments, and available-for-sale financial assets, as appropriate. When financial assets are recognised initially, they are measured at fair value, plus, in the case of investments not at fair value through profit or loss, directly attributable transaction costs.

The Group determines the classification of its financial assets after initial recognition and, where allowed and appropriate, re-evaluates this designation at the balance sheet date.

All regular way purchases and sales of financial assets are recognised on the trade date, that is, the date that the Group commits to purchase or sell the asset. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the period generally established by regulation or convention in the marketplace.

Financial assets at fair value through profit or loss

Financial assets at fair value through profit or loss include financial assets held for trading. Financial assets are classified as held for trading if they are acquired for the purpose of sale in the near term. Gains or losses on investments held for trading are recognised in the income statement.

Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. Such assets are subsequently carried at amortised cost using the effective interest method. Amortised cost is calculated taking into account any discount or premium on acquisition and includes fees that are an integral part of the effective interest rate and transaction costs. Gains and losses are recognised in the income statement when the loans and receivables are derecognised or impaired, as well as through the amortisation process.

Held-to-maturity investments

Non-derivative financial assets with fixed or determinable payments and fixed maturity are classified as held-to-maturity when the Group has the positive intention and ability to hold to maturity. Investments intended to be held for an undefined period are not included in this classification. Held-to-maturity investments are subsequently measured at amortised cost. Amortised cost is computed as the amount initially recognised minus principal repayments, plus or minus the cumulative amortisation using the effective interest method of any difference between the initially recognised amount and the maturity amount. This calculation includes all fees and points paid or received between parties to the contract that are an integral part of the effective interest rate, transaction costs and all other premiums and discounts. Gains and losses are recognised in the income statement when the investments are derecognised or impaired, as well as through the amortisation process.

Available-for-sale financial assets

Available-for-sale financial assets are non-derivative financial assets in listed and unlisted equity and debt securities that are designated as available for sale or are not classified in any of the other three categories. After initial recognition, available-for-sale financial assets are measured at fair value, with gains or losses recognised as a separate component of equity until the investment is derecognised or until the investment is determined to be impaired, at which time the cumulative gain or loss previously reported in equity is included in the income statement.

When the fair value of unlisted equity and debt securities cannot be reliably measured because (a) the variability in the range of reasonable fair value estimates is significant for that investment; or (b) the probabilities of the various estimates within the range cannot be reasonably assessed and used in estimating fair value, such securities are stated at cost less any impairment losses.

Fair value

The fair value of investments that are actively traded in organised financial markets is determined by reference to quoted market bid prices at the close of business at the balance sheet date. For investments where there is no active market, fair value is determined using valuation techniques. Such techniques include using recent arm's length market transactions; reference to the current market value of another instrument which is substantially the same; a discounted cash flow analysis; and other valuation models.

Financial guarantee contracts

Financial guarantee contracts in the scope of IAS 39 are accounted for as financial liabilities. A financial guarantee contract is recognised initially at its fair value plus transaction costs that are directly attributable to the acquisition or issue of the financial guarantee contract, except when such contract is recognised at fair value through profit or loss. Subsequent to initial recognition, the Group measures the financial guarantee contract at the higher of: (i) the amount determined in accordance with IAS 37 *Provisions, Contingent Liabilities and Contingent Assets*; and (ii) the amount initially recognised less, when appropriate, cumulative amortisation recognised in accordance with IAS 18 *Revenue*.

Impairment of financial assets

The Group assesses at each balance sheet date whether there is any objective evidence that a financial asset or a group of financial assets is impaired.

Assets carried at amortised cost

If there is objective evidence that an impairment loss on loans and receivables or held-to-maturity investments carried at amortised cost has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original effective interest rate (i.e., the effective interest rate computed at initial recognition). The carrying amount of the asset is reduced either directly or through the use of an allowance account. The amount of the impairment loss is recognised in the income statement.

The Group first assesses whether objective evidence of impairment exists individually for financial assets that are individually significant, and individually or collectively for financial assets that are not individually significant. If it is determined that no objective evidence of impairment exists for an individually assessed financial asset, whether significant or not, the asset is included in a group of financial assets with similar credit risk characteristics and that group is collectively assessed for impairment. Assets that are individually assessed for impairment and for which an impairment loss is or continues to be recognised are not included in a collective assessment of impairment.

If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised, the previously recognised impairment loss is reversed. Any subsequent reversal of an impairment loss is recognised in the income statement, to the extent that the carrying value of the asset does not exceed its amortised cost at the reversal date.

In relation to trade receivables, a provision for impairment is made when there is objective evidence (such as the probability of insolvency or significant financial difficulties of the debtor) that the Group will not be able to collect all of the amounts due under the original terms of an invoice. The carrying amount of the receivables is reduced through the use of an allowance account. Impaired debts are derecognised when they are assessed as uncollectible.

Assets carried at cost

If there is objective evidence that an impairment loss on an unquoted equity instrument that is not carried at fair value because its fair value cannot be reliably measured has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated

future cash flows discounted at the current market rate of return for a similar financial asset. Impairment losses on these assets are not reversed.

Available-for-sale financial assets

If an available-for-sale asset is impaired, an amount comprising the difference between its cost (net of any principal payment and amortisation) and its current fair value, less any impairment loss previously recognised in the income statement, is transferred from equity to the income statement. Impairment losses on equity instruments classified as available for sale are not reversed through the income statement.

Impairment losses on debt instruments are reversed through the income statement, if the increase in fair value of the instrument can be objectively related to an event occurring after the impairment loss was recognised in the income statement.

Derecognition of financial assets

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is derecognised where:

- the rights to receive cash flows from the asset have expired;
- the Group retains the rights to receive cash flows from the asset, but has assumed an obligation to pay them in full without material delay to a third party under a "pass-through" arrangement; or
- the Group has transferred its rights to receive cash flows from the asset and either (a) has transferred substantially all the risks and rewards of the asset; or (b) has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

Where the Group has transferred its rights to receive cash flows from an asset and has neither transferred nor retained substantially all the risks and rewards of the asset nor transferred control of the asset, the asset is recognised to the extent of the Group's continuing involvement in the asset. Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Group could be required to repay.

Financial liabilities at amortised cost (including interest-bearing bank and other borrowings)

Financial liabilities including trade and bills payables, other payables, interest-bearing bank and other borrowings and other long term liabilities are initially stated at fair value less directly attributable transaction costs and are subsequently measured at amortised cost, using the effective interest method unless the effect of discounting would be immaterial, in which case they are stated at cost.

Gains and losses are recognised in the income statement when the liabilities are derecognised as well as through the amortisation process.

Derecognition of financial liabilities

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expired.

When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or

modification is treated as a derecognition of the original liability and a recognition of a new liability, and the difference between the respective carrying amounts is recognised in the income statement.

Inventories

Inventories are stated at the lower of cost and net realisable value. Cost is determined on the weighted average basis and, in the case of work-in-progress and finished goods, comprises direct materials, direct labour and an appropriate proportion of overheads. Net realisable value is based on estimated selling prices less any estimated costs to be incurred to completion and disposal.

Properties under development

Properties under development which are intended for sale are stated at the lower of cost and net realisable value, which is estimated by the Directors based on the prevailing market condition. Cost comprises all development expenditure, applicable borrowing costs and other direct costs attributable to such properties.

Completed properties held for sale

Completed properties held for sale are stated at the lower of cost and net realisable value. Cost comprises all development expenditure, applicable borrowing costs and other direct costs attributable to such properties. Net realisable value is determined by reference to the prevailing market prices on an individual property basis.

Construction contracts

Contract revenue comprises the agreed contract amount and appropriate amounts from variation orders, claims and incentive payments. Contract costs incurred comprise direct materials, the costs of subcontracting, direct labour and an appropriate proportion of fixed and variable construction overheads.

Revenue from fixed price construction contracts is recognised on the percentage of completion method, measured by reference to the proportion of costs incurred to date to the estimated total costs of the relevant contract.

Revenue from cost plus construction contracts is recognised on the percentage of completion method, by reference to the recoverable costs incurred during the period plus the related fee earned, measured by the proportion of costs incurred to date to the estimated total costs of the relevant contract.

Provision is made for foreseeable losses as soon as they are anticipated by management.

Where contract costs incurred to date plus recognised profits less recognised losses exceed progress billings, the surplus is treated as an amount due from contract customers.

Where progress billings exceed contract costs incurred to date plus recognised profits less recognised losses, the surplus is treated as an amount due to contract customers.

Contracts for services

Contract revenue on the rendering of services comprises the agreed contract amount. Costs of rendering services comprise labour and other costs of personnel directly engaged in providing the services and attributable overheads.

Revenue from the rendering of services is recognised based on the percentage of completion of the transaction, provided that the revenue, the costs incurred and the estimated costs to completion can be measured reliably. The percentage of completion is established by reference to the costs incurred to date as compared to the total costs to be incurred under the transaction.

Provision is made for foreseeable losses as soon as they are anticipated by management.

Where contract costs incurred to date plus recognised profits less recognised losses exceed progress billings, the surplus is treated as an amount due from contract customers.

Where progress billings exceed contract costs incurred to date plus recognised profits less recognised losses, the surplus is treated as an amount due to contract customers.

Cash and cash equivalents

For the purpose of the consolidated cash flow statement, cash and cash equivalents comprise cash on hand and demand deposits, and short term highly liquid investments which are readily convertible into known amounts of cash and which are subject to an insignificant risk of changes in value, and have a short maturity of generally within three months when acquired, less bank overdrafts which are repayable on demand and form an integral part of the Group's cash management.

For the purpose of the balance sheets, cash and cash equivalents comprise cash on hand and at banks, including term deposits, which are not restricted as to use.

Government grants

Government grants are recognised at their fair values where there is reasonable assurance that the grant will be received and all attaching conditions will be complied with. When the grant relates to an expense item, it is recognised as income over the periods necessary to match the grant on a systematic basis to the costs that it is intended to compensate. Where the grant relates to an asset, the fair value is credited to a deferred revenue account and is released to the income statement over the expected useful life of the relevant asset by equal annual instalments.

Provisions

A provision is recognised when a present obligation (legal or constructive) has arisen as a result of a past event and it is probable that a future outflow of resources will be required to settle the obligation, provided that a reliable estimate can be made of the amount of the obligation.

When the effect of discounting is material, the amount recognised for a provision is the present value at the balance sheet date of the future expenditures expected to be required to settle the obligation. The increase in the discounted present value amount arising from the passage of time is included in finance costs in the income statement.

Income tax

Income tax comprises current and deferred tax. Income tax is recognised in the income statement, or in equity if it relates to items that are recognised in the same or a different period directly in equity.

Current tax assets and liabilities for the current and prior periods are measured at the amount expected to be recovered from or paid to the taxation authorities.

Deferred tax is provided, using the liability method, on all temporary differences at the balance sheet date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes.

Deferred tax liabilities are recognised for all taxable temporary differences, except:

- where the deferred tax liability arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss; and
- in respect of taxable temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, where the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred tax assets are recognised for all deductible temporary differences, carryforward of unused tax credits and unused tax losses, to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carryforward of unused tax credits and unused tax losses can be utilised, except:

- where the deferred tax asset relating to the deductible temporary differences arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss; and
- in respect of deductible temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, deferred tax assets are only recognised to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary differences can be utilised.

The carrying amount of deferred tax assets is reviewed at each balance sheet date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Conversely, previously unrecognised deferred tax assets are reassessed at each balance sheet date and are recognised to the extent that it is probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply to the period when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the balance sheet date.

Deferred tax assets and deferred tax liabilities are offset if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

Revenue recognition

Revenue is recognised when it is probable that the economic benefits will flow to the Group and when the revenue can be measured reliably, on the following bases:

- (a) from construction contracts, on the percentage of completion basis, as further explained in the accounting policy for "Construction contracts" above;
- (b) from the rendering of services, on the percentage of completion basis, as further explained in the accounting policy for "Contracts for services" above;

- (c) from the provision of logistics services, when the services are rendered;
- (d) from the sale of goods, when the significant risks and rewards of ownership have been transferred to the buyer, provided that the Group maintains neither managerial involvement to the degree usually associated with ownership, nor effective control over the goods sold;
- (e) from the sale of properties, when the significant risks and rewards of ownership have been transferred to the buyer, which is when the construction work has been completed and the properties have been delivered to the buyer. Deposits and instalments received in respect of properties sold prior to the date of revenue recognition are included in the balance sheet under current liabilities;
- (f) interest income, on an accrual basis using the effective interest method by applying the rate that discounts the estimated future cash receipts through the expected life of the financial instrument to the net carrying amount of the financial asset;
- (g) dividend income, when the shareholders' right to receive payment has been established; and
- (h) toll revenue, net of any applicable revenue taxes when received.

Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, i.e., assets that necessarily take a substantial period of time to get ready for their intended use or sale, are capitalised as part of the cost of those assets. The capitalisation of such borrowing costs ceases when the assets are substantially ready for their intended use or sale. Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs capitalised.

Dividends

Dividends are recognised as a liability in the period in which they are approved by the shareholders and declared.

Foreign currencies

These financial statements are presented in RMB, which is the Company's functional and presentation currency. Each entity in the Group determines its own functional currency and items included in the financial statements of each entity are measured using that functional currency. Foreign currency transactions are initially recorded using the functional currency rates ruling at the date of the transactions. Monetary assets and liabilities denominated in foreign currencies are retranslated at the functional currency rates of exchange ruling at the balance sheet date. All differences are taken to the income statement. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined.

The functional currencies of certain overseas subsidiaries, jointly-controlled entities and associates are currencies other than RMB. As at the balance sheet date, the assets and liabilities of these entities are translated into the presentation currency of the Company at the exchange rates ruling at the balance sheet date, and their income statements are translated into RMB at the weighted average exchange rates for the year. The resulting exchange differences are included in equity. On disposal of a foreign entity, the deferred

cumulative amount recognised in equity relating to that particular foreign operation is recognised in the consolidated income statement.

For the purpose of the consolidated cash flow statement, the cash flows of overseas subsidiaries are translated into RMB at the exchange rates ruling at the date of the cash flows. Frequently recurring cash flows of overseas subsidiaries which arise throughout the period are translated into RMB at the weighted average exchange rates for the period.

Employee benefits

Retirement benefits

The full-time employees of the Group in Mainland China are covered by various government-sponsored retirement plans under which the employees are entitled to a monthly pension based on certain formulas. The relevant government agencies are responsible for the pension liability to these retired employees. The Group contributes on a monthly basis to these retirement plans. Under these plans, the Group has no obligation for post-retirement benefits beyond the contributions made. Contributions to these plans are expensed as incurred.

In addition, the Group participates in various defined contribution retirement schemes for its qualified employees in certain countries or jurisdictions outside Mainland China. Employees' and employers' contributions are calculated based on various percentages of employees' gross salaries or fixed sums and length of service.

The Group also provided supplementary pension subsidies to retired employees in Mainland China during the Relevant Periods and the eleven-month period ended 30 November 2006. Such supplementary pension subsidies are considered as defined benefit plans. The liability recognised in the balance sheet in respect of these defined benefit plans is the present value of the defined benefit obligation at the balance sheet date less the fair value of plan assets, together with adjustments for unrecognised actuarial gains or losses and past service costs. The defined benefit obligation is calculated annually by independent actuaries using the projected unit credit method. The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows using interest rates of government securities which have maturities approximating to the terms of the related pension liability. Actuarial gains and losses arising from experience adjustments and changes in actuarial assumptions in excess of the greater of 10% of the value of plan assets or 10% of the defined benefit obligation are charged or credited to the income statement over the employees' expected average remaining working lives. Past-service costs are recognised immediately in the income statement, unless the changes to the pension plan are conditional on the employees remaining in service for a specified period of time (the "vesting period"). In this case, the past-service costs are amortised on a straight-line basis over the vesting period. Employees who retire after 1 January 2007 are no longer entitled to such supplementary pension subsidies.

Other post-employment obligations

Some companies within the Group in Mainland China provide post-retirement medical benefits to their retired employees. The expected costs of these benefits are accrued over the period of employment using the same accounting methodology as used for defined benefit pension plans. Actuarial gains and losses arising from experience adjustments, and changes in actuarial assumptions in excess of the greater of 10% of the value of plan assets or 10% of the defined benefit obligation, are charged or credited to the income statement over

the expected average remaining working lives of the related employees. These obligations are valued annually by independent qualified actuaries.

Termination and early retirement benefits

Employee termination and early retirement benefits are recognised in the period in which the Group has entered into an agreement with the employee specifying the terms of redundancy, or after the individual employee has been advised of the specific terms. The specific terms vary among the terminated and early retired employees depending on various factors including position, length of service, salary level at the time of application, minimum compensation levels set by the local regulatory authorities, and district of the employee concerned.

Housing funds

All full-time employees of the Group in Mainland China are entitled to participate in various government-sponsored housing funds. The Group contributes on a monthly basis to these funds based on certain percentages of the salaries of the employees. The Group's liability in respect of these funds is limited to the contributions payable in each period.

Bonus entitlements

The expected cost of bonus payments is recognised as a liability when the Group has a present legal or constructive obligation as a result of services rendered by employees and a reliable estimate of the obligation can be made. Liabilities for bonuses are expected to be settled within twelve months and are measured at the amounts expected to be paid when they are settled.

4. SUMMARY OF SIGNIFICANT JUDGEMENTS AND ESTIMATES

Judgements

In the process of applying the Group's accounting policies, management has made the following judgements, apart from those involving estimations, which have the most significant effect on the amounts recognised in the financial statements:

Impairment of available-for-sale investments

The Group determines that available-for-sale investments are impaired when there has been a significant or prolonged decline in the fair value below its cost. This determination of what is significant or prolonged requires judgement. In making this judgement, the Group evaluates, among other factors, the duration and the extent to which the fair value of an investment is less than its cost. In addition, impairment may be appropriate when there is evidence of a deterioration in the financial health of the investee, industry and sector performance, changes in technology, and operating and financing cash flows.

Contingent liabilities arising from litigations and claims

The Group is involved in a number of litigations and claims in respect of certain construction work performed in the present and the past. Contingent liabilities arising from these litigations and claims have been assessed by management with reference to legal advice. Provisions on the possible obligations have been made based on management's best estimates and judgements.

Estimation uncertainty

The key assumptions concerning the future and other key sources of estimation uncertainty at the balance sheet dates, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are discussed below.

Useful lives and residual values of items of property, plant and equipment

In determining the useful lives and residual values of items of property, plant and equipment, the Group periodically reviews the changes in market conditions, expected physical wear and tear, and the maintenance of the asset. The estimation of the useful life of the asset is based on historical experience of the Group with similar assets that are used in a similar way. Depreciation amount will be adjusted if the estimated useful lives and/or the residual values of items of property, plant and equipment are different from previous estimation. Useful lives and residual values are reviewed, at each balance sheet date, based on changes in circumstances.

Current income tax and deferred income tax

The Group is subject to income taxes in numerous jurisdictions. Judgement is required in determining the provision for taxation. There are many transactions and calculations for which the ultimate tax determination is uncertain during the ordinary course of business. Where the final tax outcome of these matters is different from the amounts originally recorded, the differences will impact on the current income tax and deferred income tax provisions in the periods in which the differences arise.

Deferred tax assets relating to certain temporary differences and tax losses are recognised as management considers it is probable that future taxable profit will be available against which the temporary differences or tax losses can be utilised. The realisation of the deferred tax assets mainly depends on whether sufficient future profits or taxable temporary differences will be available in the future. In cases where the actual future profits generated are less than expected, a material reversal of deferred tax assets may arise, which will be recognised in the income statement for the period in which such a reversal takes place.

Percentage of completion of construction work

The Group recognises revenue according to the percentage of completion of individual contract of construction work, which requires estimation to be made by management. The stage of completion is estimated by reference to the actual costs incurred over the total budgeted costs, and the corresponding contract revenue is also estimated by management. Due to the nature of the activity undertaken in construction contracts, the date at which the activity is entered into and the date at which the activity is completed usually fall into different accounting periods. Hence, the Group reviews and revises the estimates of both contract revenue and contract costs in the budget prepared for each contract as the contract progresses. Where the actual contract revenue are less than expected or actual contract costs are more than expected, an impairment loss may arise.

Impairment of trade receivables

The Group maintains an allowance for estimated loss arising from the inability of its customers to make the required payments. The Group makes its estimates based on the ageing of its trade receivable balances, customers' creditworthiness, and historical write-off experience. If the financial condition of its

customers will deteriorate such that the actual impairment loss might be higher than expected, the Group would be required to revise the basis for making the allowance and its future results would be affected.

Retirement benefits

The Group establishes liabilities in connection with benefits paid to certain retired and early retired employees. The amounts of employee benefit expenses and liabilities are determined using actuarial valuations, which are calculated by independent valuation professionals who will conduct annual assessment of the actuarial position of the Group's retirement plans. These actuarial valuations involve making assumptions on discount rates, expected rates of return on assets, pension benefit inflation rates, medical benefit inflation rates, and other factors. Due to the long term nature of these plans, such estimates are subject to significant uncertainty.

Actual results that differ from the assumptions are recognised immediately and therefore, affect recognised expenses in the period in which such differences arise. While management believes that its assumptions are appropriate, differences in actual experience or changes in assumptions may affect the expenses related to the employee retirement benefit obligations.

5. SEGMENT INFORMATION

Segment information is presented by way of two segment formats: (i) on a primary segment reporting basis, by business segment; and (ii) on a secondary segment reporting basis, by geographical segment.

The Group's operating businesses are structured and managed separately according to the nature of their operations, and the products and services they provide. Each of the Group's business segments represents a strategic business unit that offers different services and products which are subject to risks and returns that are different from those of the other business segments. Summary details of the business segments are as follows:

- (i) the construction operations segment engages in the construction of infrastructures such as railways, highways, bridges, tunnels, metropolitan railways, airports and ports, water conservancy and hydropower facilities, real estate and municipal projects;
- (ii) the survey, design and consultancy operations segment engages in the provision of survey, design and consultancy services, as well as technology and equipment research and development services, for the construction of railways, highways, metropolitan railways, bridges, tunnels, municipal and power projects, high-rise buildings, airports and ports;
- (iii) the manufacturing operations segment engages in the design, research and development, production and sale of large track maintenance machinery as well as the manufacturing of components for railway construction; and
- (iv) the other business operations segment mainly comprises real estate development and logistics businesses.

The profit before tax of a segment represents revenue less expenses directly attributable to a segment and the relevant portion of enterprise revenue less expenses that can be allocated on a reasonable basis to a segment, whether from external transactions or from transactions with other segments of the Group.

Segment assets and liabilities mainly comprise operating assets and liabilities that are directly attributable to the segment or can be allocated to the segment on a reasonable basis.

In determining the Group's geographical segments, revenues are attributed to the segments based on the location of the customers, and assets are attributed to the segments based on the location of the assets.

Intersegment sales and transfers are transacted with reference to the selling prices used for sales made to third parties at the then prevailing market prices.

Notes:

- (a) All of the Group's full-time employees in Mainland China are covered by various government-sponsored retirement plans under which the employees are entitled to a monthly pension based on certain formulas. The relevant government agencies are responsible for the pension liability to these retired employees. The Group is required to make monthly contributions to these plans at rates ranging from 20% to 23% of the employees' basic salaries for the Relevant Periods and the eleven-month period ended 30 November 2006. Contributions to these plans are expensed as incurred.
- In addition, the Group participates in various defined contribution retirement schemes for its qualified employees in certain countries or jurisdictions outside Mainland China. Employees' and employers' contributions are calculated based on various percentages of employees' gross salaries or fixed sums and length of service.
- During the Relevant Periods and the eleven-month period ended 30 November 2006 and at the end of each of the Relevant Periods, the Group's forfeited contributions available to reduce its contributions to the defined contribution retirement schemes in future years were not material.
- (b) In addition, the Group provided supplementary pension subsidies to its retired employees in Mainland China who retired prior to 1 January 2007. Details of the supplementary pension subsidies, which are considered of defined benefit nature, are set out in note 35 of Section II below. Employees who retire after 1 January 2007 are no longer entitled to such supplementary pension subsidies.
- The Group also implemented an early retirement plan for certain employees in addition to the benefits under the government-sponsored retirement plans and supplementary pension subsidies described above, details of which are set out in note 35 of Section II below. Employee termination and early retirement benefits are recognised in the period in which the Group has entered into an agreement with the employee specifying the terms of redundancy, or after the individual employee has been advised of the specific terms. The specific terms determining the amount of compensation payments made to early retired employees vary among the terminated and early retired employees depending on various factors including their position, length of service, salary level at the time of application, minimum compensation levels set by the local regulatory authorities, and district of the employee concerned. These compensation payments to existing early retired employees will continue after the listing of the Company's H Shares on The Hong Kong Stock Exchange. However, the Group's early retirement scheme will not continue after the listing of the Company's H Shares on The Hong Kong Stock Exchange and as such, no further new early retirement application will be accepted by the Group after the listing of the Company's H Shares on The Hong Kong Stock Exchange.

Notes:

- (a) The distributions during the Relevant Periods and the eleven-month period ended 30 November 2006 mainly represented payments made by the Group on behalf of the project companies of the Retained BOT Projects which had been carved-out and treated as deemed distributions pursuant to the Restructuring as set out in note 1 of Section II of this report.
- (b) Certain operating assets and liabilities historically associated with the Predecessor Operations include certain buildings and prepaid land lease payments that do not have perfected titles and ownership certificates and supplementary defined benefits of retirees together with the related deferred tax assets which were integral to the Predecessor Operations before the Restructuring. These assets and liabilities historically associated with the Predecessor Operations were retained by CRCCG by way of distributions to CRCCG and were not injected into the Company upon its incorporation on 5 November 2007.
- (c) In accordance with the notice (財政部關於印發《企業公司制改建有關國有資本管理與財務處理的暫行規定》的通知) "Provisional Regulation Relating to Corporate Restructuring of Enterprises and Related Management of State-owned Capital and Financial Treatment" issued by the MOF (the English name of the notice is a direct translation of the Chinese name), which became effective from 27 August 2002, and pursuant to the Restructuring, after the Company's incorporation, the

Company is required to make a distribution to CRCCG, which represents an amount equal to the net profit attributable to the equity holder of the Company, as determined based on the audited consolidated financial statements prepared in accordance with the New PRC GAAP, generated during the period from 31 December 2006 (date of the Restructuring) to 30 November 2007 by the businesses and operations contributed to the Group by CRCCG, after giving effect to relevant necessary adjustments.

- (d) The other distribution represented an amount due from the ultimate holding company included in prepayments, deposits and other receivables which had been carved-out and treated as deemed distribution during the eleven-month period ended 30 November 2007 (note 28).

The rates of distribution and the number of shares ranking for distribution are not presented as such information is not meaningful for the purpose of this report.

No dividend was paid or declared by the Company during the Relevant Periods as it was incorporated on 5 November 2007.

Following the Restructuring, the payment of future dividends will be determined by the Company's Board of Directors. The payment of the dividends will depend upon, inter alia, the future earnings, capital requirements and financial conditions and general business conditions of the Company. As the controlling shareholder, CRCCG will be able to influence the Company's dividend policy.

Cash dividends to shareholders in Hong Kong will be paid in Hong Kong dollars.

Following the incorporation of the Company, under the Company Law of the PRC and the Company's Articles of Association, net profit after tax as reported in the statutory financial statements prepared in accordance with the New PRC GAAP can only be distributed as dividends after allowances have been made for the following:

- (i) Making up prior years' cumulative losses, if any.
- (ii) Allocations to the statutory common reserve fund of at least 10% of profit after tax, until the fund aggregates 50% of the Company's registered capital. For the purpose of calculating the transfer to reserves, the profit after tax shall be the amount determined under the New PRC GAAP. The transfer to this reserve must be made before any distribution of dividends to the shareholders. The statutory common reserve fund can be used to offset previous years' losses, if any, and part of the statutory common reserve fund can be capitalised as the Company's share capital provided that the amount of the reserve remaining after the capitalisation shall not be less than 25% of the share capital of the Company.
- (iii) Allocations to the discretionary common reserve if approved by the shareholders.

The above reserves cannot be used for purposes other than those for which they are created and are not distributable as cash dividends.

After the listing of the Company's H Shares, in accordance with the Articles of Association of the Company, the net profit after tax of the Company for the purpose of dividends payment will be the lesser of (i) the net profit determined in accordance with the New PRC GAAP; and (ii) the net profit determined in accordance with IFRSs.

Prior to the incorporation of the Company on 5 November 2007, no profit appropriations to the aforesaid reserve funds were required.

14. EARNINGS PER SHARE ATTRIBUTABLE TO EQUITY HOLDER OF THE COMPANY

The calculation of basic earnings per share for each of the Relevant Periods and the eleven-month period ended 30 November 2006 is based on the profit attributable to equity holder of the Company for each of the Relevant Periods and the eleven-month period ended 30 November 2006 and the number of ordinary shares in issue during the Relevant Periods on the assumption that the 8,000 million ordinary shares in issue upon the incorporation of the Company on 5 November 2007 had been in issue throughout the Relevant Periods.

No diluted earnings per share has been presented as the Company did not have any dilutive potential ordinary shares during the Relevant Periods and the eleven-month period ended 30 November 2006.

27. TRADE AND BILLS RECEIVABLES

The Group's major customers are the PRC government agencies and other state-owned enterprises. The majority of the Group's revenues are generated through construction projects and settlement is made in accordance with the terms specified in the contracts governing the relevant transactions. The Group does not have a standardised and universal credit period granted to the construction service customers. The credit period of individual construction service customers is considered on a case-by-case basis and set out in the construction contracts, as appropriate. For sale of products, a credit period ranging from 30 to 90 days may be granted to large or long-established customers with good repayment history. Revenues from small, new or short-term customers are normally expected to be settled shortly after provision of services or delivery of goods. No credit period is set by the Group for small, new and short term customers. For retention money

receivables in respect of construction work carried out by the Group, the due dates usually range from one to six years after the completion of the construction work. Trade and bills receivables are non-interest-bearing.

The Group paid supplementary pension subsidies (including post-retirement medical benefits) to its employees who retired prior to 1 January 2007. Pursuant to the Restructuring, CRCCG has agreed to assume the liabilities of the supplementary pension subsidies (including post-retirement medical benefits) of the retired employees of the Group from 1 January 2007. The Group also implemented an early retirement plan for certain employees in addition to the benefits under the government-sponsored retirement plans and supplementary pension subsidies described above, details of which are set out in note 9(b) of Section II above. The Group's obligations in respect of the supplementary pension subsidies and early retirement benefits at the balance sheet dates were computed by an independent actuary, Towers, Perrin, Forster & Crosby, Inc., Hong Kong, whose actuaries are members of the Society of Actuaries of the United States of America, using the projected unit credit actuarial cost method.

In the opinion of the Directors, the above related party transactions were conducted in the ordinary course of business and will continue after the listing of the H Shares and A Shares of the Company on The Hong Kong Stock Exchange and The Shanghai Stock Exchange, respectively.

The Group operates in an economic environment predominated by enterprises directly or indirectly owned or controlled by the PRC government through its numerous authorities, affiliates or other organisations (collectively "State-owned Enterprises"). During the Relevant Periods and the eleven-month period ended 30 November 2006, the Group had transactions with State-owned Enterprises including, but not limited to, the provision of infrastructure construction services and purchases of services. The Directors consider that the transactions with these State-owned Enterprises are activities in the ordinary course of the Group's business and that the dealings of the Group have not been significantly or unduly affected by the fact that the Group and these State-owned Enterprises are ultimately controlled or owned by the PRC government. The Group has also established pricing policies for services and products, and such pricing policies do not depend on whether or not the customers are State-owned Enterprises. Having due regard to the substance of the relationships, the Directors are of the opinion that none of these transactions are material related party transactions that require separate disclosure.

Details of the outstanding balances with related parties are set out in notes 26, 27, 28, 31 and 32 of Section II above.

In August 2007, the Group entered into a disposal agreement with an external third party for the disposal of the Group's entire shareholding of 35% in Huzhun Railways. The consideration for the disposal is based on 35% of the valuation amount of the net assets of Huzhun Railways as determined from an independent valuation. As at the date of this report, the independent valuation is still in progress and hence the consideration for the disposal has not been finalised. As the disposal transaction is expected to be completed within the next twelve months, the investment in Huzhun Railways is classified as a non-current asset held for sale in the consolidated balance sheet as at 30 November 2007.

45. FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES

The Group's principal financial instruments comprise interest-bearing bank and other borrowings, cash and cash equivalents and pledged deposits. The main purpose of these financial instruments is to raise finance for the Group's operations. The Group has various other financial assets and liabilities such as trade receivables and trade payables, which arise directly from its operations.

The main risks arising from the Group's financial instruments are fair value and cash flow interest rate risks, foreign currency risk, credit risk and liquidity risk. Generally, the senior management of the Company meets at least four times a year to analyse and formulate measures to manage the Group's exposure to these risks. In addition, the Board of Directors of the Company holds meetings at least twice per year to analyse and approve the proposals made by the senior management of the Company. Generally, the Group introduces conservative strategies on its risk management. As the Group's exposure to these risks is kept to a minimum, the Group has not used any derivatives and other instruments for hedging purposes. The Group does not hold or issue derivative financial instruments for trading purposes. The Board reviews and agrees policies for managing each of these risks and they are summarised below.

Fair value and cash flow interest rate risks

Fair value interest rate risk is the risk that the value of a financial instrument will fluctuate because of changes in market interest rates. Cash flow interest rate risk is the risk that the future cash flows of a financial instrument will fluctuate because of changes in market interest rates. Having borrowings issued at fixed and floating interest rates, the Group is exposed to both fair value and cash flow interest rate risks. The Group's exposure to the risk of changes in market interest rates relates primarily to the Group's long term debt obligations with floating interest rates.

The Group regularly reviews and monitors the mix of fixed and floating interest rate borrowings in order to manage its interest rate risks. Interest-bearing borrowings, cash and short term deposits are stated at amortised cost and not revalued on a periodic basis. Floating rate interest income and expenses are credited/charged to the income statement as earned/incurred.

Management does not anticipate any significant impact resulting from the changes in interest rates because most of the Group's borrowings as at 30 November 2007 were at fixed interest rates which have no significant impact on cash flow interest rate risk.

If there would be a general increase/decrease in the interest rate of bank and other borrowings with floating interest rates by one percentage point, with all other variables held constant, the consolidated operating results would have been decreased/increased by approximately RMB23 million, RMB38 million, RMB56 million and RMB64 million for the years ended 31 December 2004, 2005 and 2006 and the eleven-month period ended 30 November 2007, respectively, and there is no impact on other components of the consolidated equity, except for retained earnings, of the Group. The sensitivity analysis above has been determined assuming that the change in interest rates had occurred at the end of each of the Relevant Periods and had applied the exposure to interest rate risk to those financial instruments in existence at that date. The estimated one percentage point increase or decrease represents management's assessment of a reasonably possible change in interest rates over the period until the next annual balance sheet date. The sensitivity analysis is performed on the same basis for the entire Relevant Periods.

Foreign currency risk

Foreign currency risk is the risk that the value of a financial instrument will fluctuate because of changes in foreign exchange rates. With the majority of the Group's businesses transacted in RMB, the aforesaid currency is defined as the Group's functional currency. RMB is not freely convertible into foreign currencies and conversion of RMB into foreign currencies is subject to rules and regulations of foreign exchange control promulgated by the PRC government.

As a result of its significant business operations in Mainland China, the Group's revenue and expenses are mainly denominated in RMB and over 90% of the financial assets and liabilities are denominated in RMB. The effect of the fluctuations in the exchange rate of RMB against foreign currencies on the Group's results of operations is therefore minimal and the Group has not entered into any hedging transactions in order to reduce the Group's exposure to foreign currency risk in this regard.

Details of the Group's cash and cash equivalents, pledged deposits, and interest-bearing bank and other borrowings at the end of each of the Relevant Periods are disclosed in notes 30 and 33 of Section II above, respectively.

The following table indicates the approximate change in the Group's profit before tax and net equity in response to reasonably possible changes in the foreign exchange rates to which the Group has significant exposure at the balance sheet dates of the Relevant Periods. The sensitivity analysis includes net investment in its subsidiaries and jointly-controlled entities in Hong Kong, bank deposits in United States dollar, and bank and other borrowings in Euros and United States dollar held by the companies comprising the Group.

Decrease in Hong Kong dollar rate	-3%	17,400	18,600	22,500	14,800

The sensitivity analysis above has been determined assuming that the change in foreign currency rates had occurred at the end of each of the Relevant Periods and had applied the exposure to foreign currency risk to those monetary assets and liabilities and net investment operations in existence at that date. The estimated percentage increase or decrease represents management's assessment of a reasonably possible change in foreign currency rates over the period until the next annual balance sheet date. The sensitivity analysis is performed on the same basis for the entire Relevant Periods.

Credit risk

The carrying amounts of cash and cash equivalents, pledged deposits, trade and bills receivables, other receivables, investments and other financial assets represent the Group's maximum exposure to credit risk in relation to financial assets. Substantially all of the Group's cash and cash equivalents are held in major financial institutions located in the PRC, which management believes are of high credit quality. The Group has policies to control the size of the deposits to be placed with various reputable financial institutions according to their market reputation, operating scale and financial background with a view to limiting the amount of credit exposure to any single financial institution.

The Group trades only with recognised and creditworthy third parties with no requirement for collateral. It is the Group's policy that all customers who wish to trade on credit terms are subject to credit verification procedures. In addition, receivable balances are monitored on an ongoing basis and the Group's exposure to bad debts is not significant.

As the Group's major customers are PRC government agencies at the national, provincial and local levels and other state-owned enterprises, the Group believes that they are reliable and of high credit quality and hence, there is no significant credit risk with these customers. As the Group's exposure is spread over a diversified portfolio of customers, there is no significant concentration of credit risk.

Liquidity risk

The Group's objective is to ensure continuity of sufficient funding and flexibility by utilising a variety of bank and other borrowings with debt maturities spreading over a range of periods, thereby ensuring that the Group's outstanding borrowing obligation is not exposed to excessive repayment risk in any one year. Due to the capital intensive nature of the Group's businesses, the Group ensures that it maintains sufficient cash and credit lines to meet its liquidity requirements.

The liquidity of the Group is primarily dependent on its ability to maintain adequate cash inflows from operations to meet its debt obligations as they fall due, and its ability to obtain external financing to meet its committed future capital expenditure. With regards to its future capital commitments and other financing requirements, the Company has already obtained banking facilities with several PRC banks of up to an amount of RMB176,500 million as of 30 November 2007, of which an amount of approximately RMB59,100 million has been utilised.

The Directors have carried out a detailed review of the cash flow forecast of the Group for the next twelve months from this report date. Based on this forecast, the Directors have determined that adequate liquidity exists to finance the working capital and capital expenditure requirements of the Group during that period. In preparing the cash flow forecast, the Directors have considered historical cash requirements of the Group as well as other key factors, including the availability of the above-mentioned loans financing which may impact the operations of the Group prior to the end of the next twelve months after the date of this report. The Directors are of the opinion that the assumptions and sensitivities which are included in the cash flow forecast are reasonable. However, as with all assumptions in regard to future events, these are subject to inherent limitations and uncertainties and some or all of these assumptions may not be realised.

Save as disclosed in note 33 of Section II regarding the contractual maturities of the interest-bearing bank and other borrowings, the Group's policy is to maintain the proportion of its current maturity profile with respect to the total liabilities at the end of each of the Relevant Periods between 10% and 13% (31 December 2004: 10.1%; 31 December 2005: 10.1%; 31 December 2006: 10.4%; 30 November 2007: 13.2%) and to

maintain its non-current maturity profile at less than 5% of the amounts of total liabilities at the end of each of the Relevant Periods (31 December 2004: 1.5%; 31 December 2005: 3.1%; 31 December 2006: 3.9%; 30 November 2007: 4.2%).

Capital management

The Group's objectives when managing capital are to safeguard the entity's ability to continue as a going concern, so that it can continue to provide returns for shareholders and benefits for other stakeholders, and to provide an adequate return to shareholders by pricing services and products commensurately with the level of risk.

The Group sets the amount of capital in proportion to risk. The Group manages the capital structure and makes adjustments to it in the light of changes in economic conditions and the risk characteristics of the underlying assets. In order to maintain or adjust the capital structure, the Group may adjust the amount of dividends paid to shareholders, return capital to shareholders, issue new shares or sell assets to reduce debts.

The Group monitors capital using a gearing ratio which is net debt divided by total equity. Net debt comprises all interest-bearing bank and other borrowings less cash and cash equivalents and pledged deposits. Total equity comprises owner's equity and minority interests stated in the consolidated balance sheets.

At the end of each of the Relevant Periods, the Group's strategy was to maintain the gearing ratio at a healthy capital level in order to support its businesses. The principal strategies adopted by the Group include, without limitation, reviewing future cash flow requirements and the ability to meet debt repayment schedules when they fall due, maintaining a reasonable level of available banking facilities and adjusting investment plans and financing plans, if necessary, to ensure the Group has a reasonable level of capital to support its business. The gearing ratios at the end of each of the Relevant Periods were as follows:

The Board of Directors
China Railway Construction Corporation Limited
East, No. 40 Fuxing Road
Haidian District
Beijing
The People's Republic of China

Dear Sirs,

In accordance with your instructions to value the properties in which China Railway Construction Corporation Limited (the "Company") and its subsidiaries (hereinafter together referred to as the "Group") have interests in the People's Republic of China (the "PRC"), Hong Kong, Macau and overseas countries, we confirm that we have carried out inspections, made relevant enquiries and searches and obtained such further information as we consider necessary for the purpose of providing you with our opinion of the capital values of the property interests as at 31 December 2007 (the "date of valuation").

In valuing the property interests in Group I which are held by the Group, we have categorized the property interests of the Group into various sub-groups according to the business nature of the Group (namely construction business, survey, design & consultancy business, manufacturing business and other business) and the Company's directly controlled subsidiaries. The remaining properties are classified according to the nature or location of the properties of the Group. The property interests of each sub-group are occupied by a directly controlled subsidiary and its subsidiaries in the PRC, Hong Kong, Macau and overseas countries.

Our valuations of the property interests represent the market value which we would define as "the estimated amount for which a property should exchange on the date of valuation between a willing buyer and a willing seller in an arm's-length transaction after proper marketing wherein the parties had each acted knowledgeably, prudently, and without compulsion".

Land

The concept of freehold and leasehold land does not exist in China. Private land ownership in China was abolished in the collectivization movement during the 1950's. Since then, the only form of ownership in land has been "socialist public ownership" of which there are two generic types: state-owned and collectively

owned. Land was "allocated" free of charge by the state to the designated users (commonly state-owned enterprises) for an indefinite period ("allocated land"). The users in return could not in any way transfer the land to other parties. Normally, when dealing with the valuation of such land, we will deem it to have "no commercial value".

In January 1995, the "PRC, Administration of Urban Real Property Law" came into effect, reinforcing previous legislation and establishing land as a commodity. By possessing "land use rights", users, including state-owned enterprises, could assign, lease or mortgage land. Normally, to obtain such land use rights, a premium has to be paid whereupon the allocated land could be reclassified as "granted" land. The land is granted by the State and the premium is based upon the standard land prices (which are periodically reviewed) set by the Land Administration Bureau. Such land can be valued by reference to the standard land prices in each locality and prices paid in the market for it.

In occasional cases on a discretionary basis, allocated land held by certain state-owned enterprises can be injected by the State to those enterprises as capital investment for incorporation into a joint stock company in return for shares. We have defined such land as "State-capital-injection land" (作價出資). After the injection, the land use rights of the State-capital-injection land of specified tenure terms will be held by the joint stock company and a new relevant Land Use Rights Certificate will be issued to the joint stock company. The joint stock company may transfer, lease and mortgage the land use rights in accordance with the relevant land regulations and laws of the PRC in relation to granted land use rights.

We have valued the property interests in portions of Group I, Group II and Group III which are held by the Group for owner occupation and for sale respectively, using the direct comparison approach assuming sale of the property interests in their existing state with the benefit of immediate vacant possession and by making reference to comparable sale transactions that are available in the relevant market.

Where, due to the nature of the buildings and structures of the properties in the PRC, there are no market sales comparables readily available, portions of property interests in Group I have been valued on the basis of their depreciated replacement cost.

Depreciated replacement cost is defined as "the current cost of replacement (reproduction) of a property less deductions for physical deterioration and all relevant forms of obsolescence and optimization." It is based on an estimate of the market value for the existing use of the land, plus the current cost of replacement (reproduction) of the improvements, less deduction for physical deterioration and all relevant forms of obsolescence and optimization. The depreciated replacement costs of the property interests are subject to adequate potential profitability of the concerned business.

In valuing the property interests in Group IV which are currently under construction, we have assumed that they will be developed and completed in accordance with the Group's latest development proposal provided to us. In arriving at our opinion of value, we have also taken into consideration of the development costs already spent and to be spent which have been provided by the Group, to reflect the quality of the completed development. The "Capital value of the property as if the property is completed at the date of valuation" represents our opinion of the aggregate selling prices of the development assuming that it would have been completed at the date of valuation.

In relation to the property interests in Group V, which are held by the Group for future development in the PRC, we have also valued each of these property interests using the direct comparison approach assuming sale of each of these property interests in their existing state with the benefit of vacant possession and by making reference to comparable sales transactions that are available in the relevant market.

For the purpose of our valuation, the property interests held by the Group for future development are those that the Construction Works Commencement Permit(s) has (have) not been issued even though the State-owned Land Use Rights certificates have been obtained.

The property interests in Group VI, which are property interests to be acquired by the Group in the PRC, relate to those properties that the Group has entered into agreements with the relevant owner of the properties or government authorities, while the Group has not yet obtained the State-owned Land Use Rights Certificates and/or the payment of the land premium has not yet been fully settled as at the date of valuation. We have attributed no commercial value to these property interests.

We have attributed no commercial value to the property interests in Group VII and Group VIII which are leased by the Group in PRC, Hong Kong, Macau and overseas countries, due to the short-term nature of the leaser the prohibition against assignment or sub-letting or otherwise due to the lack of substantial profit rent.

Our valuations have been made on the assumption that the seller sells the property interests in the market without the benefit of a deferred term contract, leaseback, joint venture, management agreement or any similar arrangement, which could serve to affect the values of the property interests.

No allowance has been made in our report for any charges, mortgages or amounts owing on any of the property interests valued nor for any expenses or taxation which may be incurred in effecting a sale. Unless otherwise stated, it is assumed that the properties are free from encumbrances, restrictions and outgoings of an onerous nature, which could affect their values.

In valuing the property interests, we have complied with all requirements contained in Chapter 5 and Practice Note 12 of the Rules Governing the Listing of Securities issued by The Stock Exchange of Hong Kong Limited, except for those in respect of which exemptions and waivers have been applied for and granted in respect of Rules 5.01, 5.06(1), (2), (3) and (4), 19A.27(4) paragraph 5.2 (a) of Practice Note 12, and section 38, section 342A and paragraph 34(2), 34(3) of the Third Schedule of Companies Ordinance; the RICS Valuation Standards (6th Edition) published by the Royal Institution of Chartered Surveyors; and the HKIS Valuation Standards on Properties (1st Edition 2005) published by the Hong Kong Institute of Surveyors.

As the Group is in compliance with paragraph 3(b) of Practice Note 16 of the Rules Governing the Listing of Securities issued by The Stock Exchange of Hong Kong Limited and section 6 of Companies Ordinance (Exemption of Companies and Prospectuses from Compliance with Provisions) Notice, the full details of the individual leased properties under operating lease have been excluded from the valuation certificates in our valuation report to this prospectus, of which a summary is included in the Summary of Values and the certificate for leased properties.

According to the aforesaid waivers and exemptions, we have summarized and disclosed the property interests in Group I, Group II, Group VII and Group VIII. For other property interests in Group III, Group IV, Group V and Group VI, each property interest in the valuation report has been disclosed in full according to the relevant rules.

We have relied to a very considerable extent on the information given by the Group and have accepted advice given to us on such matters as tenure, planning approvals, statutory notices, easements, particulars of occupancy, lettings, and all other relevant matters.

We have been shown copies of various title documents including State-owned Land Use Rights Certificates ("LURCs"), Building Ownership Certificates ("BOCs"), Real Estate Title Certificates ("RETCs") and official plans relating to the property interests and have made relevant enquiries. Where possible, we have examined the original documents to verify the existing titles to the property interests in the PRC and any material encumbrances that might be attached to the property interests or any lease amendments. We have relied considerably on the advice given by the Company's PRC legal advisers — Beijing Deheng Law Office, concerning the validity of the Group's titles to the property interests in the PRC.

We have not carried out detailed site measurements to verify the correctness of the site areas in respect of the properties but have assumed that the site areas shown on the documents and official site plans handed to us are correct. All documents and contracts have been used as reference only and all dimensions, measurements and areas are approximations. No on-site measurement has been taken.

We have inspected the exterior and, where possible, the interior of the properties. However, we have not carried out investigation to determine the suitability of the ground conditions and services for any development thereon. Our valuation has been prepared on the assumption that these aspects are satisfactory and that no unexpected cost and delay will be incurred during construction. Moreover, no structural survey has been made, but in the course of our inspection, we did not note any serious defects. We are not, however, able to report whether the properties are free of rot, infestation or any other structural defects. No tests were carried out on any of the services.

We have had no reason to doubt the truth and accuracy of the information provided to us by the Group. We have also sought confirmation from the Group that no material factors have been omitted from the information supplied. We consider that we have been provided with sufficient information to reach an informed view, and we have no reason to suspect that any material information has been withheld.

Unless otherwise stated, all monetary figures stated in this report are in Renminbi (RMB). Where necessary, the exchange rates adopted in our valuations are approximately HK\$1 = RMB0.9326, USD\$1 = ZL2.88, USD\$1 = Naira129, USD\$1 = PULA6.15, USD\$1 = Djibouti Franc178.16, EURO\$1 = RMB10.6669 and USD\$1 = RMB7.3046, being the prevailing exchange rates as at the date of valuation.

Our valuations are summarized below and the valuation certificates are attached.

WHEREAS:

- (A) The Company is applying for a listing for its overseas listed foreign invested shares (“**H Shares**”) on the Main Board of The Stock Exchange of Hong Kong Limited (the “**Hong Kong Stock Exchange**”) by way of a global offering (the “**Global Offering**”) of its H Shares comprising:
 - (i) a public offer by the Company of its H Shares for subscription in Hong Kong (the “**Hong Kong Public Offering**”); and
 - (ii) private placements by the Company of H Shares outside the United States, in offshore transactions to “non-U.S. persons” in reliance on Regulation S (“**Regulation S**”) under the US Securities Act of 1933, as amended (the “**Securities Act**”) and in the United States to qualified institutional buyers, as defined in Rule 144A of the Securities Act or other available exemption from registration under the US Securities Act (collectively, the “**International Offering**”).
- (B) The Investor wishes to make an equity investment in the Company as part of the

International Offering on the terms and conditions set out in this Agreement.

- (C) The Investor is an indirect wholly-owned subsidiary of Temasek Holdings (Private) Limited (“Temasek”).

IT IS AGREED as follows:

1. INVESTMENT

- 1.1 Subject to the conditions specified in this Agreement, the Investor will acquire the Investor Shares (as defined in Clause 1.4) at the IPO Price (as defined in Clause 1.4) under and as part of the International Offering through the Joint Global Coordinators or their affiliates in their capacity as underwriters of the relevant portion of the International Offering, and each of the Company and the Joint Global Coordinators agrees that the Investor shall be issued the Investor Shares at the IPO Price on the Delivery Date, or where applicable, pursuant to Clause 3.1, the Delayed Delivery Date.
- 1.2 The Investor may elect by notice in writing served to the Joint Global Coordinators not later than two Hong Kong banking days (as defined in Clause 1.4) prior to the Delivery Date to acquire the Investor Shares through another wholly-owned subsidiary of Temasek who is a “professional investor” as defined in Part I of Schedule 1 to the Securities and Futures Ordinance of Hong Kong and is not a U.S. person as defined in Rule 902 of Regulation S under the Securities Act (the “Investor Subsidiary”), in which case the agreements, representations, undertakings, acknowledgements and confirmations given in this Agreement shall be deemed to be given by the Investor for itself and on behalf of the Investor Subsidiary.
- 1.3 The number of Investor Shares to be acquired by the Investor under this Agreement will not be affected by any re-allocation of H Shares between the International Offering and the Hong Kong Public Offering in the event of over-subscription under the Hong Kong Public Offering nor by any exercise of the over-allotment option to be granted by the Company to the Joint Global Coordinators on behalf of the international underwriters for the Global Offering.
- 1.4 For the purposes of this Agreement, the “**Investor Shares**” means such number of H Shares offered by the Company to the Investor or the Investor Subsidiary in the International Offering equal to the maximum number of H Shares that may be purchased with US\$50 million (or its Hong Kong dollars equivalent based on the closing middle point spot rate quoted by The Hongkong and Shanghai Banking Corporation Limited for United States dollars at the close of business in Hong Kong on the date on which the IPO Price is determined) (“**Investment Amount**”) at the IPO Price, rounded down to the nearest board lot; the “**IPO Price**” means the price per H Share at which the H Shares are acquired by investors under the International Offering, expressed in Hong Kong dollars (exclusive of Brokerage and Levies, as defined in Clause 3.1), and determined as referred to in Clause 5.1; and “**Hong Kong banking day**” means any day except a Saturday, Sunday or other day on which commercial banks in Hong Kong are generally open to the public in Hong Kong. Both the IPO Price and the number of Investor Shares shall be determined by the Joint Global Coordinators

and the Company pursuant to this Agreement, and such determination shall be conclusive in the absence of manifest error.

2. AGREEMENT CONDITIONAL UPON COMPLETION OF GLOBAL OFFERING

- 2.1 The Investor's agreement in Clause 1 above (and the right of the Investor to acquire the Investor Shares) is conditional upon the underwriting agreements for each of the Hong Kong Public Offering and the International Offering being entered into by, inter alia, the Company and the Joint Global Coordinators and having become effective and unconditional and not having been terminated (in accordance with their respective original terms or as subsequently varied by agreement of the relevant parties). There can be no guarantee that the Global Offering will be completed or not be terminated, and no liability of the Company and/or the Joint Global Coordinators to the Investor or the Investor Subsidiary, as the case may be, will arise if the Global Offering is not duly completed for any reason by the dates and times contemplated or at all.

3. CLOSING

- 3.1 Subject to Clause 2 and Clause 3.2, the Investor shall pay the aggregate of the IPO Price for the Investor Shares, together with an amount equal to the aggregate of (i) a brokerage fee of 1%, (ii) the Hong Kong Stock Exchange trading fee of 0.005%, and (iii) the SFC transaction levy of 0.004%, in each case calculated by reference to the aggregate IPO Price for all Investor Shares ("**Brokerage and Levies**"), by same day value credit in clear funds and without deduction or set-off whatsoever (to such Hong Kong dollar bank account as may be notified to the Investor by the Joint Global Coordinators in writing no later than three JGCs, please confirm Hong Kong banking days prior to the due date for payment) on the Delivery Date (as defined in Clause 3.5) to the Joint Global Coordinators, and delivery of the Investor Shares to the Investor or the Investor Subsidiary, as the case may be, shall be made through the Hong Kong Central Clearing and Settlement System for the account of the Investor or the Investor Subsidiary, as the case may be, not later than 9:30 a.m. (or such other time as notified by the Joint Global Coordinators) on the Delivery Date or, to the extent the Joint Global Coordinators notify the Investor in writing no later than two Hong Kong banking days prior to the Delivery Date that they will defer delivery of the Investor Shares, on the Delayed Delivery Date.
- 3.2 Delivery of the Investor Shares may also be made in any other manner which the Company, the Joint Global Coordinators and the Investor may otherwise agree to in writing.
- 3.3 Delivery Date for the Investor Shares is currently expected to be not later than the date on which the H Shares are first listed on the Hong Kong Stock Exchange (the "**Listing Date**"). The Joint Global Coordinators shall promptly notify the Investor of any delay in the Delivery Date.
- 3.4 For the avoidance of doubt, the proceeds from the sale of the H Shares comprised in the Global Offering to be received by the Company on the Listing Date shall exclude the

Investor Shares to the extent that the Delivery Date for such Investor Shares is subsequent to the Listing Date.

- 3.5 For the purpose of this Agreement, “**Delivery Date**” means, subject to the underwriting agreement for the Hong Kong Public Offering and the underwriting agreement for the International Offering being entered into and having become effective and unconditional and not having been terminated, on or before 8.00 a.m. on the Listing Date (currently expected to be no later than the Listing Date) unless the Joint Global Coordinators notify the Investor that the Investor Shares will be delivered on the Delayed Delivery Date in accordance with Clause 3.1 the day on which the Investor Shares are delivered to the Investor or the Investor Subsidiary.
- 3.6 For the purpose of this Agreement, “**Delayed Delivery Date**” means such time and date as the Joint Global Coordinators may notify the Investor by not less than two days’ prior written notice pursuant to Clause 3.1, which shall be a Hong Kong banking day later than the Delivery Date but no later than two Hong Kong banking days following the 30th day after the date expected to be the latest date for lodging applications under the Hong Kong Public Offering, at which time and date the Investor Shares shall be delivered to the Investor or the Investor Subsidiary, as the case may be.

(CITIC, CGM and MSL are collectively known as the “**Joint Global Coordinators**”).

WHEREAS:

- (A) The Company is applying for a listing for its overseas listed foreign invested shares (“**H Shares**”) on the Main Board of The Stock Exchange of Hong Kong Limited (the “**Hong Kong Stock Exchange**”) by way of a global offering (the “**Global Offering**”) of its H Shares comprising:
 - (i) a public offer by the Company of its H Shares for subscription in Hong Kong (the “**Hong Kong Public Offering**”); and
 - (ii) private placements by the Company of H Shares outside the United States, in offshore transactions to “non-U.S. persons” in reliance on Regulation S (“**Regulation S**”) under the US Securities Act of 1933, as amended (the “**Securities Act**”) and in the United States to qualified institutional buyers, as defined in Rule 144A of the Securities Act or other available exemption from registration under the US Securities Act (collectively, the “**International Offering**”).

- (B) The Investor is a company incorporated in the P.R.C. and whose H shares are listed on the Hong Kong Stock Exchange. The Investor wishes to make an equity investment in the Company as part of the International Offering on the terms and conditions set out in this Agreement.

IT IS AGREED as follows:

1. INVESTMENT

- 1.1 Subject to the conditions specified in this Agreement, the Investor will acquire the Investor Shares (as defined in Clause 1.4) at the IPO Price (as defined in Clause 1.4) under and as part of the International Offering through the Joint Global Coordinators or their affiliates in their capacity as underwriters of the relevant portion of the International Offering, and each of the Company and the Joint Global Coordinators agrees that the Investor shall be issued the Investor Shares at the IPO Price on the Delivery Date, or where applicable, pursuant to Clause 3.1, the Delayed Delivery Date.
- 1.2 The Investor may elect by notice in writing served to the Joint Global Coordinators not later than two Hong Kong banking days (as defined in Clause 1.4) prior to the Delivery Date to acquire the Investor Shares through a wholly-owned subsidiary of the Investor that is a “professional investor” as defined in Part I of Schedule 1 to the Securities and Futures Ordinance of Hong Kong and is not a U.S. person as defined in Rule 902 of Regulation S under the Securities Act (the “**Investor Subsidiary**”), in which case the agreements, representations, undertakings, acknowledgements and confirmations given in this Agreement shall be deemed to be given by the Investor for itself and on behalf of the Investor Subsidiary.
- 1.3 The number of Investor Shares to be acquired by the Investor under this Agreement will not be affected by any re-allocation of H Shares between the International Offering and the Hong Kong Public Offering in the event of over-subscription under the Hong Kong Public Offering nor by any exercise of the over-allotment option to be granted by the Company to the Joint Global Coordinators on behalf of the international underwriters for the Global Offering.
- 1.4 For the purposes of this Agreement, the “**Investor Shares**” means such number of H Shares offered by the Company to the Investor or the Investor Subsidiary in the International Offering equal to the maximum number of H Shares that may be purchased with US\$50 million (or its Hong Kong dollars equivalent based on the closing middle point spot rate quoted by The Hongkong and Shanghai Banking Corporation Limited for United States dollars at the close of business in Hong Kong on the date on which the IPO Price is determined) (“**Investment Amount**”) at the IPO Price, rounded down to the nearest board lot; the “**IPO Price**” means the price per H Share at which the H Shares are acquired by investors under the International Offering, expressed in Hong Kong dollars (exclusive of Brokerage and Levies, as defined in Clause 3.1), and determined as referred to in Clause 5.1; and “**Hong Kong banking day**” means any day except a Saturday, Sunday or other day on which commercial banks in Hong Kong are generally open to the public in Hong Kong. Both the IPO Price and the number of Investor Shares shall be determined by the Joint Global Coordinators

and the Company pursuant to this Agreement, and such determination shall be conclusive in the absence of manifest error.

2. AGREEMENT CONDITIONAL UPON COMPLETION OF GLOBAL OFFERING

- 2.1 The Investor's agreement in Clause 1 above (and the right of the Investor to acquire the Investor Shares) is conditional upon the underwriting agreements for each of the Hong Kong Public Offering and the International Offering being entered into by, inter alia, the Company and the Joint Global Coordinators and having become effective and unconditional and not having been terminated (in accordance with their respective original terms or as subsequently varied by agreement of the relevant parties). There can be no guarantee that the Global Offering will be completed or not be terminated, and no liability of the Company and/or the Joint Global Coordinators to the Investor or the Investor Subsidiary, as the case may be, will arise if the Global Offering is not duly completed for any reason by the dates and times contemplated or at all.

3. CLOSING

- 3.1 Subject to Clause 2 and Clause 3.2, the Investor shall pay the aggregate of the IPO Price for the Investor Shares, together with an amount equal to the aggregate of (i) a brokerage fee of 1%, (ii) the Hong Kong Stock Exchange trading fee of 0.005%, and (iii) the SFC transaction levy of 0.004%, in each case calculated by reference to the aggregate IPO Price for all Investor Shares ("**Brokerage and Levies**"), by same day value credit in clear funds and without deduction or set-off whatsoever (to such Hong Kong dollar bank account as may be notified to the Investor by the Joint Global Coordinators in writing no later than two Hong Kong banking days prior to the due date for payment) on the Delivery Date (as defined in Clause 3.5) to the Joint Global Coordinators, and delivery of the Investor Shares to the Investor or the Investor Subsidiary, as the case may be, shall be made by the issue and delivery of share certificates or at the option of the Investor, through the Hong Kong Central Clearing and Settlement System for the account of the Investor or the Investor Subsidiary, as the case may be, not later than 9:30 a.m. (or such other time as notified by the Joint Global Coordinators) on the Delivery Date or, to the extent the Joint Global Coordinators notify the Investor in writing no later than two Hong Kong banking days prior to the Delivery Date that they will defer delivery of the Investor Shares, on the Delayed Delivery Date.
- 3.2 Delivery of the Investor Shares may also be made in any other manner which the Company, the Joint Global Coordinators and the Investor may otherwise agree to in writing.
- 3.3 The Delivery Date for the Investor Shares is currently expected to be not later than the date on which the H Shares are first listed on the Hong Kong Stock Exchange (the "**Listing Date**"). The Listing Date is currently expected to be 13 March 2008. The Joint Global Coordinators shall promptly notify the Investor of any delay in the Delivery Date.
- 3.4 For the avoidance of doubt, the proceeds from the sale of the H Shares comprised in the Global Offering to be received by the Company on the Listing Date shall exclude the

Investor Shares to the extent that the Delivery Date for such Investor Shares is subsequent to the Listing Date.

- 3.5 For the purpose of this Agreement, “**Delivery Date**” means, subject to the underwriting agreement for the Hong Kong Public Offering and the underwriting agreement for the International Offering being entered into and having become effective and unconditional and not having been terminated, on or before 8.00 a.m. on the Listing Date (currently expected to be no later than 13 March 2008) unless the Joint Global Coordinators notify the Investor that the Investor Shares will be delivered on the Delayed Delivery Date in accordance with Clause 3.1 the day on which the Investor Shares are delivered to the Investor or the Investor Subsidiary.
- 3.6 For the purpose of this Agreement, “**Delayed Delivery Date**” means such time and date as the Joint Global Coordinators may notify the Investor by not less than two days’ prior written notice pursuant to Clause 3.1, which shall be a Hong Kong banking day later than the Delivery Date but no later than two Hong Kong banking days following the 30th day after the date expected to be the latest date for lodging applications under the Hong Kong Public Offering, at which time and date the Investor Shares shall be delivered to the Investor or the Investor Subsidiary, as the case may be.
- 3.7 If the Delivery Date is not later than the Listing Date, the Company will then issue the Investor Shares to the Investor or the Investor Subsidiary, as the case may be, on the Listing Date. If the delivery of the Investor Shares shall take place on the Delayed Delivery Date, the Joint Global Coordinators will procure the issue or delivery of the Investor Shares to the Investor by exercising the Over-allotment Option (as defined in the Hong Kong prospectus for the Global Offering) or otherwise acquiring sufficient number of shares from the secondary market to deliver the Investor Shares.
- 3.8 As an alternative to the deferred delivery arrangements referred to in Clauses 3.1 to 3.7 upon request of the Joint Global Coordinators, the Investor undertakes to negotiate in good faith with the stabilising manager appointed by the Joint Global Coordinators in connection with the Global Offering (the “**Stabilising Manager**”) with a view to agreeing the provisions of a stock borrowing agreement on terms reasonably acceptable to both parties, under which the Investor shall agree to lend to the Stabilising Manager such number of the Investor Shares at the Stabilising Manager’s option as is equal to or not exceeding the number of the Investor Shares.

4. **RESTRICTIONS ON DISPOSAL BY THE INVESTOR**

WHEREAS:

- (A) The Company is applying for a listing for its overseas listed foreign invested shares (“**H Shares**”) on the Main Board of The Stock Exchange of Hong Kong Limited (the “**Hong Kong Stock Exchange**”) by way of a global offering (the “**Global Offering**”) of its H Shares comprising:
 - (i) a public offer by the Company of its H Shares for subscription in Hong Kong (the “**Hong Kong Public Offering**”); and
 - (ii) private placements by the Company of H Shares outside the United States, in offshore transactions to “non-U.S. persons” in reliance on Regulation S (“**Regulation S**”) under the US Securities Act of 1933, as amended (the “**Securities Act**”) and in the United States to qualified institutional buyers, as defined in Rule 144A of the Securities Act or other available exemption from registration under the US Securities Act (collectively, the “**International Offering**”).
- (B) The Investor wishes to make an equity investment in the Company as part of the International Offering on the terms and conditions set out in this Agreement.

IT IS AGREED as follows:

1. INVESTMENT

- 1.1 Subject to the conditions specified in this Agreement, the Investor will acquire the Investor Shares (as defined in Clause 1.4) at the IPO Price (as defined in Clause 1.4) under and as part of the International Offering through the Joint Global Coordinators or their affiliates in their capacity as underwriters of the relevant portion of the International Offering, and each of the Company and the Joint Global Coordinators agrees that the Investor shall be issued the Investor Shares at the IPO Price on the Delivery Date, or where applicable, pursuant to Clause 3.1, the Delayed Delivery Date.
- 1.2 The Investor may elect by notice in writing served to the Joint Global Coordinators not later than two Hong Kong banking days (as defined in Clause 1.4) prior to the Delivery Date to acquire the Investor Shares through a wholly-owned subsidiary of the Investor that is a “professional investor” as defined in Part I of Schedule 1 to the Securities and Futures Ordinance of Hong Kong and is not a U.S. person as defined in Rule 902 of Regulation S under the Securities Act (the “Investor Subsidiary”), in which case the agreements, representations, undertakings, acknowledgements and confirmations given in this Agreement shall be deemed to be given by the Investor for itself and on behalf of the Investor Subsidiary.
- 1.3 The number of Investor Shares to be acquired by the Investor under this Agreement will not be affected by any re-allocation of H Shares between the International Offering and the Hong Kong Public Offering in the event of over-subscription under the Hong Kong Public Offering nor by any exercise of the over-allotment option to be granted by the Company to the Joint Global Coordinators on behalf of the international underwriters for the Global Offering.
- 1.4 For the purposes of this Agreement, the “Investor Shares” means such number of H Shares offered by the Company to the Investor or the Investor Subsidiary in the International Offering equal to the maximum number of H Shares that may be purchased with US\$50 million (or its Hong Kong dollars equivalent based on the closing middle point spot rate quoted by The Hongkong and Shanghai Banking Corporation Limited for United States dollars at the close of business in Hong Kong on the date on which the IPO Price is determined) (“Investment Amount”) at the IPO Price, rounded down to the nearest board lot; the “IPO Price” means the price per H Share at which the H Shares are acquired by investors under the International Offering, expressed in Hong Kong dollars (exclusive of Brokerage and Levies, as defined in Clause 3.1), and determined as referred to in Clause 5.1; and “Hong Kong banking day” means any day except a Saturday, Sunday or other day on which commercial banks in Hong Kong are generally open to the public in Hong Kong. Both the IPO Price and the number of Investor Shares shall be determined by the Joint Global Coordinators and the Company pursuant to this Agreement, and such determination shall be conclusive in the absence of manifest error.

2. AGREEMENT CONDITIONAL UPON COMPLETION OF GLOBAL OFFERING

- 2.1 The Investor's agreement in Clause 1 above (and the right of the Investor to acquire the Investor Shares) is conditional upon the underwriting agreements for each of the Hong Kong Public Offering and the International Offering being entered into by, inter alia, the Company and the Joint Global Coordinators and having become effective and unconditional and not having been terminated (in accordance with their respective original terms or as subsequently varied by agreement of the relevant parties). There can be no guarantee that the Global Offering will be completed or not be terminated, and no liability of the Company and/or the Joint Global Coordinators to the Investor or the Investor Subsidiary, as the case may be, will arise if the Global Offering is not duly completed for any reason by the dates and times contemplated or at all.

3. CLOSING

- 3.1 Subject to Clause 2 and Clause 3.2, the Investor shall pay the aggregate of the IPO Price for the Investor Shares, together with an amount equal to the aggregate of (i) a brokerage fee of 1%, (ii) the Hong Kong Stock Exchange trading fee of 0.005%, and (iii) the SFC transaction levy of 0.004%, in each case calculated by reference to the aggregate IPO Price for all Investor Shares ("**Brokerage and Levies**"), by same day value credit in clear funds and without deduction or set-off whatsoever (to such Hong Kong dollar bank account as may be notified to the Investor by the Joint Global Coordinators in writing no later than two Hong Kong banking days prior to the due date for payment) on the Delivery Date (as defined in Clause 3.5) to the Joint Global Coordinators, and delivery of the Investor Shares to the Investor or the Investor Subsidiary, as the case may be, shall be made through the Hong Kong Central Clearing and Settlement System for the account of the Investor or the Investor Subsidiary, as the case may be, not later than 9.30 a.m. (or such other time as notified by the Joint Global Coordinators) on the Delivery Date or, to the extent the Joint Global Coordinators notify the Investor in writing no later than two Hong Kong banking days prior to the Delivery Date that they will defer delivery of the Investor Shares, on the Delayed Delivery Date.
- 3.2 Delivery of the Investor Shares may also be made in any other manner which the Company, the Joint Global Coordinators and the Investor may otherwise agree to in writing.
- 3.3 Delivery Date for the Investor Shares is currently expected to be not later than the date on which the H Shares are first listed on the Hong Kong Stock Exchange (the "**Listing Date**"). The Joint Global Coordinators shall promptly notify the Investor of any delay in the Delivery Date.
- 3.4 For the avoidance of doubt, the proceeds from the sale of the H Shares comprised in the Global Offering to be received by the Company on the Listing Date shall exclude the Investor Shares to the extent that the Delivery Date for such Investor Shares is subsequent to the Listing Date.
- 3.5 For the purpose of this Agreement, "**Delivery Date**" means, subject to the underwriting

agreement for the Hong Kong Public Offering and the underwriting agreement for the International Offering being entered into and having become effective and unconditional and not having been terminated, on or before 8.00 a.m. on the Listing Date (currently expected to be no later than the Listing Date) unless the Joint Global Coordinators notify the Investor that the Investor Shares will be delivered on the Delayed Delivery Date in accordance with Clause 3.1 the day on which the Investor Shares are delivered to the Investor or the Investor Subsidiary.

- 3.6 For the purpose of this Agreement, “**Delayed Delivery Date**” means such time and date as the Joint Global Coordinators may notify the Investor by not less than two days’ prior written notice pursuant to Clause 3.1, which shall be a Hong Kong banking day later than the Delivery Date but no later than two Hong Kong banking days following the 30th day after the date expected to be the latest date for lodging applications under the Hong Kong Public Offering, at which time and date the Investor Shares shall be delivered to the Investor or the Investor Subsidiary, as the case may be.
- 3.7 If the Delivery Date is currently expected to be not later than the Listing Date and the Company will then issue the Investor Shares to the Investor or the Investor Subsidiary, as the case may be. If the delivery of the Investor Shares shall take place on the Delayed Delivery Date, the Joint Global Coordinators will procure the issue or delivery of the Investor Shares to the Investor by exercising the Over-allotment Option (as defined in the Hong Kong prospectus for the Global Offering) or otherwise acquiring sufficient number of shares from the secondary market to deliver the Investor Shares.
- 3.8 As an alternative to the deferred delivery arrangements referred to in Clauses 3.1 to 3.7 upon request of the Joint Global Coordinators, the Investor undertakes to negotiate in good faith with the stabilising manager appointed by the Joint Global Coordinators in connection with the Global Offering (the “**Stabilising Manager**”) with a view to agreeing the provisions of a stock borrowing agreement on terms reasonably acceptable to both parties, under which the Investor shall agree to lend to the Stabilising Manager such number of the Investor Shares at the Stabilising Manager’s option as is equal to or not exceeding the number of the Investor Shares.

WHEREAS:

- (A) The Company is applying for a listing for its overseas listed foreign invested shares (“**H Shares**”) on the Main Board of The Stock Exchange of Hong Kong Limited (the “**Hong Kong Stock Exchange**”) by way of a global offering (the “**Global Offering**”) of its H Shares comprising:

 - (ii) private placements by the Company of H Shares outside the United States, in offshore transactions to “non-U.S. persons” in reliance on Regulation S (“**Regulation S**”) under the US Securities Act of 1933, as amended (the “**Securities Act**”) and in the United States to qualified institutional buyers, as

- (B) The Investor wishes to make an equity investment in the Company as part of the International Offering on the terms and conditions set out in this Agreement.

IT IS AGREED as follows:

1. INVESTMENT

- 1.1 Subject to the conditions specified in this Agreement, the Investor will acquire the Investor Shares (as defined in Clause 1.4) at the IPO Price (as defined in Clause 1.4) under and as part of the International Offering through the Joint Global Coordinators or their affiliates in their capacity as underwriters of the relevant portion of the International Offering, and each of the Company and the Joint Global Coordinators agrees that the Investor shall be issued the Investor Shares at the IPO Price on the Delivery Date, or where applicable, pursuant to Clause 3.1, the Delayed Delivery Date.
- 1.2 The Investor may elect by notice in writing served to the Joint Global Coordinators not later than two Hong Kong banking days (as defined in Clause 1.4) prior to the Delivery Date to acquire the Investor Shares through a wholly-owned subsidiary of the Investor that is a “professional investor” as defined in Part I of Schedule 1 to the Securities and Futures Ordinance of Hong Kong and is not a U.S. person as defined in Rule 902 of Regulation S under the Securities Act (the “**Investor Subsidiary**”), in which case the agreements, representations, undertakings, acknowledgements and confirmations given in this Agreement shall be deemed to be given by the Investor for itself and on behalf of the Investor Subsidiary.
- 1.3 The number of Investor Shares to be acquired by the Investor under this Agreement will not be affected by any re-allocation of H Shares between the International Offering and the Hong Kong Public Offering in the event of over-subscription under the Hong Kong Public Offering nor by any exercise of the over-allotment option to be granted by the Company to the Joint Global Coordinators on behalf of the international underwriters for the Global Offering.
- 1.4 For the purposes of this Agreement, the “**Investor Shares**” means such number of H Shares offered by the Company to the Investor or the Investor Subsidiary in the International Offering equal to the maximum number of H Shares that may be purchased with US\$50 million (or its Hong Kong dollars equivalent based on the closing middle point spot rate quoted by The Hongkong and Shanghai Banking Corporation Limited for United States dollars at the close of business in Hong Kong on the date on which the IPO Price is determined) (“**Investment Amount**”) at the IPO Price, rounded down to the nearest board lot; the “**IPO Price**” means the price per H Share at which the H Shares are acquired by investors under the International Offering, expressed in Hong Kong dollars (exclusive of Brokerage and Levies, as defined in Clause 3.1), and determined as referred to in Clause 5.1; and “**Hong Kong banking day**” means any day except a Saturday, Sunday or other day on which commercial

banks in Hong Kong are generally open to the public in Hong Kong. Both the IPO Price and the number of Investor Shares shall be determined by the Joint Global Coordinators and the Company pursuant to this Agreement, and such determination shall be conclusive in the absence of manifest error.

2. **AGREEMENT CONDITIONAL UPON COMPLETION OF GLOBAL OFFERING**

- 2.1 The Investor's agreement in Clause 1 above (and the right of the Investor to acquire the Investor Shares) is conditional upon the underwriting agreements for each of the Hong Kong Public Offering and the International Offering being entered into by, inter alia, the Company and the Joint Global Coordinators and having become effective and unconditional and not having been terminated (in accordance with their respective original terms or as subsequently varied by agreement of the relevant parties). There can be no guarantee that the Global Offering will be completed or not be terminated, and no liability of the Company and/or the Joint Global Coordinators to the Investor or the Investor Subsidiary, as the case may be, will arise if the Global Offering is not duly completed for any reason by the dates and times contemplated or at all.

3. **CLOSING**

- 3.1 Subject to Clause 2 and Clause 3.2, the Investor shall pay the aggregate of the IPO Price for the Investor Shares, together with an amount equal to the aggregate of (i) a brokerage fee of 1%, (ii) the Hong Kong Stock Exchange trading fee of 0.005%, and (iii) the SFC transaction levy of 0.004%, in each case calculated by reference to the aggregate IPO Price for all Investor Shares ("**Brokerage and Levies**"), by same day value credit in clear funds and without deduction or set-off whatsoever (to such Hong Kong dollar bank account as may be notified to the Investor by the Joint Global Coordinators in writing no later than two Hong Kong banking days prior to the due date for payment) on the Delivery Date (as defined in Clause 3.5) to the Joint Global Coordinators, and delivery of the Investor Shares to the Investor or the Investor Subsidiary, as the case may be, shall be made through the Hong Kong Central Clearing and Settlement System for the account of the Investor or the Investor Subsidiary, as the case may be, not later than 9:30 a.m. (or such other time as notified by the Joint Global Coordinators) on the Delivery Date or, to the extent the Joint Global Coordinators notify the Investor in writing no later than two Hong Kong banking days prior to the Delivery Date that they will defer delivery of the Investor Shares, on the Delayed Delivery Date.
- 3.2 Delivery of the Investor Shares may also be made in any other manner which the Company, the Joint Global Coordinators and the Investor may otherwise agree to in writing.
- 3.3 Delivery Date for the Investor Shares is currently expected to be not later than the date on which the H Shares are first listed on the Hong Kong Stock Exchange (the "**Listing Date**"). The Joint Global Coordinators shall promptly notify the Investor of any delay in the Delivery Date.
- 3.4 For the avoidance of doubt, the proceeds from the sale of the H Shares comprised in the

Global Offering to be received by the Company on the Listing Date shall exclude the Investor Shares to the extent that the Delivery Date for such Investor Shares is subsequent to the Listing Date.

- 3.5 For the purpose of this Agreement, “**Delivery Date**” means, subject to the underwriting agreement for the Hong Kong Public Offering and the underwriting agreement for the International Offering being entered into and having become effective and unconditional and not having been terminated, on or before 8.00 a.m. on the Listing Date (currently expected to be no later than the Listing Date) unless the Joint Global Coordinators notify the Investor that the Investor Shares will be delivered on the Delayed Delivery Date in accordance with Clause 3.1 the day on which the Investor Shares are delivered to the Investor or the Investor Subsidiary.
- 3.6 For the purpose of this Agreement, “**Delayed Delivery Date**” means such time and date as the Joint Global Coordinators may notify the Investor by not less than two days’ prior written notice pursuant to Clause 3.1, which shall be a Hong Kong banking day later than the Delivery Date but no later than two Hong Kong banking days following the 30th day after the date expected to be the latest date for lodging applications under the Hong Kong Public Offering, at which time and date the Investor Shares shall be delivered to the Investor or the Investor Subsidiary, as the case may be.
- 3.7 If the Delivery Date is currently expected to be not later than the Listing Date and the Company will then issue the Investor Shares to the Investor or the Investor Subsidiary, as the case may be. If the delivery of the Investor Shares shall take place on the Delayed Delivery Date, the Joint Global Coordinators will procure the issue or delivery of the Investor Shares to the Investor by exercising the Over-allotment Option (as defined in the Hong Kong prospectus for the Global Offering) or otherwise acquiring sufficient number of shares from the secondary market to deliver the Investor Shares.
- 3.8 As an alternative to the deferred delivery arrangements referred to in Clauses 3.1 to 3.7 upon request of the Joint Global Coordinators, the Investor undertakes to negotiate in good faith with the stabilising manager appointed by the Joint Global Coordinators in connection with the Global Offering (the “**Stabilising Manager**”) with a view to agreeing the provisions of a stock borrowing agreement on terms reasonably acceptable to both parties, under which the Investor shall agree to lend to the Stabilising Manager such number of the Investor Shares at the Stabilising Manager’s option as is equal to or not exceeding the number of the Investor Shares.

4. RESTRICTIONS ON DISPOSAL BY THE INVESTOR

- 4.1 The Investor (for itself and on behalf of the Investor Subsidiary) covenants with and undertakes to each of the Company and the Joint Global Coordinators that:-

WHEREAS:

- (A) The Company is applying for a listing for its overseas listed foreign invested shares (“**H Shares**”) on the Main Board of The Stock Exchange of Hong Kong Limited (the “**Hong Kong Stock Exchange**”) by way of a global offering (the “**Global Offering**”) of its H Shares comprising:
 - (i) a public offer by the Company of its H Shares for subscription in Hong Kong (the “**Hong Kong Public Offering**”); and
 - (ii) private placements by the Company of H Shares outside the United States, in offshore transactions to “non-U.S. persons” in reliance on Regulation S (“**Regulation S**”) under the US Securities Act of 1933, as amended (the “**Securities Act**”) and in the United States to qualified institutional buyers, as

defined in Rule 144A of the Securities Act or other available exemption from registration under the US Securities Act (collectively, the “**International Offering**”).

- (B) The Investor wishes to make an equity investment in the Company as part of the International Offering on the terms and conditions set out in this Agreement.

IT IS AGREED as follows:

1. INVESTMENT

- 1.1 Subject to the conditions specified in this Agreement, the Investor will acquire the Investor Shares (as defined in Clause 1.4) at the IPO Price (as defined in Clause 1.4) under and as part of the International Offering through the Joint Global Coordinators or their affiliates in their capacity as underwriters of the relevant portion of the International Offering, and each of the Company and the Joint Global Coordinators agrees and undertakes to procure that the Investor shall be issued the Investor Shares at the IPO Price on the Delivery Date, or where applicable, pursuant to Clause 3.1, the Delayed Delivery Date.
- 1.2 The Investor may elect by notice in writing served to the Joint Global Coordinators not later than two Hong Kong banking days (as defined in Clause 1.4) prior to the Delivery Date to acquire the Investor Shares through a wholly-owned subsidiary, direct or indirect, of the Controlling Shareholder that is a “professional investor” as defined in Part I of Schedule 1 to the Securities and Futures Ordinance of Hong Kong and is not a U.S. person as defined in Rule 902 of Regulation S under the Securities Act (the “**Investor Subsidiary**”), in which case (a) the agreements, representations, undertakings, acknowledgements and confirmations given in this Agreement shall be deemed to be given by the Investor for itself and on behalf of the Investor Subsidiary and (b) the rights and benefits granted under this Agreement to the Investor shall be granted to and shall be exercisable by the Investor or the Investor Subsidiary (as the case may be).
- 1.3 The number of Investor Shares to be acquired by the Investor under this Agreement will not be affected by any re-allocation of H Shares between the International Offering and the Hong Kong Public Offering in the event of over-subscription under the Hong Kong Public Offering nor by any exercise of the over-allotment option to be granted by the Company to the Joint Global Coordinators on behalf of the international underwriters for the Global Offering.
- 1.4 For the purposes of this Agreement, the “**Investor Shares**” means such number of H Shares offered by the Company to the Investor or the Investor Subsidiary in the International Offering equal to the maximum number of H Shares that may be purchased with US\$50 million (or its Hong Kong dollars equivalent based on the closing middle point spot rate quoted by The Hongkong and Shanghai Banking Corporation Limited for United States dollars at the close of business in Hong Kong on the date on which the IPO Price is determined) (“**Investment Amount**”) at the IPO Price, rounded down to the nearest board lot; the “**IPO Price**” means the price per H Share at which the H Shares are acquired by investors under the Hong Kong Public

Offering and International Offering, expressed in Hong Kong dollars (exclusive of Brokerage and Levies, as defined in Clause 3.1), and determined as referred to in Clause 5.1; and “**Hong Kong banking day**” means any day except a Saturday, Sunday or other day on which commercial banks in Hong Kong are generally not open to the public in Hong Kong. Both the IPO Price and the number of Investor Shares shall be determined by the Joint Global Coordinators and the Company pursuant to this Agreement, and such determination shall be conclusive in the absence of manifest error.

2. **AGREEMENT CONDITIONAL UPON COMPLETION OF GLOBAL OFFERING**

- 2.1 The Investor’s obligations in Clause 1 above (and the right of the Investor to acquire the Investor Shares) is conditional upon (i) the underwriting agreements for each of the Hong Kong Public Offering and the International Offering being entered into by, inter alia, the Company and the Joint Global Coordinators and having become effective and unconditional and not having been terminated (in accordance with their respective original terms or as subsequently varied by agreement of the relevant parties) by no later than 8:00a.m. on the 13 day of March, 2008; and (ii) the Listing Committee of the Hong Kong Stock Exchange having granted the listing of, and permission to deal in, the H Shares on the Main Board of the Hong Kong Stock Exchange. There can be no guarantee that the Global Offering will be completed or not be terminated, and no liability of the Company and/or the Joint Global Coordinators to the Investor or the Investor Subsidiary, as the case may be, will arise if the Global Offering is not duly completed for any reason by the dates and times contemplated or at all.

3. **CLOSING**

- 3.1 Subject to Clause 2 and Clause 3.2, the Investor shall pay the aggregate of the IPO Price for the Investor Shares, together with an amount equal to the aggregate of (i) a brokerage fee of 1%, (ii) the Hong Kong Stock Exchange trading fee of 0.005%, and (iii) the transaction levy imposed by the Securities and Futures Commission of 0.004%, in each case calculated by reference to the aggregate IPO Price for all Investor Shares (“**Brokerage and Levies**”), by same day value credit in clear funds and without deduction or set-off whatsoever (to such Hong Kong dollar bank account as may be notified to the Investor by the Joint Global Coordinators in writing no later than five Hong Kong banking days prior to the due date for payment) on the Delivery Date (as defined in Clause 3.5) to the Joint Global Coordinators, and the Company and the Joint Global Coordinators shall procure the delivery of the Investor Shares in the name of, and to, the Investor or the Investor Subsidiary, as the case may be, which shall be made through the Hong Kong Central Clearing and Settlement System for the account of the Investor or the Investor Subsidiary, as the case may be, not later than 9:30 a.m. (or such other time as notified by the Joint Global Coordinators) on the Delivery Date or, subject to Clause 3.6, the Delayed Delivery Date.
- 3.2 Delivery of the Investor Shares may also be made in any other manner which the Company, the Joint Global Coordinators and the Investor may otherwise agree to in writing.
- 3.3 The Delivery Date for the Investor Shares is currently expected to be not later than 13

March 2008, the date on which the H Shares are first listed on the Hong Kong Stock Exchange (the “**Listing Date**”). The Joint Global Coordinators shall promptly notify the Investor in writing of any delay in the Delivery Date.

- 3.4 For the avoidance of doubt, the proceeds from the sale of the H Shares comprised in the Global Offering to be received by the Company on the Listing Date shall exclude the Investor Shares to the extent that the Delivery Date for such Investor Shares is subsequent to the Listing Date.
- 3.5 For the purpose of this Agreement, “**Delivery Date**” means, subject to the underwriting agreement for the Hong Kong Public Offering and the underwriting agreement for the International Offering being entered into and having become effective and unconditional and not having been terminated, at or before 8.00 a.m. on the Listing Date unless the Joint Global Coordinators notify the Investor in writing that the Investor Shares will be issued and delivered on the Delayed Delivery Date in accordance with Clause 3.1, in which case, the Delivery Date shall be the Delayed Delivery Date.
- 3.6 For the purpose of this Agreement, “**Delayed Delivery Date**” means such time and date as the Joint Global Coordinators may notify the Investor by not less than two Hong Kong banking days’ prior written notice, which shall be a Hong Kong banking day later than the Delivery Date but no later than two Hong Kong banking days following the 30th day after the latest date for lodging applications under the Hong Kong Public Offering as set out in the prospectus to be issued by the Company in connection with the Public Offering, at which time and date payment for the Investor Shares shall be made and the Investor Shares shall be simultaneously delivered to the Investor or the Investor Subsidiary, as the case may be.
- 3.7 The Delivery Date is currently expected to be not later than the Listing Date and the Company will then issue the Investor Shares to the Investor or the Investor Subsidiary, as the case may be. If the delivery of the Investor Shares shall take place on the Delayed Delivery Date, the Joint Global Coordinators will procure the issue or delivery of the Investor Shares to the Investor or the Investor Subsidiary (as the case may be) by exercising the Over-allotment Option (as defined in the Hong Kong prospectus for the Global Offering) or otherwise acquiring sufficient number of H Shares from the secondary market to deliver the Investor Shares.

- (B) The Investor wishes to make an equity investment in the Company as part of the International Offering on the terms and conditions set out in this Agreement.

IT IS AGREED as follows:

1. INVESTMENT

- 1.1 Subject to the conditions specified in this Agreement, the Investor will acquire the Investor Shares (as defined in Clause 1.4) at the IPO Price (as defined in Clause 1.4) under and as part of the International Offering through the Joint Global Coordinators or their affiliates in their capacity as underwriters of the relevant portion of the International Offering, and each of the Company and the Joint Global Coordinators agrees that the Investor shall be issued the Investor Shares at the IPO Price on the Delivery Date, or where applicable, pursuant to Clause 3.1, the Delayed Delivery Date.
- 1.2 The number of Investor Shares to be acquired by the Investor under this Agreement will not be affected by any re-allocation of H Shares between the International Offering and the Hong Kong Public Offering in the event of over-subscription under the Hong Kong Public Offering nor by any exercise of the over-allotment option to be granted by the Company to the Joint Global Coordinators on behalf of the international underwriters for the Global Offering.
- 1.3 For the purposes of this Agreement, the “**Investor Shares**” means such number of H Shares offered by the Company to the Investor in the International Offering equal to the maximum number of H Shares that may be purchased with US\$50 million (or its Hong Kong dollars equivalent based on the closing middle point spot rate quoted by The Hongkong and Shanghai Banking Corporation Limited for United States dollars at the close of business in Hong Kong on the date on which the IPO Price is determined) (“**Investment Amount**”) at the IPO Price, rounded down to the nearest board lot; the “**IPO Price**” means the price per H Share at which the H Shares are acquired by investors under the International Offering, expressed in Hong Kong dollars (exclusive of Brokerage and Levies, as defined in Clause 3.1), and determined as referred to in Clause 5.1; and “**Hong Kong banking day**” means any day except a Saturday, Sunday or other day on which commercial banks in Hong Kong are generally open to the public in Hong Kong. Both the IPO Price and the number of Investor Shares shall be determined by the Joint Global Coordinators and the Company pursuant to this Agreement, and such determination shall be conclusive in the absence of manifest error.

2. AGREEMENT CONDITIONAL UPON COMPLETION OF GLOBAL OFFERING

- 2.1 The Investor’s agreement in Clause 1 above (and the right of the Investor to acquire the Investor Shares) is conditional upon the underwriting agreements for each of the Hong

Kong Public Offering and the International Offering being entered into by, inter alia, the Company and the Joint Global Coordinators and having become effective and unconditional and not having been terminated (in accordance with their respective original terms or as subsequently varied by agreement of the relevant parties). There can be no guarantee that the Global Offering will be completed or not be terminated, and no liability of the Company and/or the Joint Global Coordinators to the Investor, as the case may be, will arise if the Global Offering is not duly completed for any reason by the dates and times contemplated or at all.

3. CLOSING

- 3.1 Subject to Clause 2 and Clause 3.2, the Investor shall pay the aggregate of the IPO Price for the Investor Shares, together with an amount equal to the aggregate of (i) a brokerage fee of 1%, (ii) the Hong Kong Stock Exchange trading fee of 0.005%, and (iii) the SFC transaction levy of 0.004%, in each case calculated by reference to the aggregate IPO Price for all Investor Shares ("**Brokerage and Levies**"), by same day value credit in clear funds and without deduction or set-off whatsoever (to such Hong Kong dollar bank account as may be notified to the Investor by the Joint Global Coordinators in writing no later than two Hong Kong banking days prior to the due date for payment) on the Delivery Date (as defined in Clause 3.5) to the Joint Global Coordinators, and delivery of the Investor Shares to the Investor shall be made through the Hong Kong Central Clearing and Settlement System for the account of the Investor, as the case may be, not later than 9:30 a.m. (or such other time as notified by the Joint Global Coordinators) on the Delivery Date or, to the extent the Joint Global Coordinators notify the Investor in writing no later than two Hong Kong banking days prior to the Delivery Date that they will defer delivery of the Investor Shares, on the Delayed Delivery Date.
- 3.2 Delivery of the Investor Shares may also be made in any other manner which the Company, the Joint Global Coordinators and the Investor may otherwise agree to in writing.
- 3.3 Delivery Date for the Investor Shares is currently expected to be not later than the date on which the H Shares are first listed on the Hong Kong Stock Exchange (the "**Listing Date**"). The Joint Global Coordinators shall promptly notify the Investor of any delay in the Delivery Date.
- 3.4 For the avoidance of doubt, the proceeds from the sale of the H Shares comprised in the Global Offering to be received by the Company on the Listing Date shall exclude the Investor Shares to the extent that the Delivery Date for such Investor Shares is subsequent to the Listing Date.
- 3.5 For the purpose of this Agreement, "**Delivery Date**" means, subject to the underwriting agreement for the Hong Kong Public Offering and the underwriting agreement for the International Offering being entered into and having become effective and unconditional and not having been terminated, on or before 8.00 a.m. on the Listing Date (currently expected to be no later than the Listing Date) unless the Joint Global Coordinators notify the Investor that the Investor Shares will be delivered on the

Delayed Delivery Date in accordance with Clause 3.1 the day on which the Investor Shares are delivered to the Investor.

- 3.6 For the purpose of this Agreement, “**Delayed Delivery Date**” means such time and date as the Joint Global Coordinators may notify the Investor by not less than two days’ prior written notice pursuant to Clause 3.1, which shall be a Hong Kong banking day later than the Delivery Date but no later than two Hong Kong banking days following the 30th day after the date expected to be the latest date for lodging applications under the Hong Kong Public Offering, at which time and date the Investor Shares shall be delivered to the Investor.
- 3.7 If the Delivery Date is currently expected to be not later than the Listing Date and the Company will then issue the Investor Shares to the Investor. If the delivery of the Investor Shares shall take place on the Delayed Delivery Date, the Joint Global Coordinators will procure the issue or delivery of the Investor Shares to the Investor by exercising the Over-allotment Option (as defined in the Hong Kong prospectus for the Global Offering) or otherwise acquiring sufficient number of shares from the secondary market to deliver the Investor Shares.
- 3.8 As an alternative to the deferred delivery arrangements referred to in Clauses 3.1 to 3.7 upon request of the Joint Global Coordinators, the Investor undertakes (and the Controlling Shareholder shall procure the Investor) to negotiate in good faith with the stabilising manager appointed by the Joint Global Coordinators in connection with the Global Offering (the “**Stabilising Manager**”) with a view to agreeing the provisions of a stock borrowing agreement on terms reasonably acceptable to both parties, under which the Investor shall agree to lend to the Stabilising Manager such number of the Investor Shares at the Stabilising Manager’s option as is equal to or not exceeding the number of the Investor Shares.

4. **RESTRICTIONS ON DISPOSAL BY THE INVESTOR**

- 4.1 Each of the Investor and the Controlling Shareholder covenants with and undertakes to each of the Company and the Joint Global Coordinators that:-

- (b) in the event of a disposal of any Relevant Shares at any time after the Lock-up Period, the Investor will use all reasonable endeavours to ensure that any such disposal will not create a disorderly or false market for the H Shares and is otherwise in compliance with the Securities and Futures Ordinance of Hong Kong and all relevant securities laws and regulations and rules of securities exchanges of all competent jurisdictions.

- 4.2 The Investor agrees that, save with the prior written consent of the Company, the aggregate holding (direct and indirect) of the Investor and its associates (as defined in the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited (“**Listing Rules**”)) in the total issued share capital of the Company shall be less than 10% of the Company’s total issued share capital, in so far as the Investor has actual control of or its nominees form a majority on the board of directors of its associates.
- 4.3 For the purpose of this Clause 4, references to “**dispose of**” or “**disposal**” include in respect of any H Shares, offering, pledging, charging, selling, assigning, mortgaging, lending, creating, transferring or otherwise disposing of any legal or beneficial interest (including by the creation of or an agreement to create or selling or granting or agreeing to sell or grant any option or contract to purchase or any warrant or right to purchase) in the H Shares or any securities convertible into or exercisable or exchangeable for such H Shares, or contracting to do so, whether directly or indirectly, or entering into any swap or other arrangement that transfers to another, in whole or in part, any of the economic consequences or incidents of ownership of such H Shares or securities whether any of the foregoing transactions is to be settled by delivery of, for the purpose of this Agreement, H Shares or such other securities, cash or otherwise; and “**Relevant Shares**” means the Investor Shares and any shares or other securities of the Company deriving from the Investor Shares or any interest therein, including but not limited to any convertibles, equity-linked securities and derivatives with underlying assets being the Investor Shares (pursuant to any rights issue, capitalisation issue, capital reorganization or otherwise) whether such other transaction is to be settled by delivery of the Relevant Shares in cash or otherwise.

WHEREAS:

- (A) The Company is applying for a listing for its overseas listed foreign invested shares (“**H Shares**”) on the Main Board of The Stock Exchange of Hong Kong Limited (the “**Hong Kong Stock Exchange**”) by way of a global offering (the “**Global Offering**”) of its H Shares comprising:
 - (i) a public offer by the Company of its H Shares for subscription in Hong Kong (the “**Hong Kong Public Offering**”); and
 - (ii) private placements by the Company of H Shares outside the United States, in offshore transactions to “non-U.S. persons” in reliance on Regulation S (“**Regulation S**”) under the US Securities Act of 1933, as amended (the “**Securities Act**”) and in the United States to qualified institutional buyers, as defined in Rule 144A of the Securities Act or other available exemption from registration under the US Securities Act (collectively, the “**International Offering**”).
- (B) The Investor wishes to make an equity investment in the Company as part of the

International Offering on the terms and conditions set out in this Agreement.

IT IS AGREED as follows:

1. INVESTMENT

- 1.1 Subject to the conditions specified in this Agreement, the Investor will acquire the Investor Shares (as defined in Clause 1.4) at the IPO Price (as defined in Clause 1.4) under and as part of the International Offering through the Joint Global Coordinators or their affiliates in their capacity as underwriters of the relevant portion of the International Offering, and each of the Company and the Joint Global Coordinators agrees that the Investor shall be issued the Investor Shares at the IPO Price on the Delivery Date, or where applicable, pursuant to Clause 3.1, the Delayed Delivery Date.

- 1.3 The number of Investor Shares to be acquired by the Investor under this Agreement will not be affected by any re-allocation of H Shares between the International Offering and the Hong Kong Public Offering in the event of over-subscription under the Hong Kong Public Offering nor by any exercise of the over-allotment option to be granted by the Company to the Joint Global Coordinators on behalf of the international underwriters for the Global Offering.
- 1.4 For the purposes of this Agreement, the “**Investor Shares**” means such number of H Shares offered by the Company to the Investor or the Investor Subsidiary in the International Offering equal to the maximum number of H Shares that may be purchased with US\$50 million (or its Hong Kong dollars equivalent based on the closing middle point spot rate quoted by The Hongkong and Shanghai Banking Corporation Limited for United States dollars at the close of business in Hong Kong on the date on which the IPO Price is determined) (“**Investment Amount**”) at the IPO Price, rounded down to the nearest board lot; the “**IPO Price**” means the price per H Share at which the H Shares are acquired by investors under the International Offering, expressed in Hong Kong dollars (exclusive of Brokerage and Levies, as defined in Clause 3.1), and determined as referred to in Clause 5.1; and “**Hong Kong banking day**” means any day except a Saturday, Sunday or other day on which commercial banks in Hong Kong are generally open to the public in Hong Kong. Both the IPO Price and the number of Investor Shares shall be determined by the Joint Global Coordinators and the Company pursuant to this Agreement, and such determination shall be conclusive in the absence of manifest error.

2. AGREEMENT CONDITIONAL UPON COMPLETION OF GLOBAL OFFERING

- 2.1 The Investor's agreement in Clause 1 above (and the right of the Investor to acquire the Investor Shares) is conditional upon the underwriting agreements for each of the Hong Kong Public Offering and the International Offering being entered into by, inter alia, the Company and the Joint Global Coordinators and having become effective and unconditional and not having been terminated (in accordance with their respective original terms or as subsequently varied by agreement of the relevant parties). There can be no guarantee that the Global Offering will be completed or not be terminated, and no liability of the Company and/or the Joint Global Coordinators to the Investor or the Investor Subsidiary, as the case may be, will arise if the Global Offering is not duly completed for any reason by the dates and times contemplated or at all.

3. CLOSING

- 3.1 Subject to Clause 2 and Clause 3.2, the Investor shall pay the aggregate of the IPO Price for the Investor Shares, together with an amount equal to the aggregate of (i) a brokerage fee of 1%, (ii) the Hong Kong Stock Exchange trading fee of 0.005%, and (iii) the SFC transaction levy of 0.004%, in each case calculated by reference to the aggregate IPO Price for all Investor Shares ("**Brokerage and Levies**"), by same day value credit in clear funds and without deduction or set-off whatsoever (to such Hong Kong dollar bank account as may be notified to the Investor by the Joint Global Coordinators in writing no later than two Hong Kong banking days prior to the due date for payment) on the Delivery Date (as defined in Clause 3.5) to the Joint Global Coordinators, and delivery of the Investor Shares to the Investor or the Investor Subsidiary, as the case may be, shall be made through the Hong Kong Central Clearing and Settlement System for the account of the Investor or the Investor Subsidiary, as the case may be, not later than 9:30 a.m. (or such other time as notified by the Joint Global Coordinators) on the Delivery Date or, to the extent the Joint Global Coordinators notify the Investor in writing no later than two Hong Kong banking days prior to the Delivery Date that they will defer delivery of the Investor Shares, on the Delayed Delivery Date.
- 3.2 Delivery of the Investor Shares may also be made in any other manner which the Company, the Joint Global Coordinators and the Investor may otherwise agree to in writing.
- 3.3 Delivery Date for the Investor Shares is currently expected to be not later than the date on which the H Shares are first listed on the Hong Kong Stock Exchange (the "**Listing Date**"). The Joint Global Coordinators shall promptly notify the Investor of any delay in the Delivery Date.
- 3.4 For the avoidance of doubt, the proceeds from the sale of the H Shares comprised in the Global Offering to be received by the Company on the Listing Date shall exclude the Investor Shares to the extent that the Delivery Date for such Investor Shares is subsequent to the Listing Date.
- 3.5 For the purpose of this Agreement, "**Delivery Date**" means, subject to the underwriting

agreement for the Hong Kong Public Offering and the underwriting agreement for the International Offering being entered into and having become effective and unconditional and not having been terminated, on or before 8.00 a.m. on the Listing Date (currently expected to be no later than the Listing Date) unless the Joint Global Coordinators notify the Investor that the Investor Shares will be delivered on the Delayed Delivery Date in accordance with Clause 3.1 the day on which the Investor Shares are delivered to the Investor or the Investor Subsidiary.

- 3.6 For the purpose of this Agreement, “**Delayed Delivery Date**” means such time and date as the Joint Global Coordinators may notify the Investor by not less than two days’ prior written notice pursuant to Clause 3.1, which shall be a Hong Kong banking day later than the Delivery Date but no later than two Hong Kong banking days following the 30th day after the date expected to be the latest date for lodging applications under the Hong Kong Public Offering, at which time and date the Investor Shares shall be delivered to the Investor or the Investor Subsidiary, as the case may be.
- 3.7 The Delivery Date is currently expected to be not later than the Listing Date and the Company will then issue the Investor Shares to the Investor or the Investor Subsidiary, as the case may be. If the delivery of the Investor Shares shall take place on the Delayed Delivery Date, the Joint Global Coordinators will procure the issue or delivery of the Investor Shares to the Investor by exercising the Over-allotment Option (as defined in the Hong Kong prospectus for the Global Offering) or otherwise acquiring sufficient number of shares from the secondary market to deliver the Investor Shares.

4. RESTRICTIONS ON DISPOSAL BY THE INVESTOR

关于进一步促进境外上市公司规范运作和深化改革的意见

境外上市公司（以下简称公司）是到境外筹集资本的公司，是现代企业制度的一种组织形式，在公司治理结构和信息披露等方面有较高的要求。目前，大多数公司在制度创新和转换经营机制方面取得了进展，但也有一些公司的经营机制转换没有完全到位，在规范运作及内部管理等方面存在问题。为进一步促进公司严格遵循境内外有关法律和法规，切实履行对投资者的持续责任，树立公司在境内外资本市场的良好形象，现对公司规范运作和深化改革提出以下意见：

一、公司的经营机构与控股机构必须分开

公司必须按现代企业制度的要求理顺公司管理体制。公司和控股机构（指对公司控股的具有法人资格的公司、企事业单位，下同）必须各自独立核算，独立承担责任和风险。控股机构主要通过股东会以法定程序对公司行使股东权利。公司的机构，特别是董事会、经理层、财务、营销等机构应独立于控股机构；凡是目前没有独立的，必须在1999年底以前分开。控股机构的内设机构与公司的相应部门没有上下级关系，前者不得通过下发文件等形式影响公司机构的独立性。

控股机构向公司派出股权代表依法进入董事会。控股机构的高级管理人员（董事长、副董事长、执行董事）兼任公司董事长、副董事长、执行董事职务的人数不得超过二名，且必须分清各自职务的职责，承担所兼职务的法定责任和行使所兼职务的法定权利，并保证有足够的时间和必要的知识能力承担公司的工作。控股机构的管理人员不得兼任公司经理、副经理、财务主管、营销主管和董事会秘书。

二、进一步深化控股机构和公司的改组工作

国有控股机构的主要业务和资产已纳入公司的，控股机构的职能要逐步划转或合并到其他国有法人实体。除公司业务外还拥有其它资产和业务的控股机构，应减少与公司的关联交易，避免同业竞争。

要逐步分离控股机构的办社会职能以及非经营性资产，通过拍卖、并购、移交地方政府、纳入当地社会保障体系等方式实现社会化经营。对于目前难以彻底分离的，要制定严格的管理办法，保证在财务和人员等方面与公司分开。

分离公司办社会职能以及非经营性资产，要严格执行上市重组时公司与控股机构所签订的协议；对分离不彻底的，要继续分离，限期完成。新上市的公司应在上市前制订分离办社会职能以及非经营性资产的具体方案，有关遗留问题要明确解决的办法和责任，否则不予批准上市。各级政府及有关部门要采取积极措施，支持公司和控股机构的改组工作。

三、明确公司决策程序，强化董事责任

公司必须在公司章程中明确决策程序，不能以非股东大会的任何形式代替股东大会进行决策。公司也不得以其他形式（如联席会议等）代替董事会进行决策。凡须经公司董事会决策的重大事项，必须按法定时间事先通知所有执行董事及外部董事（指不在公司内部任职的董事，下同），并同时提供足够的资料，严格按照规定的程序进行。董事可要求提出补充材料。当1/4以上董事或2名以上外部董事认为资料不充分或论证不明确时，可联名提出缓开董事会或缓议董事会所议的部分事

项，董事会应予以采纳。

公司董事负有诚信义务，应当勤勉尽责。董事应当以认真负责的态度出席董事会，对所议事项表达明确的意见。董事无法出席董事会，不得转让其表决权，可以书面形式委托其他董事代为出席，但要独立承担法律责任。凡未按法定程序形成经董事签字的书面决议，即使每一位董事都以不同方式表示过意见，亦不具有董事会决议的法律效力。董事会的决议违反法律、行政法规和公司章程，投赞成票的董事应承担直接责任；对经证明在表决时曾表明异议并记载于会议记录的投反对票的董事，可以免除责任；对在表决中投弃权票或未出席也未委托他人出席的董事不得免除责任；对在讨论中明确提出异议但在表决中未明确投反对票的董事，也不得免除责任。董事会要对会议所议事项及决议进行完整记录。董事会秘书要认真组织记录和整理会议所议事项，并在决议上签字，承担准确记录的责任。

四、强化董事会的战略决策功能，积极利用好社会咨询力量

公司董事会要集中精力组织研究公司的长远发展战略，可根据需要成立战略决策、审计等专业性的委员会。公司在作出有关市场开发、兼并收购、新领域投资等方面的决策前，对投资额或兼并收购资产额达到公司总资产10%以上的项目，应聘请社会咨询机构提供专业意见，作为董事会决策的重要依据。

五、保持公司高级管理人员的稳定，提高公司高级管理人员素质

公司高级管理人员（指董事、监事、经理、副经理、财务主管和董事会秘书，下同）的选举、委派或聘任，应严格按照《中华人民共和国公司法》（以下简称《公司法》）和《到境外上市公司章程必备条款》（以下简称《必备条款》）的有关规定执行。如无特殊原因，有关高级管理人员在公司章程要求的任期内不得随意变动；若变动，必须履行法定的手续和程序，向社会公众披露，并报中国证监会备案。对经营业绩突出的公司，董事长、经理应相对稳定。

公司董事会和经理层应具备合理的知识结构，应吸收在发展战略、财务、营销、技术开发以及法律等方面的专业人才。公司董事长、经理、财务主管、董事会秘书应参加中国证监会认定的境外上市相关知识的培训并通过任职资格考试。公司要立足境内和境外人才市场，择优聘任财务、市场开拓、技术开发等高级管理人员。

六、逐步建立健全外部董事和独立董事制度

公司应增加外部董事的比重。董事会换届时，外部董事应占董事会人数的1/2以上，并应有2名以上的独立董事（独立于公司股东且不在公司内部任职的董事，下同）。外部董事应有足够的时间和必要的知识能力以履行其职责。外部董事履行职责时，公司必须提供必要的信息资料。独立董事所发表的意见应在董事会决议中列明。公司的关联交易必须由独立董事签字后方能生效。2名以上的独立董事可提议召开临时股东大会。独立董事可直接向股东大会、中国证监会和其他有关部门报告情况。

七、加强公司监事会的建设

公司要不断强化监事会的功能，明确监事会的职责和权限，制定监事会的具体工作规则和议事程序，避免监事会流于形式。公司监事会的首要职责是检查公司财务，有了解和查询公司经营情况的权利，可按规定程序向董事会秘书及财务部门索要有关材料，并承担相应的保密义务。监事会可对公司聘用会计师事务所发表建议，可在必要时以公司名义另行委托会计师事务所独立审查公司财务，可直接向中国证监会及其他有关部门报告情况。国家有关部门可委托公司监事会对特定的事项进行调查。公司应增加外部监事（不在公司内部任职的监事，下同）的比重。如果公司监事会换届，外部监事应占监事会人数的1 / 2以上，并应有2名以上的独立监事（独立于公司股东且不在公司内部任职的监事）。公司外部监事应向股东大会独立报告公司高级管理人员的诚信及勤勉尽责表现。

八、充分发挥董事会秘书的作用

公司董事会秘书由董事会委任，经董事会授权负责协调和组织公司的信息披露工作，负责与投资者、证券监管机构、新闻媒体的联络工作。公司董事会及经理层要注意增强公司透明度，积极支持董事会秘书履行职责，并在工作机构及人员配备方面给予必要的保证。

九、探索对公司高级管理人员的激励办法

公司可从自身经营特点出发，将公司高级管理人员的物质利益与公司业绩联系起来，根据收入公开、提高透明度的原则，设计各具特色的分配和奖励办法。经股东大会同意，公司可采取适当的形式，对公司高级管理人员及在技术创新、经营风险大、挑战性强且绩效易于考核的岗位上的有特殊贡献的人员进行奖励。

十、深化公司内部改革

公司要防止和改变重筹资、轻转制的倾向，要根据市场竞争的要求，组织生产经营活动，深化内部改革，转换经营机制，建立科学有效的管理制度。

公司可自主决定内部机构设置和招工的条件、方式、数量与时间。公司依照法律、法规和公司章程，可实行经济性裁员，解除与职工签订的劳动合同；可辞退、开除职工。

公司要取消“干部”和“工人”的称谓，打破“干部”和“工人”的身份界限和岗位界限，不得套用政府机关的行政级别。对管理人员要实行竞争上岗、淘汰下岗。

公司自主决定年度工资总额和内部分配办法。

公司必须按照国家有关规定实行住房制度改革，停止对职工福利分房。公司要参加社会保障制度的改革，按照国家有关规定办理职工的养老、失业、医疗等项保险。

十一、政企分开，规范股东与公司的出资关系

解除公司与政府部门的行政隶属关系，公司与政府部门在资产、财务、人员管理等方面要彻底脱钩。政府部门不得干预公司的生产经营管理，不得向公司收缴任何形式的管理费或监管费。

行使公司国家股股权的机构或公司国有法人股的持股机构委派的股东代表，要按照法律规定的程序出席股东大会，依法行使权利。任何股东机构及其委派的代表不得越过股东大会干预公司的生产经营管理、任免公司的高级管理人员，不得对公司股东大会人事选举决议和董事会人事聘任决议履行批准手续。

By State Economy and Trade Commission and China Securities Regulatory
Commission

Overseas listed companies (hereinafter referred to as the Company) refer to the companies with capital financed from overseas and the same belongs to a type of organization in modern enterprise system. There exist higher demands in company operation structure and information disclosure. At present, most companies have made progress in system innovation and transition of operation system. However, still some other companies have failed to reform their operation systems adequately; problems concerning standardized operation and internal management still exist. In order to promote strict observance of relevant laws and regulations at home and abroad by these companies, faithfully perform the sustained duties for the investors and build up a positive image of the companies in the capital markets at home and abroad, we hereby propose the following opinions concerning standardization of company operation and deepening reform:

- I. The operation organ of the company must be separated from its share-holding organ.

The company must clear up its management system in accordance with the requirements of modern enterprise system. The company and the share-holding organ (i.e. companies of legal entity, enterprises and institutions that hold the company shares) must have their respective independent accounting and bear their respective risks and responsibilities independently. The share-holding organ exercises its shareholder's right mainly through the shareholders' meeting by legal procedures. The company organs, particularly Board of Directors, management, financial and marketing organs, shall be independent from the share-holding organ. The separation must be done before the end of 1999. The internal organs of the shareholding organ have no subordination relation with corresponding organs of the Company; the former must not interfere with the independence of the organs in the Company by means of issuing documents.

The shareholding organ shall send its representative to the company to enter the Board of Directors. The number of senior management staff (Chairman of Board, Deputy Chairman of Board, Managing Director) of the shareholding organ who concurrently act as Chairman of Board, Deputy Chairman of Board, Managing Director in the Company must not exceed two. The duties of the respective positions must be clearly defined. Such persons must bear the legal responsibility of their concurrent posts and exercise the legal rights of their concurrent posts.

They must also ensure sufficient time and necessary knowledge to perform the work in the Company. The management staff of the shareholding organs must not concurrently act as the manager, deputy manager, financial director, marketing director and secretary of Board of Directors.

- II. Further deepening the restructuring of shareholding organ and of the Company
If the major business and assets of state-owned shareholding organ has been assimilated into the Company, the function of the shareholding organ shall gradually be merged into other state-owned legal entities. If the shareholding organ has other assets and business besides the business in the Company, it shall reduce its business similar to that of the Company so as to avoid competition.

The social function and the non-business assets of the shareholding organs shall be gradually separated. Auction, merger, purchasing, transferring to local government and assimilated to local security system shall be adopted to achieve socialized operation. Should the separation be difficult at present, strict management measures must be formulated to ensure the separation of finance and personnel from the Company.

In the separation of social function and non-business assets of the Company, the agreement signed by the Company and the shareholding organ at the time of restructuring for listing must be strictly performed. The separation shall be carried through until it is completed within the time limit. The newly listed companies shall draw up specific plans for separating the social function and non-business assets before listing. Relevant problems left behind shall have definite measures and responsibilities for solution; otherwise, the listing shall not be approved. Government authorities at different levels and competent authorities shall take effective measures to support the restructuring of the Company and the shareholding organ.

- III. Clarifying company decision-making procedure and strengthening directors' responsibility

The Company must define solution procedures in its Articles of Association; no other means shall be used for decision-making other than shareholders' meeting. The Company must not make a decision by means other than by Board of Directors. As for all major issues to be decided by means of Board of Director resolution, all managing directors and external directors (i.e. directors not holding a position in the Company) must be informed within the time limits provided by law and be supplied with sufficient information. The provided procedures must also be strictly observed. The directors can demand supplementary information. Should over 1/4 of the directors or more than 2 external directors believe that the information is insufficient or that the argumentation is indefinite, they can jointly propose to suspend the Board meeting or part of the agendas of the Board

meeting, which shall be adopted by the Board.

The directors of the Company shall bear the responsibility for creditability and diligence. The directors shall be present at the Board meeting earnestly and express definite opinions on the agendas. Should the director fail to be present at the Board meeting, he must not transfer his voting rights, but he can entrust other directors to attend the meeting by means of a written power of attorney and bear independent legal responsibilities. Any written resolutions signed by the directors in the absence of legal procedures shall not have the legal force of Board of Directors resolution, even if every director has expressed his opinion in various ways. Should the resolution by Board of Director violates laws, administrative rules and Articles of Association, the directors who vote for such resolution shall bear direct responsibilities; the directors who have verifiable objection in voting and whose objection vote has been recorded in meeting minute shall be exempt from responsibilities; the directors who have renounced their votes or who fail to be present or entrust others to be present at the meeting shall not be exempt from responsibilities; the directors who have expressed objection in discussion but fail to vote definitely against the resolution shall not be exempt from responsibilities. The Board of Directors shall make complete record of the agendas and resolutions of the meeting. 为促进社会主义市场经济体制的建立和进一步对外开放，推动我国国民经济的持续、快速、健康发展，根据国务院决定，从1994年1月1日起，进一步改革我国的外汇管理体制。现公告如下：

一、实行外汇收入结汇制，取消外汇分成

境内所有企事业单位、机关和社会团体的各类外汇收入必须及时调回境内。属于下列范围内的外汇收入（外商投资企业除外），均须按银行挂牌汇率，全部结售给外汇指定银行：

1. 出口或转口货物及其他交易行为取得的外汇；
2. 交通运输、邮电、旅游、保险等业提供服务和政府机构往来取得的外汇；
3. 银行经营外汇业务应上缴的外汇净收入，境外劳务承包和境外投资应调回境内的外汇利润；

4. 外汇管理部门规定的其他应结售的外汇；

下列范围内的外汇收入，允许在外汇指定银行开立现汇帐户：

1. 境外法人或自然人作为投资汇入的外汇；
2. 境外借款和发行债券、股票取得的外汇；
3. 劳务承包公司境外工程合同期内调入境内的工程往来款项；
4. 经批准具有特定用途的捐赠外汇；
5. 外国驻华使领馆、国际组织及其他境外法人驻华机构的外汇；
6. 个人所有外汇。

上述范围内用于支付境内费用的部分，均应向外汇指定银行兑换人民币办理支付。

取消现行的各类外汇留成、上缴和额度管理制度，对现有留成外汇额度余额和前述允许开立现汇帐户范围以外的现汇存款，按以下原则处理：

留成外汇额度余额允许按1993年12月31日公布的外汇牌价继续使用。对汇率并轨前已办理结汇，尚未分配入帐的留成外汇额度，应在1994年1月31日以前办完入帐，也允许按1993年12月31日公布的外汇牌价继续使用。

前述允许开立现汇帐户范围以外的现汇存款，在实行结汇制后，可继续保留原有现汇帐户，只许支用，不许存入，用完为止。帐户内余额允许用于经营项目支付、偿还外汇债务或向银行结售。

二、实行银行售汇制，允许人民币在经常项目下有条件可兑换

在实行售汇制后，取消经常项目正常对外支付用汇的计划审批。境内企事业单位、机关和社会团体在此项下的对外支付用汇，持如下有效凭证，用人民币到外汇指定银行办理兑付：

1. 实行配额或进口控制的货物进口，持有关部门颁发的配额、许可证或进口证明以及相应的进口合同；

2. 实行自动登记制的货物进口，持登记证明和相应的进口合同；
3. 除上述两项以上，其他符合国家进口管理规定的货物进口，持进口合同和境外金融机构的支付通知书；
4. 非贸易项下的经营性支付，持支付协议或合同和境外金融、非金融机构的支付通知书。

非经营性支付购汇或购提现钞，按财务和外汇管理有关规定办理。对向境外投资、贷款、捐赠的汇出，继续实行审批制度。

作为一项过渡措施，改革初期对出口企业按结汇额的50%在外汇指定银行设立台帐。出口企业出口所需用汇及贸易从属费，持前述有效凭证，由银行在其台帐余额内办理兑付。出口企业出口所需用汇，超过台帐余额的部分，仍可以按国家规定的办法，持有效凭证到外汇指定银行办理兑付。

三、建立银行间外汇市场，改进汇率形成机制，保持合理及相对稳定的人民币汇率

实行银行结汇、售汇制后，建立全国统一的银行间外汇交易市场。外汇指定银行是外汇交易市场的主体。银行间外汇交易市场主要职能是为各外汇指定银行相互调剂余缺和清算服务。银行间外汇交易市场，由中国人民银行通过国家外汇管理局监督管理。

1994年1月1日开始，实行人民币汇率并轨。并轨后的人民币汇率，实行以市场供求为基础的、单一的、有管理的浮动制。由中国人民银行根据前一日银行间外汇交易市场形成的价格，每日公布人民币对美元交易的中间价，并参照国际外汇市场变化，同时公布人民币对其他主要货币的汇率。各外汇指定银行以此为依据，在中国人民银行规定的浮动幅度范围内自行挂牌，对客户买卖外汇。在稳定境内通货的前提下，通过银行间外汇买卖和中国人民银行向外汇交易市场吞吐外汇，保持各银行挂牌汇率的基本一致和相对稳定。

四、强化外汇指定银行的依法经营和服务职能

外汇指定银行办理结汇所需人民币资金原则上应由各银行用自有资金解决。国家对外汇指定银行的结算周转外汇实行比例管理。各银行结算周转外汇的比例，由中国人民银行根据其资产和外汇结算工作量核定。各银行持有超过其高限比例的结算周转外汇，必须出售给其他外汇指定银行或中国人民银行；持有结算周转外汇降至低限比例以下时，应及时从其他外汇指定银行或中国人民银行购入补足。

为使有远期支付合同或偿债协议的用汇单位避免汇率风险，外汇指定银行可依据有效凭证办理人民币与外币的保值业务。

各外汇指定银行要保持合理的资产负债结构，按规定办理结汇、售汇和开户、存贷等业务，努力提高服务质量，降低服务费用，依法经营，公平竞争。

五、严格外债管理，建立偿债基金，确保国家对外信誉

对境外资金的借用和偿还，国家继续实行计划管理、金融条件审批和外债登记制度。为境外法人（含中资控股的机构和企业）借款出具担保，必须严格按照国家外汇管理局《境内机构对外提供外汇担保管理办法》办理。

为确保国家的对外信誉，必须加强外债偿还的管理，继续实行“谁借谁还”的原则。债务人应加强对借用外债项目的管理，提高项目的经济效益和创汇能力。国家鼓励和支持各地区、有关部门和外债较多的企业按债务余额的一定比例建立偿债基金，在外汇指定银行开立现汇帐户存储。国家批准的专项还贷出口收汇，可以直接进入该帐户。专户资金只能用于对外支付本息，不得转移或用于其他支付。

债务人还本付息应从其偿债基金专户中支付，如发生困难，经外汇管理部门审查批准，根据借款协议，凭外债登记证和还本付息核准凭证，用人民币到外汇指定银行办理兑付。债务人要求在贷款协议规定到期日之前提前对外偿付的，须按规定经外汇管理部门批准。未办理登记手续的外债和境内机构违反规定为境外法人借债提供担保引起的支付责任，各银行不得擅自为其办理对外支付。

已发放的境内金融机构自营外汇贷款，债务人可用创汇收入直接偿还，也可按贷款协议规定，用人民币向外汇指定银行购汇偿还。实行新体制后，境内金融机构借入境外贷款和吸收外币存款发放的贷款，仍采取贷外汇还外汇的方式，还款外汇按上述办法解决。

六、外商投资企业外汇管理体制仍维护现行办法

外商投资企业的外汇收入，允许在外汇指定银行或境内外资银行开立现汇帐户。外商投资企业在国家规定允许的范围内对外支付和偿还境内金融机构外汇贷款本息，可从其现汇帐户余额中直接办理；超出现汇帐户余额的生产、经营、还本付息和红利汇出的用汇，由国家外汇管理部门根据国家授权部门批准的文件及合同审核批准后，向外汇指定银行购买。

七、取消境内外币计价结算，禁止外币在境内流通

自1994年1月1日起，取消任何形式的境内外币计价结算；境内禁止外币流通和指定金融机构以外的外汇买卖；停止发行外汇券，已发行流通的外汇券，可继续使用，逐步兑回。

八、加强国际收支的宏观管理

加强对外汇收支和国际收支平衡情况及变化趋势的分析、预测，逐步完善我国国际收支的宏观调控体系。建立国际收支统计申报制度，加强对收、付汇和借还外债的核销、统计、监督和管理，堵塞漏洞，减少、杜绝外汇流失。各有关部门应密切配合，及时协调、解决工作中出现的问题，确保外汇管理体制改革的顺利实施。

ANNOUNCEMENT OF THE PEOPLE'S BANK OF CHINA
CONCERNING FURTHER REFORM OF THE FOREIGN
EXCHANGE CONTROL SYSTEM

(Dated December 28, 1993.)

In accordance with a decision of the State Council, commencing on January 1, 1994 the state will further reform its foreign exchange control system with a view to promoting the establishment of the system of socialist market economy and the further opening to the outside world, and to facilitate the continuous, rapid and healthy development of the national economy.

This Announcement is hereby formulated as follows:

I. Implementing the Foreign Exchange Settlement System and Abolishing the Previous Foreign Exchange Retention System

All enterprises, institutions, state organs and non-governmental bodies inside China must promptly repatriate all their foreign exchange revenue back to China. The following foreign exchange revenue (except for that of enterprises with foreign investment) shall, in its full amount, be sold to a designated foreign exchange bank (a "DFXB") at such bank's posted foreign exchange rates:

- (1) foreign exchange obtained from exports, reexports or other transactions;
- (2) foreign exchange obtained from services rendered in such industries as communications and transport, post and telecommunications, tourism and insurance, and from dealings between government organizations;
- (3) net foreign exchange revenue from foreign exchange activities which should be turned over to the state by banks, and foreign exchange profits earned from labor services, project contracting and investment overseas which should be repatriated back to China;
- (4) any other foreign exchange which should be settled and sold according to the stipulations of the foreign exchange control authorities.

A foreign exchange current account may be opened with a DFXB for the following foreign exchange revenue:

- (1) foreign exchange remitted for investment to China by legal or natural persons outside China;
- (2) foreign exchange secured from borrowings, and from the issuance of bonds or shares, outside China;

- (3) foreign exchange on a current account opened for an overseas engineering project repatriated back to China by a labor service and project contracting company during the contract term of the project;
- (4) foreign exchange donations that, upon approval, have been earmarked for specific purposes;
- (5) foreign exchange in the possession of foreign embassies and consulates in China and establishments in China of international organizations and other foreign legal persons;
- (6) foreign exchange owned by individuals.

That portion of the above funds used to pay domestic expenses in China shall be converted into Renminbi ("RMB") at a DFXB in order to effect such payments.

The various systems currently in effect in respect of the retention, turning over and quota control of foreign exchange will be abolished. Remaining quotas in relation to the retention of foreign exchange, and foreign exchange deposits other than the foregoing ones for which the opening of foreign exchange remittance accounts is permitted, shall be handled in accordance with the following principles:

The remaining quotas in relation to the retention of foreign exchange are permitted to be used at the rate published on December 31, 1993. The quotas in relation to the retention of foreign exchange that have been settled before the unification of the exchange rates, but which have not been distributed and credited to an account, shall be credited to an account before January 31, 1994, and the same shall also be permitted to be used at the exchange rate published on December 31, 1993.

Foreign exchange deposits (other than the above-mentioned ones for which the opening of foreign exchange remittance accounts is permitted) may, after introduction of the foreign currency settlement system, be kept in the original foreign exchange remittance account, into which no further deposits are permitted, but from which withdrawals are permitted, until such account is fully depleted. The balance of the account may be used for payments in relation to recurring items and payments of foreign exchange debts, or be settled and sold to banks.

2. Practicing the System of Foreign Exchange Sales by Banks and Permitting Conditional Conversion Into Foreign Exchange of RMB for Payments in Relation to Recurring Items

After introduction of the foreign exchange sales system, approval of plans for the use of foreign exchange for normal payments to payees outside China in relation to recurring items will be no longer required. Enterprises, institutions, government organs and non-governmental bodies in China shall, when making payments to payees outside China in relation to such items, convert RMB into foreign exchange and make payment at a DFXB on the strength of the following valid documents:

- (1) for the import of goods under quota or import control, on the strength of the import quotas, licenses or certificates issued by the departments concerned, and the relevant import contracts;
- (2) for the import of goods subject to the voluntary registration system, on the strength of the registration certificates and relevant import contracts;
- (3) for the import of goods in conformity with the state's import controls other than those mentioned in (a) and (b) above, on the strength of the import contracts and debit notes of the overseas financial institutions;
- (4) for non-trade operational payments, on the strength of the payment agreements or contracts, and debit notes of the overseas financial or non-financial institutions.

Purchase of foreign exchange or purchase and withdrawal of bank notes for non-operational payments will be processed pursuant to the relevant stipulations concerning financial affairs and foreign exchange control. Remittance of foreign exchange abroad for the purpose of investment, loans and donations shall still be subject to approval.

As a transitional measure at the initial stage of the reform, exporting enterprises will be required to open accounts of records with a DFXB in the amount of 50% of the foreign exchange settled. Conversion of foreign exchange needed by exporting enterprises for exports and expenses incidental to trade shall be executed by the bank with the balance of the accounts of records. The conversion and payment of foreign exchange exceeding the balance needed by exporting enterprises for exports may still be processed at a DFXB with valid documents, pursuant to the state's stipulations.

3. Establishing An Inter-bank Foreign Exchange Swap Market, Improving the Mechanism for Setting Exchange Rates, and Maintaining Appropriate and Relatively Stable RMB Exchange Rates

After introduction of the system of foreign exchange settlements and sales by banks, a nation-wide unified inter-bank foreign exchange swap market will be established. DFXBs shall form the main body of the foreign exchange swap market. The main function of the inter-bank foreign exchange swap market will be to regulate supply and demand and effect settlement between DFXBs. The inter-bank foreign exchange swap market will be supervised by the People's Bank of China through the State Administration of Foreign Exchange.

The RMB exchange rates will be unified commencing on January 1, 1994. The RMB exchange rate after unification will adopt a single and regulated floating system based on market supply and demand. The People's Bank of China will publish the median exchange rate of the RMB against the US dollar every day, which will be based on the trading price of the previous day on the inter-bank foreign exchange swap market. It will also publish the RMB's rate against other major foreign currencies with reference to the fluctuation on the international foreign exchange market. Each DFXB will, on that basis, post its own rates within the

fluctuation limits set by the People's Bank of China, and buy and sell foreign exchange from and to its customers. Provided domestic currency is stabilized, rates posted by different banks will be kept basically the same and relatively stable through inter-bank foreign exchange buying and selling and through foreign exchange buying and selling by the People's Bank of China from and to the foreign exchange swap market.

4. Strengthening the DFXBs' Functions in Respect of Operations and Services in Accordance with the Law

RMB funds needed by a DFXB for foreign exchange settlements will, in principle, come from its own funds. The state will establish a system of proportionate control of working foreign exchange for settlements. The proportion of such foreign exchange for each DFXB will be approved by the People's Bank of China according to its assets and its volume of foreign exchange settlements. Whenever the amount of working foreign exchange for settlement purposes held by a bank exceeds the maximum approved proportion, the bank must sell the excess amount to other DFXBs or to the People's Bank of China; and whenever the working foreign exchange for settlement purposes held by a DFXB falls below the minimum approved proportion, it shall promptly eliminate the shortfall by purchases from other DFXBs or the People's Bank of China.

In order to protect those units using foreign exchange which have entered into a forward contract or a debt payment agreement against exchange risks, a DFXB may carry out RMB and foreign currency hedging business in accordance with valid documents.

DFXBs shall maintain an appropriate ratio of assets and liabilities, and carry out such activities as foreign exchange settlements, sales, account opening, accepting deposits and lending funds pursuant to regulations. They shall try their best to improve their services and lower service expenses, and operate banking business in accordance with the laws and principles of fair competition.

5. Tightening Control of Foreign Debts and Establishing Funds for Payment of Foreign Debts So As To Maintain China's International Reputation

With regard to the borrowings and repayments of foreign funds, the state will continue its current practices of control through planning, examination and approval of financial terms, and foreign debt registration. Loan guarantees to legal persons outside China (including institutions and enterprises with a Chinese controlling interest) shall be issued in strict compliance with the *Measures of the State Administration of Foreign Exchange for Administration of the Provision of Foreign Exchange Guarantees to Foreign Parties by Organizations in China*.

In order to maintain the state's international reputation, the control of payments of foreign debts must be strengthened, and the current principle that "those who have borrowed shall be responsible for repayment" must be observed. Debtors shall strengthen the management of projects using foreign loans, and improve the economic performance and foreign currency generating capabilities of such projects. The state encourages and supports the relevant localities, departments, and enterprises with large foreign debts to establish payment funds in

proportion to the balance of their foreign debts, and open foreign exchange current accounts with a DFXB for deposit of such funds. Export earnings to be used for the repayment of specific loans, where such scheme has been approved by the state, may be directly deposited into such accounts. Funds in such special accounts may be used only for repayment of the principal of foreign debts together with the interest thereon, and may not be transferred or used for other payments.

A debtor shall repay the principal of its debts, and pay the interest thereon, with the funds in the special account opened for debt payment. However, in case of difficulties, it may, after examination and approval by the foreign exchange control authorities, convert RMB into foreign exchange and make payment at a DFXB on the basis of the loan agreement upon presentation of the foreign debt registration certificate and the approval document for repayment of the principal together with interest. In the event a debtor requests payment of a foreign debt prior to the due date set by the loan agreement, approval of such prepayment from the foreign exchange control authorities is required. With regard to unregistered foreign debts and payment liabilities arising from a loan guarantee issued in violation of stipulations to an overseas legal person by a domestic institution, no bank is permitted to make the payments therefor without authorization.

The outstanding foreign exchange loans granted by a domestic financial institution on its own account may be repaid by the debtors, either directly with their earnings generated in foreign currency, or with foreign exchange purchased from a DFXB as provided for in the loan agreement. After introduction of the new system, loans granted by a domestic financial institution with foreign loans and/or with foreign exchange deposits shall still be repaid in foreign exchange, and foreign exchange used for such repayments will be obtained by the method above.

6. Maintaining the Current System of Foreign Exchange Control with Regard to Foreign Investment Enterprises

Foreign investment enterprises are permitted to open foreign exchange remittance accounts for their foreign exchange revenue with a DFXB or a wholly foreign-owned bank in China. When foreign investment enterprises make payments to payees outside China or repay the principal of, and pay interest on, foreign exchange loans granted by domestic financial institutions within the limits stipulated by the state, such payments or repayments may be made directly with the balance of their foreign exchange remittance accounts. Such amount of foreign exchange in excess of the balance as is used for production, operation, repayment of principal, payment of interest and outward remittance of profit shares shall, after examination and approval by the exchange control authorities of the state, be purchased from a DFXB in accordance with the documents and contracts approved by the authorized departments of the state.

7. Abolishing the Practice of Pricing and Payment in Foreign Currency In China and Banning the Circulation of Foreign Currency In China

Commencing on January 1, 1994, the pricing and payment in foreign currency in any form in China will be abolished; the circulation of foreign currency in China and purchases and sales of foreign exchange other than by designated financial institutions will be banned; foreign exchange certificates (FECs) will no longer be issued, and FECs in circulation may continue to

be used and shall be gradually withdrawn by banks.

8. Strengthening Macromanagement of the International Balance of Payments

The work of analyzing the present situation and forecasting future trends in foreign exchange revenue and expenditure as well as in the international balance of payments shall be strengthened, and China's system of macrocontrol of the international balance of payments shall be gradually perfected. A system for gathering statistics and reporting in relation to the international balance of payments shall be established and the practices in relation to the auditing and confirmation of, gathering of statistics in relation to, and the supervision and control of foreign exchange receipts and payments and the incurring and payment of foreign debts shall be improved in order to stop up loopholes and to reduce and eliminate the foreign exchange drain. All the relevant departments shall cooperate closely, coordinate their activities in a timely manner, and resolve problems in their work together so as to ensure the smooth implementation of the reform of the foreign exchange control system.
